ELUCIDATION OF
LAW OF THE REPUBLIC OF INDONESIA
NUMBER 11 OF THE YEAR 2006
REGARDING
THE GOVERNING OF ACEH

104
BY THE GRACE OF THE SUPREME GOD
THE PRESIDENT OF THE REPUBLIC OF INDONESIA

I. GENERAL

The Governing System of the Unitary State of the Republic of Indonesia according to the 1945 Constitution of
the Republic of Indonesia acknowledges and respects regional government units having special characteristic or
specific characteristic. The state administrative journey of the Republic of Indonesia has put Aceh as a regional
government unit having special and specific characteristics, relating to the typical character of Aceh community
struggling history which possesses high tenacity and struggling power.

The life of Aceh community is very much articulated in the modern perspective in democratic as well as
responsible state life and governmental life. Such social order is the materialization of the idiom of Bhinneka
Tunggal Ika. Such high tenacity and struggling power are deriving from the way of life based on Islamic syari’at
which has given birth to strong Islamic culture therefore Aceh become one of capital region for the struggle to take
over and defend the liberty of the Unitary State of the Republic of Indonesia based on Pancasila and the 1945
Constitution.

Such life requires the presence of formal implementation of Islamic syari’at enforcement. That is a part of the
backgrounds of Syar’iyah Court establishment which becomes one of the parts of Aceh special anatomy. The
enforcement of Islamic syari’at is be conducted by Islamic personality principle towards every person in Aceh
without discriminating citizenship, position, and status in the territory in accordance with the borders of Aceh
Province region.

The dynamic aspiration of Aceh community is not only in indigenous, cultural, social and political life which
adopt Aceh specialty, but also it gives an assurance of legal certainty in all affairs because the religious basis of life
of Aceh community has formed the attitude, high struggling power and strong Islamic culture. Such things have
become the primary consideration in the administering of specialty for the Province of Aceh Special Region with
Law Number 44 of the Year 1999.

The formation of special zone of Sabang with Law Number 37 of the Year 2000 is a set of efforts to improve
the welfare of Aceh community, and become the motivator of economic growth and development in Aceh zone as
well as the capital for the acceleration of development for other region.

In the journey of administering the specialty of the Province of Aceh Special Region, it is considered not
enough to give life in justice or justice in life. Such condition could not halt the community upheaval in the Province
of Aceh Special Region which is manifested in various forms of reaction. The responses of the Government and the
House of People’s Representatives has given birth to a political solution for the settlement of Aceh problems in the
form of Law Number 18 of the Year 2001 which stipulate the administering of special autonomy for the Province of
Aceh Special Region as the Province of Nanggroe Aceh Darussalam. In its implementation, that law is not adequate in accommodating the aspiration and the interest of economic development. Such matters have motivated the issuance of Law on the Governing of Aceh with autonomy as great as possible. The granting of autonomy as great as possible in the political sector to Aceh community and in the management of regional government in accordance with the principles of good governance, i.e., transparency, accountability, professionalism, efficiency, and effectiveness, are intended as great as possible for the welfare of community in Aceh. In administering autonomy as great as possible, Aceh community has a role including in formulating, stipulating, implementing and evaluating the policies of regional government.

Natural disasters, earthquake, and tsunami that happened in Aceh have given rise to solidarity of all potential of the nation to rebuild Aceh community and territory. Additionally, has also arisen strong awareness that the Government and Free Aceh Movement have settled the conflict peacefully, integrally, in a sustainable manner as well as with dignity in a permanent manner in the framework of the Unitary State of the Republic of Indonesia. Such matters are absolute necessity.

The Memorandum of Understanding between the Government and Free Aceh Movement signed in August 15, 2005 has marked a new flash of history in the journey of Aceh Province and the life of its community towards a peaceful, fair, prosperous, welfare and dignified condition. The matter that should be understood is that the Memorandum of Understanding is a form of reconciliation with dignity towards social, economic and political development in Aceh in a sustainable manner.

The ideal anatomy in the above framework gives philosophical, juridical and sociological considerations to the formulation of the Law on the Governing of Aceh. This Law assertively stipulates that Aceh Government is an inseparable part of the Unitary State of the Republic of Indonesia and the autonomy order as great as possible which is applied in Aceh based on this Law is a sub-system in the national government system. Therefore, autonomy as great as possible is basically not only a right, but moreover, it is a constitutional obligation to be utilized as great as possible for the welfare in Aceh.

Therefore, the stipulation in qanun which is very much mandated in this Law is the materialization of concrete form for the organizing of such constitutional obligation in the administering of Aceh and district/city government, and it is a reference with dignity to manage government affairs independently as a part of the territory of the sovereignty of the Unitary State of the Republic of Indonesia.

The stipulation of the authorities which are granted to Aceh and district/city Government in this Law is the manifestation of the trust of the House of People’s Representatives and the Government to accelerate the materialization of justice in welfare and welfare in justice in Aceh.
The provisions in this Law regarding the need of norms, standards, procedures, and nationally strategic affairs which become the authorities of the Government, is not meant to diminish the authority of Aceh and Regent/City Government, but it is a form of fostering, facilitation, stipulation and administering the Governmental affairs which are national in nature.

The stipulation of financial equilibrium between the central government and the regional government is reflected through the granting of authority for the utilization of existing funding sources. Cooperation in the management of natural resources in Aceh follows by a transparent and accountable management of financial sources in the framework of planning, implementing and supervising. Then, in the framework of supporting the economic growth of Aceh community, will be conducted development of infrastructure, the creation of working fields, and the elimination of poverty, and the advancement of education quality, the utilization of special autonomy fund which is an inseparable part of the growth of national economy.
