MEMORANDUM OF OBJECTS AND REASONS

Climate change has been universally identified as one of the greatest global challenge facing humanity requiring international attention and action. It is considered as one of the most serious threats to sustainable development globally. This impacts cut across diverse aspects of society including the economy and environment In Kenya, various actions have been taken to address the issue of climate change. Kenya ratified the United Nations Framework Convention on Climate Change in 1994 and the Kyoto Protocol in 2005. Kenya has also published a National Climate Change Response Strategy in 2010 and a National Climate Change Action Plan in 2013 and is in the process of formulating National Climate Change Policy.

The Bill principally seeks to provide a framework for mitigating and adapting to the effects of the changing climate on various sectors of the economy. In particular the Bill seeks to create a framework for coordination of mitigation and adaptation measures to the effects of climate change and the overall achievement of climate resilient and low – carbon development. It seeks to achieve this by establishing the National Climate Change Council and vesting in the Council functions and powers to coordinate national climate change issues including supporting the implementation of the national climate change strategies.

The Bill also establishes a Climate Change Fund, managed by a Council, into which monies appropriated from the consolidated fund and other donations received in the form of donations, endowments, grants or gifts or monies raised by the Council would be paid and subsequently utilized for the achievement of the mandate and objectives of the Council.

The Bill concerns county governments in terms of Article 110 (1) (a) of the Constitution in that it contains provisions that affect the functions and powers of county governments as set out in the Fourth Schedule to the Constitution

The Bill has been developed with the support and participation of various governmental and non-governmental stakeholders in the climate change arena and broadly addresses the concerns of these stakeholders. The Bill also accords with international best practices and standards. It is noteworthy that by enacting this legislation, Kenya would be taking the lead regionally and would, in the international arena, join a few jurisdictions that have so far demonstrated their commitment to addressing climate change issues by enacting legislation specifically addressing climate change.

The enactment of this Bill shall occasion additional expenditure of public funds.

Dated the 10th July, 2013.

W. K. OTTICHILO,
Member of Parliament.
