ASIA: EARTHQUAKE AND TSUNAMIS FOCUS ON EAST AFRICA REGION

7 January 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 181 countries.

In Brief

Revised Preliminary Appeal No. 28/2004; Operations Update no. 12; Period covered: 26 December 2004 to 7 January 2005; Appeal coverage: 140.9% ([Click here to view the provisional contributions list attached, also available on the Federation's website](#)).

Appeal history:

- Preliminary appeal launched on 26 December 2004 CHF 7,517,000 (USD 6,658,712 or EUR 4,852,932) for 6 months to assist 500,000 beneficiaries.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 1,000,000.
- Revised Preliminary Appeal issued on 30 December 2004, for CHF 67,005,000 (USD 59,152,246 or EUR 53,439,988) for 2 million beneficiaries for 6-8 months.
- The Preliminary Appeal was originally launched titled "Bay of Bengal: Earthquake and Tsunamis". The title was subsequently changed to "Asia: Earthquake and Tsunamis" in the Revised Preliminary Appeal launched on 29 December 2004.

Operational Summary: As reflected in the map on page 2, the tsunami reached the islands of the Indian Ocean and eastern shores of Africa. The African National Red Cross and Red Crescent Societies placed various teams and volunteers in place to assess the situation and to offer assistance. As well, many national societies not directly affected by the tsunami have mounted national fund-raising efforts in support of the Federation Appeal.

For further information specifically related to this operation please contact:

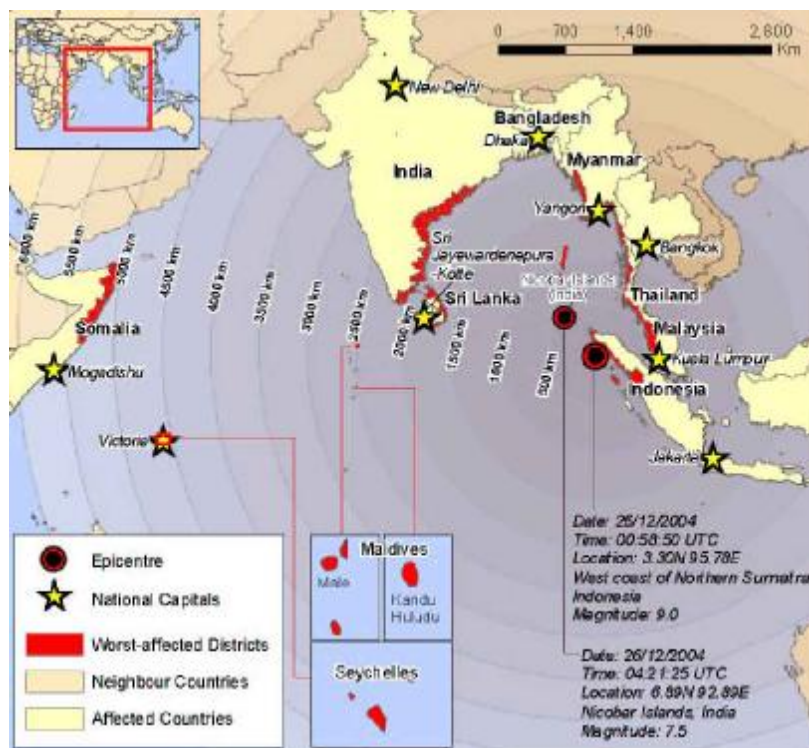

- In Geneva: Iain Logan, Federation Head of Tsunami Operations Coordination; Email iain.logan@ifrc.org; Phone 41.22.730.42.58; Fax 41.22.733.03.95 (also covering Sri Lanka).
- In Geneva: Sian Bowen, Media Dept.; Email sian.bowen@ifrc.org; Phone 41.22.730.44.28; Fax 41.22.733.03.95
- In Kenya: Anitta Underlin, Federation Head of Eastern Africa Regional Delegation, Nairobi; Email ifrcke03@ifrc.org; Phone 254.20.283.51.24; Fax 254.20.271.84.15
- In Kenya: Steve Penny, Federation Disaster Management Coordinator, Eastern Africa Regional Delegation, Nairobi; Email ifrcke78@ifrc.org; Phone 254.20.283.51.17; Fax 254.20.271.84.15
- In Geneva: Josse Gillijns, Federation Regional Officer for Eastern Africa, Africa Dept.; Email josse.gillijns@ifrc.org; Phone 41.22.730.42.24; Fax 41.22.733.03.95

All International Federation assistance seeks to adhere to the Code of Conduct and is committed to the Humanitarian Charter and Minimum Standards in Disaster Response in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in this or other countries, or for a full description of the national society profile, please access the Federation's website at <http://www.ifrc.org>

Background

The magnitude 9.0 earthquake that struck the area off the western coast of northern Sumatra Sunday morning, 26 December 2004, at 7:59 am local time (00:59 GMT) triggered massive tidal waves, or tsunamis, that swept into coastal villages and seaside resorts. The earthquake epicentre was located at 3.30 N, 95.78E at a depth of 10 km (see map). The area is historically prone to seismic upheaval due to its location on the margins of tectonic plates, however tidal waves of this magnitude are rare, and therefore the level of preparedness was very low.

This current Operations Update focuses on the impact of the tsunami on Eastern Africa regional countries: Somalia, Kenya, Somalia and the Indian Ocean islands of Seychelles, Madagascar, Mauritius and Reunion Island.

Map courtesy of UN OCHA

Overview

Some 10 days after the disaster, the casualty toll continues to mount. Latest estimated deaths are over 145,000 (this figure is now anticipated to rise to over 194,000), with over 520,000 injured and over 17,000 missing. The numbers of displaced and homeless people cannot be confirmed but are expected to remain at 1,726,000 and over 1,026,000 respectively (please see the summary document available on the Federation's Disaster Management Information System, or DMIS, at https://www-secure.ifrc.org/dmis/response/dmi_respond.asp). These figures are still expected to increase.

The Federation has deployed its full complement of disaster response tools in the form of Field Assessment and Coordination Teams (FACT) and Emergency Response Units (ERU) in the sectors of water and sanitation, health care, aid distribution, telecommunications, and logistics/transportation. Their daily reports are now arriving, providing a valuable source for the ongoing Federation response, and operational adjustments.

The following relates to the specific impact in Eastern Africa region and the resulting needs of affected communities.

Eastern Africa Region

Operational Developments

The regional disaster preparedness programme has developed a pool of Regional Disaster Response Team (RDRT) trained personnel who were deployed at national level for this response; the RDRT needs to be further exercised and trained. The response was hampered by the absence of regional disaster preparedness stocks while Federation contracted suppliers are not easily accessed in the region. Logistics management skills are lacking in key national societies in the region, including Seychelles and Somalia. Information needs were only partly met due to communication difficulties. Early warning mechanisms have been lacking both within and between nation states and national societies.

Federation Support

In December, the Federation trained a number of Somalia Red Crescent branch staff in contingency planning and vulnerability and capacity assessment. Trainees included key staff from the Garowe and Galkayo branches who were able to put these skills into action during the assessment and initial response.

During January, the Federation RDN IT team will upgrade the communications infrastructure in the Somali RCS branches of Garowe, Galkayo and Bosaso which are at the forefront of the response.

The Federation, working closely with the PIROI and French Red Cross, have trained four members of the Seychelles Red Cross as members of the Regional Disaster Response Team and one as Field Assessment and Coordination Team who were active in the initial response.

Throughout the initial response the Regional Delegation Nairobi and Somalia Delegation maintained constant contact with the national societies affected, communicated information on the disaster impact and response operations as they emerged, coordinated with other members of the RCRC movement, UN agencies and NGOs. Operational support was given to the Seychelles Red Cross to arrange air transportation of relief supplies and disaster preparedness stocks and to Somalia Red Crescent to advise on assessments and technical responses. Media coverage, advocacy activities and promotion of national society work was mainly done by the Regional Information Delegate and the Heads of regional and Somalia Delegations. Interviews and briefings were given to the BBC radio (English and French services), ITN TV news (UK), Reuters (local and European offices), AFP (Agence France Presse), DPA (German News Agency), Radio Canada, South African radios, RFI (Radio France Internationale), as well as the Independent newspaper. Support was also given to national societies who launched national appeals notably Kenya, Uganda Red Cross.

Plan of action

A comprehensive plan of action for response, rehabilitation and preparedness for Somalia, Seychelles with regional disaster preparedness has been prepared and an initial 1,000,000 CHF approved and allocated.

For the East Africa Region, disaster preparedness stocks will be purchased and pre positioned in Nairobi, a Regional Disaster Response training exercise will be partly supported (part funding already committed by British Red Cross) a regional logistics training event conducted, national society information and communication equipment and skills increased. A regional learning review event is planned in January to examine the responses and identify key cross cutting regional initiatives such as improvement of early warning mechanisms.

See narrative Plan of Action in sections below for Somalia and Seychelles.

Somalia

Operational Developments

The UN OCHA-led assessment of tsunami-hit areas of Somalia, supported by the Somali Red Crescent, was concluded this week. Assessment teams visited the most affected areas of Hafun, Bender Beila, Eyl and Gara'ad plus surrounding villages. In addition, an aerial assessment was carried out of the coastline between Hafun and Bender Beila, as well as the area surrounding Gara'ad. The assessment highlighted the most urgent needs of the coastal communities in Puntland in terms of food, water, medication and shelter. The results fed into the UN Tsunami Flash Appeal launched 6 January, which anticipates coverage of all the emergency food and non-food needs arising from the sea surges.

UN-OCHA estimates that the tsunami affected about 18,000 households: the appeal uses a working population figure of 54,000 people, an average of 3 people per household instead of the usual average of 6 people. Many of those affected were living in small villages along the coastline, and the numbers of seasonal migrant fishermen have made it particularly difficult to get accurate estimates of population numbers and family size. In addition to the deaths of 150 people, a large number of shelters were either damaged or destroyed, wells were washed away or contaminated with salt water, and a large number of fishing boats and equipment were lost.

Damaged dwellings along the Somali coast.

Many fishing boats were also damaged or destroyed along the Somali coast.

The peninsula of Hafun still remains the single site suffering the most profound effects. Access to Hafun is however still hampered by the poor road conditions approaching the town. WFP in particular has reported continued difficulties in transporting food relief there this week, since large trucks traveling from Bosaso are forced to stop at Foar, around 50 km from Hafun. The small 4x4 trucks that continue to shuttle relief to the town are being used by WFP and UNICEF amongst other agencies.

Despite the logistical constraints, food and health assistance is arriving steadily, and the use of Iskushuban airport opens up further delivery opportunities. Other airstrips along the Puntland coast are being opened up, and some aerial support from the US and German militaries stationed in Djibouti has also been received. The Prime Minister of the Transitional Federal Government had planned to visit affected areas throughout the country, though this visit has now been cancelled.

Presently the affected communities require food assistance that is being provided by WFP, drinking water provided by UNICEF, shelter provided by UNHCR and UNICEF, and emergency health for which WHO are providing emergency health kits and UNICEF providing supplementary medical items. The Somali Red Crescent is working closely with UNICEF and WHO both in the distributions and in the direct health response, drawing on their established health programme partnerships through the Integrated Healthcare Programme and support to Garowe Community Hospital. Somali Red Crescent is also working directly with the disaster-hit communities all along the affected coastline in providing health education, first aid and improving environmental hygiene and sanitation.

**Asia: Earthquake and Tsunamis; Revised Preliminary Appeal no. 28/2004;
Operations Update no. 12: Focus on Eastern Africa Region**

Somalia faces conflict, epidemics, drought, floods and tropical cyclones, such as one that hit the north east of Puntland earlier in December. The national society is increasing its natural disaster preparedness activities but needs to continue its VCA ¹ and contingency planning exercises to extend coverage to all branches.

Red Cross / Red Crescent Action

Somali Red Crescent branches in Bosaso, Garowe and Galkayo are all involved both in the assessment work and in the emergency response. The existing strong partnerships that Somali Red Crescent has developed with other UN operational agencies through its health programme, in particular UNICEF and WHO, are being built on for the coordinated response.

From Bosaso branch, covering the hardest hit areas, the Somali Red Crescent team of first aiders that traveled to Hafun with medicines and ORS provided by UNICEF has continued its engagement. In addition, the teams of volunteers that were mobilized along the whole of Bari region are also in place - 30 in Hafun and surrounding villages, 20 in Bender Beila and surrounding villages and 20 in Alula district (mostly in Tooxin and nearby areas). These are all active with the communities there and are assisting with distributions and with community assistance. The Somali Red Crescent sub-branch network has greatly enabled this volunteer involvement. For example, volunteers in Hafun were mobilized through Iskushuban sub-branch, and their presence in the inaccessible town has been crucial in many fields, whether in distributions with partner organizations or in working with the local community to clear the rubbish and debris arising from the devastation in and around Hafun, thus improving hygiene and sanitation there.

A team from Garowe branch including the Branch Secretary took part in the assessment together with representatives from OCHA, FSAU, CARE, Kaalo and the local authorities, and proceeded down the coast in Bender Beila to Eyl. It met there with a team traveling northwards from Gara'ad, and thus completed a full picture of needs along the Nugal region coast. The Garowe and Galkayo health teams are already working with UNICEF and WHO to respond to health needs. For example, one team that included the Somali Red Crescent Galkayo branch health officer and Somali Red Crescent Balibusle clinic staff was able to reach the badly affected sites of Gara'ad, Kulub and Ilfhoshe and treated 311 sick and injured people, as well as carrying out a nutrition survey. In addition, volunteers from the coastal sub-branches are active in assisting the affected communities around Eyl and Gara'ad.

Current expectations are that the needs of the affected people can be met with the provisions of goods and materials positioned by the major UN operational agencies (principally WFP, UNICEF, UNHCR and WHO). As stated in the flash appeal, WFP are planning distributions to 30,000 beneficiaries over six months (with additional cash support from CARE); UNHCR are providing shelter for 5,000 households; WHO will supply 9 emergency health kits and support mobile health teams in the area for 6 months; FAO will give livelihood support to 2,000 fishermen. UNICEF have not included themselves in the flash appeal as they have existing capacity to deal with the identified water needs. The coordination mechanism will confirm whether these agencies will be able to meet all the food and non-food needs, and the Federation and ICRC are ready to respond to fill any gaps that may arise in the coordinated response.

Coordination between the Movement components has remained very strong throughout the emergency, with daily meetings between Federation, Somali Red Crescent and ICRC. There is also discussion between Movement partners to further support rehabilitation in the medium term for those areas and communities affected; a joint assessment mission is planned later in January to review any gaps remaining and to prepare for longer-term rehabilitation and community development work that will be needed by way of follow-up from the disaster. Somalia's recent history of conflict and chronic insecurity, plus drought and other natural disasters, leaves many vulnerable communities in need of longer-term assistance.

Media interest on the effects of the tidal wave on the oriental coast of Africa remained high. Briefings and interviews on the overall impact in Somalia and the Red Cross/ Red Crescent response have been given by the Somalia Head of Delegation and the Regional Information Delegate to a wide range of media including BBC (French and English sections), Radio Canada International, ITN TV News (UK), Reuters, DPA (German News

¹ VCA – Vulnerability and Capacity Assessment

Agency), and South African Radio stations. An eye-witness report from Somali Red Crescent Bosaso branch was published in the Independent newspaper (UK) and subsequently picked up in other media; the Federation Head of Somalia Delegation and the British Red Cross facilitated this article.

Plan of Action

Assistance is being given to the Somali Red Crescent in their health- and sanitation-oriented relief activities, particularly in support of the UN-OCHA coordinated response with UN partners including UNICEF and WHO. Support is also to be provided this month by the Regional Delegation IT Dept to upgrading communication infrastructure in the Puntland branches. The Federation will also assist and support Somali Red Crescent in the assessment, planning and implementation of anticipated future rehabilitation activities. Disaster preparedness activities will include further VCA and contingency planning exercises to be carried out across the country, extending the process that had already started in two of the branches involved in this particular response (Garowe and Galkayo).

Seychelles

Operational Developments

Following the effect of the tidal wave that hit the Seychelles Island on 26 December and the aftermath of the heavy rain which followed the next day, most of the houses along the coastline of Mahé were either damaged or destroyed. The most affected districts are in the Northern part of Mahé, and Central and South West coast line of the same Island. Most of the households were either washed away or destroyed forcing many families to evacuate their houses. Boats were also damaged or destroyed and fishing items and equipment were either lost or damaged.

Due to the possibility of more rain, the government was forced to evacuate some 75 families and place them in Berjaya Beau Bay hotel, Beau Vallon until the situation became stable; the families are now back in their houses. Their houses were not damaged, but the evacuation was a precautionary measure. The government has also assisted the affected people financially to meet their food needs.

Official reports indicate that two people died and 21 were injured. Approximately 500 houses have been reported either damaged or destroyed on all the three main islands; most of the belongings damaged were mattresses, bed sheets, kitchen utensils and electrical appliances such as cookers, washing machines and other appliances. According to the Port Authority assessment, 50 fishing business have been affected from Mahé, Praslin and La Digue Islands. The damages caused are to different fishing items and equipments and these depend on the fishing methods of the individual fishermen.

Red Cross / Red Crescent Action

The Seychelles Red Cross Society is the only humanitarian organization assisting the authorities in responding to the needs of the most vulnerable; they have been able to respond using available resources and assistance provided by the local community.

On the 26 December, all available volunteers and trained Disaster Response Team Members were alerted and placed on standby upon receipt of the alert from the meteorological office. The Executive Committee and

Aerial view of flooding in Mahé, Victoria Island.

Seychelles Red Cross Society Disaster Response Team members were deployed to assist the affected communities.

**Asia: Earthquake and Tsunamis; Revised Preliminary Appeal no. 28/2004;
Operations Update no. 12: Focus on Eastern Africa Region**

members of management set up a committee to put contingency plans in place to respond to the situation. The Praslin Branch volunteers has been assisting the authorities to evacuating people who were on the beaches, communicating with people living on low land areas and providing ambulance services. They also assist in removing debris on the roads and in houses. They also send a local appeal for non food items which have been distributed to the affected people. The La Digue Branch volunteers have also been involved in working closely with the emergency brigade in removing debris on the main roads. They assisted the Ministry of health in the relocation of the La Digue hospital. The national society held a press conference and the President of the Seychelles Red Cross made a local appeal to the community to donate non food items such as mattresses, bed sheets, and kitchen utensils. Red Cross volunteers were part of the post disaster stress management committee set up by the Ministry of Social Affairs and was also providing psychological assistance for those in need.

The local response has been good and most families have received assistance. The national society has received and distributed mattresses, bed sheets, kitchen sets and tinned fish donated by the local community to 35 to 40 families but there are 60 families yet to be assisted by the national society. Fishermen affected require support to recover their livelihoods. The Seychelles Red Cross headquarters office in Mahé was flooded reducing the ability of the national society to coordinate and communicate, there were difficulties faced in assessment and coordination with national authorities.

The Red Cross have been reporting and updating the PIROI ² and the RDN on the situation and have also been in constant contact with the branches.

The national society met with the Rotary Club of Victoria and the Sri Lankan Consulate to discuss an assistance strategy to assist the victims of tidal waves in Sri Lanka. At the press conference an appeal for donation of clothes was made. For three consecutive days, volunteers and some expatriates living in Seychelles, especially Sri Lankans, Kenyans and Taiwanese were also engaged in collecting, sorting and bailing of cloths which will be sent to Sri Lanka.

Severe weather events have been on the increase in the Seychelles in recent years and the cyclone season is likely to bring further severe storms, landslides and flooding. The national society needs to assess and plan its disaster preparedness programme, conduct further disaster management training and pre position relief items.

Plan of Action

The Federation will assist the Seychelles Red Cross in their second phase relief operation for tsunami and landslide affected families through the provision of non-food items; kitchen sets, mattresses and fishing items to assist fishermen regain their livelihood. Capacity building and disaster preparedness activities will include the restoration and equipping of the national headquarters offices that were flooded, equipping volunteers, pre positioning of relief items, a lesson learning review, a national VCA exercise and disaster management and psychological support training.

Kenya

Operational Developments

Two people are known to have died in Watamu and Malindi along the Kenyan coast. Initial reports also indicate that more than 200 fishermen have lost their boats and other property. In Mombasa where thousands of charter-tourists spend their holidays, beaches have been closed as a precautionary measure.

Red Cross / Red Crescent Action

The Kenya Red Cross DP/R Director was in Mombassa to assess and coordinate the initial response. Branch coordinators in Kwale, Malindi and Lamu were also involved in contacting and assisting local communities.

² PIROI – Indian Ocean Regional Intervention Platform (French acronym)

Tanzania

Operational Developments

Ten persons drowned while swimming along the beaches near Dar-Es-Salaam.

Madagascar

Operational Developments

The Malagasy Red Cross assessment team returned from a four-day mission; their report has not yet been issued. During the assessment, the team distributed some basic assistance items and visited the branches en route. Some humanitarian agencies are concerned that earlier media reports about the number of affected may have been inflated.

Mauritius

Operational Developments

Flooding occurred Rodrigues Island; boats were damaged on Mauritius and Rodrigues.

La Réunion

Operational Developments

Twenty boats suffered damage in the ports of Ste. Marie and St. Gilles.
