## BANGLADESH: FLOODS- REVISED APPEAL

28 September 2004

The Federation's mission is to improve the lives of vulnerable people by mobilising the power of humanity. It is the world's largest humanitarian organisation and its millions of volunteers are active in over 181 countries.

### In Brief

**Appeal No. 15/2004; Operations Update no. 5; Period covered: 8-21 September 2004; Appeal coverage 160%; Revised Appeal coverage: 89.5%;** ([click here to go directly to the attached Contributions List, also available on the website](#)).

**Appeal history:** Launched on 26 July 2004 for CHF 4,350,000 (USD 3,440,095 or EUR 2,844,997) to assist one million beneficiaries, the appeal was revised on 6 September 2004, now seeking to assist 1,407,500 beneficiaries (281,500 families) for six months.

**Outstanding needs: CHF 737,000 (USD 584,239 or EUR 474,980)**

**Related Emergency or Annual Appeals: Annual Appeal 01.56/2004**

### Operational Summary:

The country is still recovering from the July/August floods. There was further flash flooding last week in the south-east and central part of the country due to renewed heavy rainfalls. The capital Dhaka experienced its heaviest rainfall in 50 years with 341 millimeters falling on 12 September alone. Following the most recent rains, river embankments at Feni and Comilla burst, displacing thousands of people from their homes. At least 30 people died during the current onslaught of flash floods. According to the Flood Forecast Warning Centre (FFWC) bulletin of 20 September the prevailing rain-fed flood situation in southwestern districts may remain unchanged and flash flood situation in Comilla is likely to improve. All the rivers except one are flowing below danger levels.

The Bangladesh Red Crescent Society (BDRCS) has allocated an emergency grant to the Feni district branch to provide emergency assistance. BDRCS district branches are also providing emergency assistance to the affected population from their own limited resources. Two joint BDRCS/Federation assessment team returned on 21 September after conducting rapid damage and need assessment in the areas affected by the current flash floods. On 22 September the Federation allocated CHF 44,000 for providing immediate assistance in the above districts affected by the current flooding.

All International Federation assistance seeks to adhere to the [Code of Conduct](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response](#) in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in this or other countries, or for a full description of the national society profile, please access the Federation's website at <http://www.ifrc.org>

## Background

The monsoon arrived early in June. Persistent and exceptionally heavy rainfall augmented by torrential river flows (coming from Nepal, India and Bhutan) and accelerated snow and ice melts from the Himalayas, contributed to severe flooding. A total of 43 of Bangladesh’s 64 districts have been affected. Thirty six million people (over 25 percent of the population) have been affected by this disaster and over 700 were killed.

There has been further flash flooding in the past week due to exceptionally heavy rainfall in the south-eastern and central parts of the country. Dhaka has experienced its heaviest rainfalls in 50 years with 341 millimetres falling on 12 September alone. The rains led to embankments at Feni and Comilla bursting, displacing thousands of people.

BDRCS has allocated emergency grant of Taka 30,000 to the Feni district branch to provide emergency assistance to affected people. BDRCS district branches are also providing emergency assistance to the affected population from their own limited resources. Two joint BDRCS/Federation assessment teams returned on 21 September after conducting rapid damage and needs assessment in the areas affected by the current flash floods. The assessment team’s reports confirm severe flash flooding in nine south-eastern districts. The Federation allocated CHF 44,000 on 22 September for the provision of immediate assistance in the nine districts.

*RCY Volunteers cooking food for distribution among people affected by current flash floods in Noakhali on 19 September*

## Current Situation

<b>Total Affected Districts</b>	43
Number of Affected Upazila (Region)	266
Number of Affected Unions	2,492
Affected Families	7,468,128
Affected Population	36,337,944
Reported Deaths	747
Number of Livestock Death	15,143
Crops Destroyed	1,605,958 acres
Crops Damaged (Partially)	1,038,176 acres
Houses Destroyed	894,954
Houses damaged (Partially)	3,389,101
Road Network Destroyed	14,271 km
Road Network Damaged (Partially)	45,528 km
Bridges and Culverts Damaged	5,478
Embankment Damaged	3,158 km
Schools Destroyed	1,295
Schools Damaged (Partially)	24,276

The country is still recovering from heavy floods of July/August floods in July and August. Apart from the recently affected districts, the situation continues to improve with water receding. The FFWC bulletin of 21 September states that the prevailing rain-fed flood situation in south-western districts may remain unchanged and the flash flood situation in Comilla is likely to improve. All rivers except one are flowing below danger levels.

The security situation has improved after earlier disturbances following the 22 August bombings at a political rally in Dhaka. However the political situation remains tense. Multi-sector efforts continue to bring relief aid and rehabilitation for flood-affected people despite the in the political and civil disturbances.

## Operational developments

BDRCS continues to maintain close contacts with all its district branches. With the Federation it has established a taskforce in order to further strengthen the operational activities of BDRCS national headquarters (NHQ) during the monsoon season. The emergency flood relief control room at BDRCS NHQ was opened for better coordination and information sharing with the district units and other stakeholders.

Accompanied by the BDRCS relief coordinator, the relief delegate is traveling regularly to flood-affected areas to assist Red Crescent branches to identify beneficiaries, advise on storage facilities and supervise distribution of the relief items.

## Red Cross and Red Crescent action - objectives, progress, impact

Since the beginning of the flood season, BDRCS has distributed relief goods from its limited supply of buffer stocks and local fundraising to more than 12,000 families. Distributions are made among the most vulnerable people severely affected by the floods. The local Red Crescent branches along with community-based disaster preparedness (CBDP) squad volunteers have assisted the affected people in shifting to safer ground, and also provided limited emergency relief through local fundraising for immediate distribution among the affected population. The national society and the Federation have constantly monitored the flood situation.

The Federation was the first agency to launch an international appeal on 26 July. An amount of CHF 4,350,000 was initially sought to provide food and non-food items, medical services and agricultural input for 200,000 of the most vulnerable families (one million beneficiaries). There has been an extraordinarily generous response with CHF 6,314,000 received to date. This has included contributions from the European Commission Humanitarian Office (ECHO), the Kuwait Red Cross, and the governments of Australia, Belgium, Canada, Finland, Germany, Japan, New Zealand, Norway, Switzerland, Sweden and United Arab Emirates. In addition, there have been generous and rapid responses from sister national societies and contributions from local major banks -HSBC and Citicorp. There have also been contributions from the commercial sector including KAFCO, Malaysian Airways and other multinational companies, as well as members of the public and expatriate community. This following revised appeal reflects the strong response. A total of 1,407,500 beneficiaries will be assisted, up from the originally targeted one million.

**Operation Objective: To meet the urgent needs of 1,407,500 unassisted and displaced beneficiaries severely affected by the ongoing monsoon season who were living in their flooded homes, river embankments, roadways and chars through provision of basic food items, family kits, medical services, small scale agricultural support and low cost housing during the rehabilitation phase.**

### Emergency Relief Phase

**Expected Result 1: 188,250 displaced and unassisted families to receive emergency complementary food ration for one month within the coming weeks.**

Through this appeal, BDRCS and the Federation intends to assist 188,250 most vulnerable displaced families by distributing emergency food supplies of 3,765 metric tonnes (MT) of rice (including 945 MT allocated by the World Food Programme<sup>1</sup> (WFP)), 705 MT of dhal (lentils) and 282 MT of cooking oil for an initial period of one month. Each affected family will receive a food ration consisting of: 20 kg of rice, 5kg of dhal (lentils) and 2 litres of cooking oil.

#### **Activities :**

- Identification of most vulnerable beneficiaries using the ‘BDRCS Disaster Relief Manual’ with special emphasis on gender and disability issues.
- Local procurement of 2,820 MT of rice, 705 MT of dhal (lentils) and 282 MT of cooking oil.
- Dispatch and transportation by BDRCS to the final destination.

*Beneficiaries wait to collect relief goods in Nilphamari*

<sup>1</sup> 47,250 families will receive 20 Kg of rice each from WFP allocated rice

- Assist BDRCS NHQ provide logistic, technical and administrative support by upgrading the basic office and communication equipment of its relief department.
- Assist BDRCS strengthen its management of warehouses and distribution structures, especially at unit level.
- Distribution by trained Red Cross youth (RCY) and CBDP volunteers to pre-determined beneficiaries.
- Regular detailed reporting of the distribution.
- Ongoing monitoring and technical advice by BDRCS NHQ and the Federation.
- Assist BDRCS strengthen its human and material resource capacities in the 43 district branches and NHQ as necessary for the operation.

### **Progress/Achievements**

Suppliers completed the delivery of rice and dhal (lentils) and oil direct to the BDRCS district branches. Distribution of ECHO-supported food items for 60,000 families commenced on 5 September and is expected to be completed in two weeks time (approximately 5 October). Distribution has been completed in the three northern districts of Lalmonirhat, Nilphamari and Rangpur and will be completed in Bogra and Sirajganj by the end of September. Among the beneficiaries are large numbers of the handicapped and elderly. RCY have been enthusiastic participants in the relief operation and made a significant contribution. To date food items have been distributed among 27,000 families.

The procurement process of food items for additional 75,000 families is underway. An order will be placed for the purchase of 1500 MT of rice, 375 MT of dhal (lentils) and 150 MT of cooking oil, on receiving approval from International Federation of Red Cross and Red Crescent Geneva procurement department.

### **Impact**

The distribution of ECHO food items among the most vulnerable families severely affected by the floods supplement them with the necessary food supplies to meet their immediate requirement before the next harvest.

Many positive comments were received on the quality of foodstuffs. Visibility for ECHO and BDRCS has been good.

### **Constraints:**

The major constraint remains the availability of family kits, which have to be distributed along with the food items, though this problem is now close to resolution.

The field coordinator reported that suppliers had under-supplied rice by 0.5 to one kg per 85 kg bag. This issue is being taken care of by the Crown Agent and the supplier was informed accordingly.

The distribution schedule has been disrupted by last week's bad weather and the ongoing tense political situation and *hartals* (nationwide strikes) in the affected areas to some degree.

### **Expected Result 2: 81,128 flood-affected families received family kits and emergency BDRCS buffer stock replenished over a period of four months.**

Eighty-one thousand one hundred and twenty-eight family kits will be distributed among the most affected vulnerable families (75,000 of them are also beneficiaries of the food items).

### **Activities:**

- Local procurement of 81,128 family kits.
- Storage at BDRCS warehouse and transportation to the final destination.
- Distribution by trained RCY and CBDP volunteers to the predetermined beneficiaries.
- Regular detailed reporting of the distribution.
- Assist BDRCS and the Federation replenish buffer stocks that were used in initial relief efforts through local procurement of 15,000 family kits and 20,000 blankets.

- Ongoing monitoring and technical advice by BDRCS NHQ and the Federation.
- Implement training as necessary for the operation.
- Logistical support to BDRCS.
- Purchase three Isuzu eight-tonne trucks for the transportation of relief goods, and two additional field pick-ups vehicles for monitoring and evaluation, and effective emergency disaster response.

### Progress/Achievements

To date suppliers have delivered 25,128 family kits (17,128 ECHO and 8,000 JICA supported family kits), and are expected to deliver the remaining 5,000 by 26 September. All received family kits have been sent to the affected areas for distribution. A total of 23,000 family kits (15,000 ECHO and 8,000 JICA supported family kits) had been distributed in the field up to 20 September.

The procurement process of the 30,000 family kits is underway. The order will be placed for the purchase of the kits after approval from the Geneva procurement department. The process for the procurement of the remaining 22,000 family kits for distribution together with a further 15,000 family kits and 20,000 blankets for replacement of buffer stock will be initiated soon.

### Impact

Family kits have multiple impacts on the affected families who have lost all their possessions – they provide the most necessary non-food items to help restore life to normality after the disaster, and also provide valuable psychological support.

### Constraint

The major constraint is the availability of the family kits which have to be distributed along with the food items. The current supplier is unable to deliver more than 5,000 kits per week due to disruptions caused by last week's bad weather and packaging issues.

### Expected Result 3: Provide basic medical services within the first two months of the operation to the flood-affected population, limiting possible outbreaks of waterborne diseases.

A total of 281,250 people (56,250 families), many of them also beneficiaries of the food and non-food programmes, are expected to benefit from this programme.

*Doctor attending a child suffering from skin disease at Sunamganj - 18 September*

### Activities:

- Total of 70 mobile medical teams would be deployed in each of the targeted districts.
- Each team to be composed of a doctor, a paramedic and two RCY volunteers (one male and one female) and equip them with necessary basic medical equipment.
- Procurement of basic drugs for treatment of waterborne and related diseases. BDRCS will purchase the medicines through WHO-nominated pharmaceuticals companies based in Dhaka.
- The medical service, focusing on waterborne diseases in the disaster areas, will be conducted in parallel with the food /non-food distributions.

### Progress/Achievements

The overall health situation in the flood-affected areas is improving though there been some new cases of waterborne diseases. The lack of clean drinking water, hygiene inputs, and adequate sanitation facilities for the affected population are still a concern. However no major epidemics have been reported to date.

As reported in Operations Update 4, 10 medical teams were deployed by BDRCS in the most affected areas of Dhaka city and adjoining areas for two weeks. The medical teams treated 11,007 patients (3,528 male, 4,092 female and 3,387 children under five) suffering from diarrhoea, and other waterborne diseases/conditions.

A total of 60 medical teams (32 supported by ECHO, 12 by JICA and 12 by AMCROSS) have been deployed in 22 flood-affected districts. A total of 48 of these were deployed during the period 13-18 August and 12 teams on 8 September. The procurement of medicines, medical equipment and visibility items, banners, flags, aprons etc for the 60 teams has been completed.

All medical teams have been provided with essential drugs and basic equipment (blood pressure machine, stethoscope, torch, hurricane lamp, some surgical instruments etc.) The teams report a heavy flow of patients and each team treated approximately 100 people a day. To date, the 60 medical teams have treated 142,669 patients (41,867 male, 66,686 female and 34,116 children under five) suffering from diarrhoea, dysentery, skin and other waterborne diseases. The medical teams are working in close cooperation with other ECHO partners, OXFAM and Action Aid in Kurigram, Gaibandha and Jamalpur.

### **Impact**

Most of the BDRCS medical teams have been deployed in remote areas affected by the floods. The provision of medicines and treatment is contributing to alleviating of the suffering of the affected population. The efficiency of the operation has been improved through greater coordination with ECHO partner organisations in the field

### **Constraints:**

Some of the medical teams are facing access difficulties to remote areas.

### **Rehabilitation Phase**

**Expected Result 4: To provide four months into the operation, agricultural inputs to up to 30,000 affected families who have access to land.**

At the end of monsoon season, once water levels recede and the affected population are able to return to their homes, basic agricultural support needs will be provided. This will involve the provision of two types of seeds (paddy rice and vegetable) to allow the potential beneficiaries to plant crops at the suitable time of year. This component is very important, as the floods have damaged one million acres of crops and seedbeds while a further 1.6 million acres of arable land has been damaged.

### ***Activities***

The same principle will apply as with the selection of beneficiaries for the family kits (many of them also beneficiaries of the food and non-food programmes) are expected to benefit from this programme. Beneficiaries will be identified through field surveys (in accordance to the *BDRCS Disaster Relief Field Manual*) carried out by Red Crescent volunteers among the severely affected population.

- Local procurement of up to 30,000 sets of agricultural seeds (vegetable/rice seeds).
- Storage by BDRCS and transportation to the final destination.
- Distribution by trained RCY and CBDP volunteers to the predetermined beneficiaries.
- Provide detailed reporting of the distribution.
- Ongoing monitoring and technical advice by BDRCS NHQ and the Federation.
- Implement training as necessary for the operation.

### **Progress/Achievements**

Contact has been made with the government seeds department in order to get technical advice for the types of seed needed in the flood-affected areas. The tendering process for the procurement of 30,000 sets of seed (paddy rice and vegetable) will start next week. Field coordinators have been notified to commence the beneficiary selection process in five northern districts supported by ECHO.

**Impact**

NA

**Constraints:**

It is anticipated that the price of seed may be higher than initially planned due to increased demand in-country by various stakeholders involved in the rehabilitation phase.

**Expected Result 5: After four months of the relief operation, provision of traditional thatched housing materials for 1,000 beneficiary families severely affected by the floods and river erosion.**

The rapid onset of flooding and river erosion washed away many families' houses and most basic necessities. The provision of 1,000 traditional housing materials provided to the severely affected families will ensure that some basic needs for housing are met.

**Activities**

As mentioned above, the same principle will apply as with the selection of beneficiaries. Beneficiaries will be identified through field surveys (in accordance to the *BDRCS Disaster Relief Field Manual*) carried out by Red Crescent volunteers among the severely affected population.

- Supply families with materials to construct 1,000 thatched traditional dwellings.
- Transportation of materials to the final destination by BDRCS.
- Distribution by trained CBDP volunteers to the predetermined beneficiaries.
- Provide detailed reporting of the distribution.
- Ongoing monitoring and technical advice by BDRCS NHQ.

**Impact**

N/A

**Constraints:**

N/A

**Federation Coordination**

The BDRCS and Federation delegation continue to liaise with governmental, local and international organisations, UN agencies and NGOs, regularly attending the disaster emergency response group meetings in order to coordinate relief interventions among partners and avoid duplication of assistance. The BDRCS and Federation delegation are also liaising closely with the Federation's South Asia regional delegation. The Head of Delegation regularly visits donor missions and UN agencies to update them on Federation/BDRCS activities and has made several field visits with national society governance and major donors.

A very successful breakfast operational flood briefing for 24 donor ambassadors and high commissioners was held on 22 September. The briefing included a thorough question and answer session. The event was covered by the Regional Information Manager and a Reuters correspondent.

**National Society Capacity Building**

With its extensive experience in responding to flood emergencies, BDRCS has developed its operational capacity through a number of extensive disaster relief and preparedness programmes over the last few years. This relief operation will further strengthen the capacity of national society in order to implement the four-year disaster management strategy particularly for community-based disaster management (CBDM) programme for floods. The national society will hopefully continue to receive support for its long-term strategic development programs in the field of disaster preparedness and response. Funding has already been secured for implementation of the national society's new disaster management strategy in relation to the flood prone districts in Bangladesh.

**Monitoring and Evaluation**

The Federation and BDRCS receive reports from the field and undertake visits on a regular and/or spot-check basis. This helps identify and, where possible, resolve any problems. Regular and ad hoc reports provides necessary information on the progress of the operation, changes in the situation, and any problems, constraints, or unmet needs.

The responsibility for day-to-day monitoring of the operation rests with BDRCS, primarily at branch level but supervised closely by BDRCS relief department from NHQ, with the joint BDRCS/Federation monitoring teams regularly visiting the affected districts. In addition, there are some specific activities and indicators to monitor and evaluate the overall effectiveness of BDRCS/Federation flood relief activities:

- End-use monitoring through household level visits and interviews to be carried out by BDRCS volunteers.
- Monitoring and final evaluation activities providing information on the effectiveness of the programmes.
- Clearly documented criteria as specified in the '*BDRCS Disaster Relief Field Manual*' regarding the selection of beneficiaries.
- Distribution of relief items monitored to ensure that targeting criteria is respected.
- The situation in the field will be further evaluated through regular Federation Operational Updates.
- Conduct impact study (lessons learned workshop) and evaluation.

BDRCS and the Federation delegate will participate in a 'real time' action learning exercise which is being coordinated by the South Asia regional delegation. The purpose of the study is to:

- Assess the extent to which previous investments in disaster preparedness, including the successful deployment of BDRCS medical teams, have increased the national society and community capacity to cope with disasters.
- Capture lessons learned and good examples from findings above and develop recommendations for development of future national society and community level disaster preparedness programmes to reduce vulnerability.
- Gather material suitable for external promotion and fundraising, and to feed best practices to the broader stakeholders.

**Communications – Advocacy and Public Information**

Visibility for the operation is issued through local media, the HSBC Bank website and international web links. Press releases on Red Cross/Red Crescent action are issued on a regular basis. Adequate visibility for donors and the Federation is ensured, including maintaining a high profile in international media. A media release was issued on the 22 September flood briefing for donor ambassadors and high commissioners.

**Budget summary**
