## ASIA: EARTHQUAKE & TSUNAMIS

24 January 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 181 countries.

### In Brief

**Revised Preliminary Appeal No. 28/2004; Operations Update no. 27; Period covered: 23-24 January 2005; Appeal coverage: 88.9%** ([Click here to view the provisional contributions list attached, also available on the Federation's website](#)).

#### Appeal history:

- Preliminary appeal launched on 26 December 2004 for CHF 7,517,000 (USD 6,658,712 or EUR 4,852,932) for 6 months to assist 500,000 beneficiaries.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 1,000,000.
- Revised Preliminary Appeal issued on 29 December 2004, for CHF 67,005,000 (USD 59,152,246 or EUR 53,439,988) for 2 million beneficiaries for 6-8 months.
- The Preliminary Appeal was originally launched titled "Bay of Bengal: Earthquake and Tsunamis". The title was subsequently changed to "Asia: Earthquake and Tsunamis" in the Revised Preliminary Appeal launched on 29 December 2004.
- Operations update No. 16 issued on 12 January 2005 revised the Revised Preliminary Appeal 28/2004 budget to CHF 183,486,000 (USD 155,286,000 or EUR 118,669,000) with programme extensions for Sri Lanka, Indonesia, the Maldives and East Africa.

#### Highlights of the Day:

- **The Indonesian death toll was revised upwards once more, with an addition of some 8,000 dead for a total of 173,981.**
- **The Spanish Red Cross water and sanitation ERU has produced 3 million litres of water in Meulaboh, Indonesia.**
- **Urgently sought for Indonesia: head of operations and programme coordinators for logistics, health and water-sanitation.**
- **WFP feeding close to 400,000 people in Indonesia.**
- **Urgent need for family tents in Sri Lanka.**
- **Finnish and Thai Red Cross senior officials meet to discuss possible areas of joint cooperation.**

All International Federation assistance seeks to adhere to the [Code of Conduct](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response](#) in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in these or other countries, or for a full description of the national society profiles, please access the Federation's website at <http://www.ifrc.org>

## Background

The magnitude 9.0 earthquake that struck the area off the western coast of northern Sumatra on Sunday morning, 26 December 2004, at 7:59 am local time (00:59 GMT) triggered massive tidal waves, or tsunamis, that inundated coastal areas in countries all around the Indian Ocean rim – from Indonesia to Somalia. Sri Lanka, the Indonesian province of Aceh, four states of southern India, the Maldives, coastal areas of Thailand, Malaysia, and Myanmar were the most severely affected. The earthquake epicentre was located at 3.30 N, 95.78E at a depth of 10 kilometres. The area is historically prone to seismic upheaval due to its location on the margins of tectonic plates. However, tidal waves of this magnitude are rare and therefore the level of preparedness was very low.

#### Summary of the human toll caused by the tsunami as of 23 January

Countries	Dead	Missing	Displaced	Homeless	Sources
Indonesia	173,981	7,249	n/a	617,159	Government
Sri Lanka	30,957	5,637	396,295	480,000	Government
India	10,749	5,640	647,599	20,000	Government
Maldives	82	21	21,663	n/a	Government
Thailand	5,354	3,113	n/a	n/a	Government
Myanmar	90	10	n/a	3,200	Government
Malaysia	68	50	n/a	4,296	Delegation
East Africa	314	n/a	52,000	n/a	Government
<b>Total</b>	<b>221,595</b>	<b>21,720</b>	<b>&gt;1,117,557</b>	<b>&gt;1,124,655</b>	

*Note: East Africa covers tsunami-affected countries of Kenya, Madagascar, Seychelles, Somalia and Tanzania.*

Thousands of staff, relief and medical personnel, and volunteers of the Red Cross and Red Crescent societies of the tsunami-affected countries have provided a vital initial response, in search and rescue, clean-up, providing temporary shelter and immediate relief assistance, emergency medical services, psychological first aid and tracing. It is estimated that over 5,000 Red Cross and Red Crescent volunteers and 76 relief and medical teams have been mobilized in the disaster-affected areas.

The Federation immediately launched a Preliminary Emergency Appeal on the day of the disaster with a focus on Sri Lanka, Indonesia and the Maldives. On 3 January 2005, the ICRC launched budget extensions additional to its 2005 Emergency Appeal for Indonesia and Sri Lanka. Along with initial support from the country and regional delegations, the Federation deployed within 24-72 hours three [Field Assessment and Coordination Teams \(FACT\)](#)

and 18 [Emergency Response Units \(ERU\)](#) in the sectors of water and sanitation, health care, aid distribution, telecommunications, and logistics/transportation to Sri Lanka, Indonesia and the Maldives.

A total of 77 relief flights have now arrived in the various affected countries and a further 31 flights are in the Federation relief pipeline, making a total of 108 relief flights coordinated through the Federation.

The Federation and the ICRC in Geneva are currently working on an organizational framework for Movement coordination in the tsunami operations. A note has been sent out to national societies and delegations on this today, for consultation. It is expected that the framework, which will set in place strong platforms for coordination, will be finalized shortly, and a final note will be sent out by the Federation and the ICRC next week.

## Operational Developments

### Indonesia

#### Overview

Indonesia's official death toll has been revised upwards once again, with the Ministry of Health now estimating that 173,981 people died in the disaster from the previously estimated 166,320. The Indonesian Red Cross (Palang Merah Indonesia/PMI) and other volunteers, as well as soldiers in Aceh, are still reported to be retrieving more than 1,000 bodies from the mud and debris daily.

Despite this, the government announced on Sunday, 23 January, that the emergency relief phase was drawing to an end, and that foreign military operations would be scaled back as a result. The Singaporean Army withdrew most of its troops from Aceh on Saturday and Malaysia has also started to pull back its military personnel. The expectation is that aid organizations will be able to take up the slack in the distribution of food and other relief items – especially as the more isolated areas are progressively opened up to ground and sea transportation.

The WFP announced that it is now feeding close to 400,000 people and is in the process of positioning a floating warehouse off the west coast of Aceh. A 3,000-tonne ship with dedicated landing craft, loading facilities and enough supplies of rice, noodles and biscuits to feed survivors for a month was due to arrive today, 24 January. PMI, supported by the Federation, is working in close coordination with WFP on relief food requirements and will be complementing the WFP programme by filling supplementary food requirements. Overall, the focus of the relief effort is beginning to shift towards reconstruction and in helping people regain their livelihoods, although relief obviously remains of primary concern. Refugees have said in recent interviews that they are anxious to get back on their feet and resume a semblance of normal life.

In addition to the human loss, the tsunami caused USD 675 million in damage to Indonesia's environment by battering coral reefs and mangroves and washing away farm land, according to the UN Environment Programme (UNEP). In general, there is still very little economic activity, apart from local markets and some shops, which have re-opened. There has been little reconstruction – with the priority on cleaning up hospitals, schools and other basic infrastructure. Local authorities – what is left of them – are focusing on providing a clearer picture of the situation with regard to internally displaced persons (IDPs), in order to feed into the overall government plan for rehabilitation and reconstruction, and on reviving the economy. It is becoming apparent that a number of communities situated inland have also been affected by the disaster, due to the destruction of roads, thereby cutting off their access to markets. Most local people did not have any insurance. To get things moving, some aid groups are now providing cash for work programmes, focused on the clean-up. Mercy Corps is looking for ways to help people restart businesses by offering loans and other forms of help. One of their first big projects will be the reopening of a damaged brick factory – likely a much-needed commodity as people begin to rebuild.

Reports of psychological trauma among survivors – most particularly among the estimated 250,000 displaced children – are becoming more frequent. People are having trouble sleeping, remain frightened and are showing signs of 'survivor guilt'.

### **Coordination**

On Saturday, the Federation, ICRC and PMI leadership in Jakarta met to discuss the Red Cross and Red Crescent Movement's plans, as the immediate emergency response moves into ongoing relief and rehabilitation. The meeting planned for Monday 24 January with the Indonesian Ministry of Planning, had to be postponed due to illness on the part of the PMI Chairman.

On Tuesday 25 January, the Federation is organizing a coordination meeting with the various PNSs present in Indonesia.

### **Security**

A security assessment has been conducted in Lam No by PMI, Federation and ICRC representatives, following a recent shooting incident involving IDPs. It was determined that the risk to PMI volunteers and Federation delegates remains low, and a cautionary 'red' zone has been defined. PMI/Federation relief activities will continue in a 'green' zone, which includes the current area of operations. This establishment of a security zone is not impeding ongoing relief activities, with PMI and Federation operations rapidly returning to normal.

### **Red Cross and Red Crescent action – progress/achievements, impact, constraints**

Four weeks after the tsunami, the RCRC Movement (PMI together with ICRC, the Federation and various PNSs) is still involved in a range of activities, including: evacuation, relief distribution, health services, restoring family links, and the provision of shelter, clean water and sanitation. Donations from the local community are still flowing into PMI National Office, reaching a total of USD 2,164,433 as of 18 January.

The Geneva FACT officer arrived in Banda Aceh on 23 January and promptly continued on to Lam No with the Banda Aceh operations coordinator and logistics coordinator to plan for expanded relief activities in that area. Three Canadian Red Cross personnel have arrived in Banda Aceh, and include two relief delegates and a logistics delegate. One of the relief delegates will bolster Banda Aceh coordination activities, and the second relief delegate is being deployed to Lam No on Monday, 24 January. The logistics delegate has been assigned to the operational base at Meulaboh. A Swiss Red Cross delegate who also arrived in Banda Aceh on 23 January will join the logistics team there.

The advance team of Federation delegates from the British Red Cross in Meulaboh has secured a residence and an administrative space, and the Meulaboh office is now operational. Standard wireless phone communication on the GSM and CDMA 2000 networks, as well as email exchange, has been working over the past three days. The wireless phone systems are already starting to get congested, and email communication requires a Satphone connection.

**Overall Goal: Up to 100,000 internally displaced and otherwise affected families (approximately 500,000 people) in western Aceh receive adequate and timely emergency humanitarian assistance over the next six months.**

**Objective 1 (emergency relief): Basic supplementary food and non food needs of the 500,000 IDP (Internally Displaced People) and most vulnerable beneficiaries are met so that they can start rebuilding their future.**

### **Progress / Achievements**

On Friday, 21 January, PMI distributed some 6,480 packages of the 20,000 special *Eid al-Adha* packages containing clothing for prayers, in honor of this important religious holiday. The total number of relief packages distributed in the week leading up to 18 January is estimated by PMI at 100,000 or 100 tons.

### **Meulaboh**

The American Red Cross relief delegate based at Banda Aceh returned on 23 January from a 36-hour visit to Meulaboh. During her time there, she confirmed the logistical set-up regarding the relief operation with the two newly arrived Spanish Red Cross relief delegates now based in Meulaboh.

It was noted that the PMI volunteers are currently registering beneficiaries' family names and number of members living at the IDP camps in Meulaboh. When this process completed, their intention is to continue into the outlying areas beyond the town, as long as the security constraints imposed by the Indonesian Army are eased.

### Teunom

Similar to the PMI volunteer initiative in Meulaboh, PMI volunteers in Teunom are going out into the communities surrounding Teunom to register family names and number of members per family. They report that 18 of the 28 villages surrounding Teunom have been severely affected by the tsunami.

The PMI/Federation team in Teunom has secured warehouse space, and additional trucks for relief supply distributions where local roads are passable.

#### Helicopter flights 22 January 2005

Aircraft	Destination	Cargo
Sykorsky	Teunom & Meulaboh	American Red Cross relief coordinator, 2 Rubb Hall construction specialists, 3 PMI doctors; 1 doctor to Teunom & 2 doctors to Meulaboh
	Calang	Tarpaulins, kitchen sets, jerry cans and 6 PMI volunteers on rotation
Bell 212 #1	Lam No	PMI/ICRC/Federation security assessment personnel and relief supplies: tarpaulins, kitchen sets, jerry cans
	Lam No	Relief supplies: tarpaulins, kitchen sets, jerry cans
Bell 212 #2	Calang	Relief supplies: tarpaulins, kitchen sets, jerry cans

#### Helicopter flights 23 January 2005

Aircraft	Destination	Cargo
Sykorsky	Lam No	Relief supplies: tarpaulins, kitchen sets, jerry cans plus 15 PMI volunteers on rotation
	Lam No	Relief supplies: tarpaulins, kitchen sets, jerry cans and family kits
Bell 212 #1	Teunom	Relief supplies: tarpaulins, kitchen sets, jerry cans plus 1 PMI relief coordinator
	Lam No	Federation security assessment team of 3
	Calang	Relief supplies: tarpaulins, kitchen sets, jerry cans
Bell 212 #2	Teunom Meulaboh	Relief supplies: tarpaulins, kitchen sets, jerry cans Pick up American Red Cross relief coordinator, Federation telecom delegate (who arrived Meulaboh via Medan) and 3 PMI volunteers on rotation
Helimission	Calang	Relief supplies: tarpaulins, kitchen sets, jerry cans
	Teunom	Relief supplies: tarpaulins, kitchen sets, jerry cans

#### Boat trips 22 January 2005

Water craft	Destination	Cargo
6 tonne	Teunom	950 blankets, 2,090 jerry cans, 400 hygiene kits, 400 kitchen sets

There were no helicopter or boat trips on Friday, 21 January, due to the Islamic *Eid al-Adha* national holiday and no boat movements today, 23 January.

### Impact

As of 18 January, PMI reports having distributed 450 tonnes of relief items to Meulaboh and the west coast, as well as Banda Aceh and its surroundings. There has also been some unrecorded food distribution, based on spontaneous donations, at the local level.

The bulk of PMI / Federation food distribution will cover supplementary food needs ([see Annex 1](#)), in coordination with WFP, who will be covering basic food needs.

A large shipment of family parcels is currently in the Federation pipeline and will be getting to beneficiaries later this week.

### **Constraints**

Constraints in transportation, leading to difficulties in getting goods through the pipeline, are beginning to ease. In addition, recording of relief distribution - which has been hampered by difficulties in getting exact information from the field – is improving due to the arrival of a number of relief delegates now positioned in the main relief hubs along the west coast, and facilitated also by the communications set-up which is now operational.

**Objective 2 (logistics): PMI will have a strengthened supply chain capability and capacity to ensure timely transport of material and human resources to the areas of operation.**

### **Progress / Achievements**

#### ***Batam***

The C130 flew every day last week, with the exception of Friday 21 January. There were four rotations by Antonov to Medan, carrying relief goods. The C130 lease expires at the end of the month. Logistics have secured the use of another Anotnov for six rotations as from next week. The team is strengthening its capacity to receive increasing numbers of aircraft, working to secure further warehousing and sea transport capacity, through close collaboration with Maersk.

#### ***Medan***

Key activities included procurement and dispatch of four water tankers for French RC, receipt and dispatch of Spanish ERU water tankers and of Japanese ERU equipment to Meulaboh. A contract has been signed for use of a 650 m<sup>2</sup> warehouse.

#### ***Meulaboh***

The first of three Rubb Halls en route to Meulaboh arrived on a Unimog truck from Medan over the mountain road. A suitable location was identified for erecting this structure and the ground has begun to be flattened and graded for that purpose. The entire process is estimated to take about one week to complete, after which this Rubb Hall will be used to store relief supplies for the PMI/Federation activities based out of Meulaboh.

The Danish base camp has also arrived Meulaboh, by barge from Lhokseumawe, having been loaded at Batam Island onto 11 M6 trucks donated through the Norwegian Red Cross. The base camp will be set up in Meulaboh adjacent to the first Rubb Hall that is currently being erected.

Additional all-terrain (four-wheel and two-wheel drive) transportation is being requested to facilitate PMI volunteer movements in the Meulaboh area.

#### ***Teunom***

One of the two Rubb Halls en route by truck over the mountain road from Medan will be set up in Teunom, to increase warehouse capacity for relief operations being built up at this PMI/Federation operational base. The PMI/Federation team in Teunom has secured warehouse space, and additional trucks for relief supply distributions where local roads are passable.

#### ***Calang***

One Rubb Hall is being dispatched for installation at the end of next week.

#### **Other**

ICRC now has the use of a 17-seater aircraft and is organizing regular trips on the Jakarta-Medan-Banda Aceh-Meulaboh route, every second day.

**Impact**

A detailed supply and distribution plan to assist 22,000 affected families has now been developed. In addition, a finalized logistics assessment provides an overview of transport and logistics requirements. Based on this, relevant assets are being positioned to support the operation. Furthermore, shortfalls in the current pipeline against proposed distribution and local procurement activity have now been identified.

Procurement of food parcels for 22,000 families over six-month period has begun.

**Constraints**

Most relief goods are available in both Jakarta and Medan, however there is currently a lack of procurement support, that needs immediate reinforcements. There is still a need for additional logistics support (extended contracts in Batam, fleet manager in Medan, logistics coordinators in Medan and Banda Aceh, logistics delegate in Jakarta) to ensure smooth overall functioning of the operation.

Flooding on the Medan-Banda Aceh route halted the latest IOM convoy. Delays could be significant as a result.

**Objective 3 (health): primary health care service provided to the tsunami-affected communities and potential epidemics are prevented or adequately addressed.**

There have been no major disease outbreaks. The most immediate needs have been the treatment of wounds, often severely infected. Other most common complaints include: respiratory tract infections with a significant number progressing to pneumonia, diarrhoeal disease, malaria, as well as a significant and unexpected number of tetanus cases.

WHO and the Indonesian Ministry of Health have now established disease surveillance facilities and procedures, and there is some standardisation of treatment in place. The UNICEF / Ministry of Health measles vaccination programme is either ongoing or at planning stages depending on location. As well, a mapping exercise on which organisations are doing what and where has been completed. Sanitation issues remain of concern in some locations, namely Banda Aceh and within various IDP camps at most principal locations. Vector control measures are in place to some extent in Banda Aceh and Meulaboh. Clean-up operation by local authorities in Meulaboh is said to be impressive.

**Progress / Achievements****German Red Cross BHCU – Teunom**

This is located at the site of the previous primary health care centre and is serving a population of approximately 20,000 - however numbers fluctuate due to constant population movement. The BHCU originally reports seeing up to 180 patients daily through the outpatient department, however numbers are now falling as the situation normalizes. It is expected to reach pre-disaster numbers (70 – 100) quite quickly if there is no significant disease outbreak. Likewise numbers of patients admitted have fallen considerably (four patients on January 20). The BHCU is working in close collaboration with existing health centre staff, local authorities, military and other NGOs. PMI volunteers remain present, including some medical personnel, and are fully integrated into activities. A team change-over is imminent, with the arrival of new team of four medical personnel due in-country on 25 January. Swiss Red Cross delegates will remain.

**Japanese Red Cross BHCU – Meulaboh**

The Japanese Red Cross has continued to play a significant role in the general coordination of hospital activities in close collaboration with the authorities. As many other organizations have arrived on the scene, the Japanese Red Cross is focussing its activities on three areas:

- a) hospital activities, mainly surgical;
- b) mapping of surrounding villages in coordination with local authorities, identifying IDPs, giving basic health care if needed; and
- c) mobile clinics to IDP camps.

They are also assisting with the current measles vaccination campaign. In addition, the British Red Cross health delegate and a member of the Federation's office team in Meulaboh are supporting PMI's participation in the coordinated measles vaccination program.

A new camp for IDPs is currently being established at an old stadium, located approximately 16km out of town. This is to be a Red Cross and Red Crescent camp with full PMI support, health care provided by the Japanese Red Cross, and water by the Spanish Red Cross water and sanitation ERU. As of 23 January, 1,000 persons are reported to be on site and numbers are set to increase as authorities move IDPs from other smaller camps situated in public buildings in the town.

Logistics has been a significant weak point with this ERU. Most medical equipment and supplies were either lost or damaged. Once the Federation's logistics were up and running, they were able to quickly supply two emergency health kits and assist in locating some of the missing items. An additional seven tonnes of equipment arrived in-country and departed by truck from Medan to Meulaboh today.

A team changeover is in progress, as a result of the new 12-person team's arrival on 22 January. An additional four staff are scheduled to arrive on 27 January to assist in "additional duties" due to the "expanded role of the Japanese Red Cross".

## Impact

### Overview of Red Cross and Red Crescent Health Activities (25 January 2005)

Red Cross and Red Crescent	Communities served	Activities	Beneficiaries	Constraints / Comments
German Red Cross basic health care unit (BHCU) ERU (as from 10 January)	Teunom	<ul style="list-style-type: none"> <li>▪ Basic health care services</li> </ul>	<ul style="list-style-type: none"> <li>▪ Serving a population of 20,000</li> <li>▪ 180 patients / day (OPD) – cumulative (10-17/01): 1,018</li> </ul>	Team of 6, joined by Swiss Red Cross (2) on 16 Jan. + PMI volunteers
Japanese Red Cross BCHU ERU (as from 29 December with limited equipment)	Meulaboh + outlying communities (Aceh Barat, Nagan Raya)	<ul style="list-style-type: none"> <li>▪ Medical support to Cut Nyak Dhein hospital (ICU, ER, OT)</li> <li>▪ Needs mapping in outlying villages</li> <li>▪ Mobile health clinic to IDP camps</li> <li>▪ Measles + tetanus vaccination</li> </ul>	Up to 300 patients / day	Logistics have been difficult, with most medical equipment and supplies either lost or damaged.  Team change-over in process (24 January)
Norwegian Red Cross Hospital	Banda Aceh	Referral Hospital	100 patients / day	
PMI	Banda Aceh, Lam No, Calang, Simeulue  Meulaboh	<ul style="list-style-type: none"> <li>▪ Mobile health teams</li> <li>▪ Doctor working with BCHU + 30 PMI volunteers</li> </ul>	To be confirmed	8-12 teams operational at any one time.  Other teams deployed directly by PMI chapters to affected area.

### Overview of PNS Health Activity (as currently known)

The Red Cross and Red Crescent societies of France (in Medan and Meulaboh), Korea (in Meulaboh), Malaysia (in Banda Aceh), Singapore (in Meulaboh), Switzerland (in Teunom) and Turkey (in Banda Aceh) have all set up health facilities and are attending to the needs of the affected population.

### Constraints

Communication and travel have proven difficult, however this is now improving and the health coordinator (currently based in Medan), has been able to visit the various ERUs. The arrival of a PMI health counterpart, to work alongside the Federation's health coordinator, is imminent. PNS activity continues, but communication on arrival and activities is lacking at times.

**Objective 4 (water and sanitation): the spread/outbreak of infectious diseases is prevented through water and sanitation interventions.**

Water production and distribution is reaching optimum daily capacity, with the German, Spanish and French Red Cross societies' ERUs all functioning well and receiving needed material and transportation to ensure efficient distribution. A newly arrived Austrian/Swedish Red Cross ERU is currently being set up in Calang.

Sanitation is becoming the major challenge in various areas due primarily to:

- Poor site management at various IDP camps; and
- Lack of appropriate sanitation facilities.

This latter problem is proving difficult to resolve because of the high water table and the inappropriate location of many of the IDP camps, making the construction of latrines quite challenging. The situation is being addressed on a case-by-case basis.

**Progress / Achievements****Banda Aceh**

The 10,000-litre bladder for the PMI/Federation compound in Banda Aceh has been delivered and is expected to increase capacity for PMI volunteers' washing and drinking needs. The Austrian Red Cross water and sanitation team is installing the bladder and outfitting it with taps. A layer of gravel will be spread to improve the muddy ground area and increase absorbency for water usage around the taps.

**Meulaboh**

The British Red Cross water and sanitation delegate, who is part of the Federation's office in Meulaboh, has begun a plan of action to address sanitation concerns in the three main IDP camps. The Spanish Red Cross water and sanitation ERU at Meulaboh has achieved another milestone, with the distribution of safe water having today reached the three million litres mark. All five specialized water units are now in operation. The arrival of two water tankers from Spain will further increase the ERU's production capacity.

There has been some misunderstanding with the local water board regarding visibility, leading to the withdrawal of three trucks. The team leader is assessing the situation and discussing a possible resolution with the local authorities.

**Teunom**

The German Red Cross ERU is producing 35,000 litres of water for provision to the BHCU and the community. With the arrival of a much-needed extra hose, the team has been able to increase the volume of water drawn from source for treatment – which also saves on fuel and time. The team is currently checking on water pressure in order to set up more distribution points for the community.

**Calang**

On 23 January, 40 tonnes of equipment for the Austrian Red Cross and Swedish Red Cross water and sanitation ERU deployment to Calang were loaded onto trucks that travelled by barge to Calang, where the equipment will be used to start up the ERU's water processing for the local population. The trucks will support that operation. A four-person team from Austrian Red Cross was dispatched to Calang on 22 January, with gear to set up the planned operation base.

ERU team members have been dispatched to Lamno to assess the situation, following information that MSF may be leaving the area and are looking for water and sanitation replacements.

**Sigli / Salamanga**

Sigli is set up with a specialized water plant currently producing 70,000 litres for distribution, Salamanga is producing 90,000 litres of mass water are being produced. The four water tankers sourced through the Federation have arrived in Sigli and have been put into operation to distribute water to the IDP camps, along with two flat-bed trucks and the distribution of water bladders.

The French RC is currently rotating its team. Five of the eight members left on 23 January, with replacement members not due to arrive until the end of the month. The Jakarta Delegation water and sanitation coordinator travelled on 23 January to Sigli to review operations with the French Red Cross water and sanitation ERU.

### Other

Discussions are underway with the Malaysian Red Crescent on the possibility of using their Bahasa Melayu (Malay language)-speaking volunteers to work alongside the various ERUs and the Federation team, in order to alleviate some of the pressure on PMI and build Malaysian Red Crescent capacity.

### Impact

#### Red Cross Water and Sanitation Operations in Aceh province, 23 January 2005

Water and Sanitation ERU	Distribution / litres	Means of Distribution	Beneficiaries	Constraints / Comments
Spanish Red Cross (Meulaboh)	<ul style="list-style-type: none"> <li>▪ Up to 246,000 L water / day.</li> <li>▪ All 5 specialised water units in operation (23/01). Producing 40,000L</li> <li>▪ Team reached the 3 million L distribution mark on 23/01</li> </ul>	6 municipal trucks of 3,500t capacity; 1 UN truck of 7,000 L capacity; Arrival of 2 water tankers from Spain.	4,000 families + estimated 45,000 IDPs in 4 camps + specialized water to Japanese RC BHC team	Water capacity exceeds means of distribution
French Red Cross (Salamanga and Sigli)	90,000 L / day + 70,000 L per day	<ul style="list-style-type: none"> <li>▪ By tap and tanker truck. Four water tankers arrived (23/01) + 2 local-hire flat bed trucks</li> <li>▪ 20 x 3000l tanks to be used for distribution points</li> </ul>	7,500 IDPs (set to increase with installation of distribution points)	Requisition of material for latrines construction, coordinated through logistics.  Team in rotation. Only 3 members currently in place.
German Red Cross (Teunom)	35,000 L/ day	5,000 L bladder tank set up in town	To be confirmed	
Swedish / Austrian Red Cross (Calang)				Setting up as of 21 January 2005

### Constraints

Rotation of water and sanitation delegates is somewhat unpredictable and needs to be clearer. There also needs to be clearer coordination, as many PNSs are still arriving unannounced. This is causing congestion and confusion on the ground.

Communications in the field are improving, however there are still some dead spots for mobile phone coverage. There is insufficient Satphone support to delegates on field trips.

A water and sanitation PMI counterpart is expected to be assigned later this month.

**Objective 5 (telecommunications): fast and reliable means of communication is secured in the areas of the relief operation.**

### Progress / Achievements

Landlines are for the moment only available in Medan. Installation of landlines to Banda Aceh is expected to take two months, and there is no timeframe yet for landlines in Meulaboh.

Three CDMA office phones have been installed in the Federation's office in Banda Aceh and a number of CDMA office phones will also be installed in the Meulaboh sub-office.

The primary mobile network for the Federation is GSM, with GSM handsets being issued to all new incoming delegates in Jakarta. GSM phones are also available in the field.

For Internet access, wireless broadband is available in Medan and Banda Aceh. VSAT will be used in Meulaboh. Proposals from local satellite providers are being solicited. Radio VHF set-up is dependent on the acquisition of radio licenses.

### **Constraints**

Broadband and VSAT connections are not completely reliable, and therefore secondary connections are being investigated. The Federation's email system (ccmail) cannot use the CDMA connection over mobile lines. GPRS is being tested as a secondary connection in Medan and Meulaboh. A primary connection which supports ccmil must be available in each hub.

Only four to six Satphones (other than ERU equipment) are currently available for the operation. This means that not all delegates can be equipped with a satphone when going into the field. More satphones are being sought.

## **Sri Lanka**

### **Overview**

In a meeting brokered by the Norwegian Foreign Minister, the Liberation Tigers of Tamil Eelam (LTTE) have expressed a willingness to be included in a common programme with the government to provide relief to people affected by the tsunami. The official death toll from this disaster stands at more than 38,000 people; the tsunami hit large parts of the island's coastal belt, including areas in the northeast within the LTTE's control.

The economic impact on Sri Lanka in the vital area of tourism is expected to be significant. The tourism minister says visitor arrivals for 2005 are expected to be 20 percent below the original target of 600,000. In an effort to revive the tourist industry, the government has announced a USD 320 million 'bounce back' plan. Tourism is one of the country's key foreign exchange earners, accounting for about 50 percent of gross domestic product.

As the Federation's FACT scales down the relief phase of the operation, the recovery assessment teams (RAT) have begun compiling reports to identify priority programme areas for the next 12 months. Federation coordination with partner national societies (PNS) is important and structures are being put in place (including the rental of a larger office space) to ensure a synchronized approach to operations, together with the Sri Lanka Red Cross Society (SLRCS). The Federation is endeavouring to complement its relief efforts with the ICRC, which has a clear strategic plan in the northern and eastern parts of the country where the ICRC has its operational mandate.

For maps and reports on the general background of the disaster in Sri Lanka please refer to <http://www.lk.undp.org/ndmc/>.

### **Coordination**

There are currently 33 (multilateral and bilateral) PNSs operating in Sri Lanka. As outlined above, the Federation is looking for a building to accommodate its growing operations, and asking PNSs to consider sharing the space to ensure a smooth coordinated approach with the SLRCS. The Federation is helping to enhance capacity of the national society, stretched at this stage with the enormity of the operation. A new Movement cooperation delegate has recently joined the delegation to assist in this regard.

## **Red Cross and Red Crescent action - objectives, progress/achievements, impact, constraints**

**Overall Goal: Up to 40,000 families (about 200,000 people) in the south of the country receive immediate relief, shelter, health and care, and community support over the next six months.**

**Objective 1 (water and sanitation): Adequate sanitation and water supply provided to a selected number of temporary shelters/welfare centres, and water and sanitation systems to serve the affected population.**

### **Logistics**

There is a continued need for non-food relief items in the field with the American Red Cross ERU managing and distributing supplies while stocks are available. To manage demand, the Galle warehouse has hired an additional 15 trucks to assist with distributions in the Galle, Matara and Hambantota districts.

**Objective 3 (immediate livelihood restoration): The minimum livelihood requirements provided for up to 40,000 families (about 200,000 people) whose houses have been destroyed and have lost their belongings.**

### **Progress / achievements**

Along with the standard Federation non-food relief item kits (including blankets, jerry cans, kitchen sets, tarpaulins, mosquito nets and sleeping mats) distributed by SLRCS branches in Galle, food items (cooking oil, milk powder and tinned fish) have been provided by the Netherlands Red Cross to complement rations provided by the government.

There is still a high demand for kitchen sets, hygiene kits, tarpaulins, jerry cans, bed sheets, blankets and sleeping mats, all in the pipeline. Family tents are the most urgent need for affected people in need of temporary shelter as schools are scheduled to reopen in the coming days.

### **Impact**

Positive responses have been reported by the American Red Cross ERU from communities who have received relief items.

### **Constraints**

Relief kit packages received through the Federation have varied in quality which means that these goods cannot be distributed in the same geographical area. To ensure smooth distribution, it is important that donated goods (e.g. kitchen sets) contain the same number of items and are of comparable quality.

**Objective 4 (health): A constant, good level of health is ensured for up to 20,000 families (about 100,000 people) through prevention and basic health care, as well as health and hygiene promotion.**

### **Progress / Achievements**

The Norwegian Red Cross BHCU in the eastern coastal town of Ichtilampattai (district of Trincomalee) has treated some 900 outpatients in the last week, with 70 patients admitted and 16 maternity cases. Some 150-170 patients visit the clinic daily, attended by two Norwegian Red Cross personnel and one Tamil doctor assisted by two medical students.

The Swedish Red Cross will start a three-year primary health care programme in the district.

### **Constraints**

There is a lot of pressure on the Norwegian Red Cross ERU having to conduct both morning and evening rounds of the wards. There are no Tamil nurses available to work in the hospital making it difficult to communicate with the Tamil speaking segment of the population.

### **Capacity of the national society**

Ten district coordinating officers will be established in the SLRCS branches in severely affected areas as focal persons to ensure coordination of the operation at all levels. To complement their efforts a team will be established at SLRCS headquarters and be managed by a coordinator. The Federation is supporting the national society in building its capacity in order to cope with the magnitude of the operation. The SLRCS has engaged youth and

student volunteers in the distribution process, with female volunteers actively participating in the registration process.

### **Communications – representation, advocacy and public information**

Federation information delegates and the media department of the SLRCS continue to provide media coverage, photo exchange, stories and interviews to the local and international media.

## **Thailand**

### **Overview**

The latest official death toll, as of 23 January, is 5,374 (1,790 Thais, 1,789 foreigners and 1,795 unidentified), while there are 8,457 injured people (6,065 Thais and 2,392 foreigners) and 3,132 persons missing (2,122 Thais and 1,010 foreigners).

It was reported in various Bangkok daily newspapers that both the Ministry of Foreign Affairs and the Ministry of Information and Communication Technology plan to hold a tsunami meeting in Phuket on 28 and 29 January with the participation of 43 countries. The meeting will focus on the installation of a tsunami early warning system for the Indian Ocean and the western areas of Southeast Asia.

Italy's Foreign Minister visited Phuket on Saturday, 22 January, to discuss further assistance from Italy with the Thai Foreign Minister. The Italian media reported that Italy would donate THB 252 million (CHF 11,134,000) for recovery efforts following the tsunami disaster.

WFP announced it will provide THB 20 Million (CHF 615,592) in food aid to assist 8,000 children affected by the tsunami and 2,000 families of migrant workers in six affected Thai provinces. It is the first time WFP has provided emergency food aid to Thailand. WFP has opened a temporary office in Bangkok, serving as a base for relief operations in Southeast Asia.

The search for bodies and missing people has been renewed by three military teams comprised of more than 200 people with some sniffer dogs in three main areas in Phang Nga province. The teams will be concentrating on wrecked buildings and some parts of the mangrove forests.

### **Coordination / Cooperation**

The Federation continues in its role of coordinating support to tsunami-affected populations in Thailand and today held the first Interagency Working Group Meeting on psychosocial needs. As well as the Federation, the group included participants from USAID, WHO, UNICEF and CORRE. The working group agreed to map ongoing psychosocial activities in the region, to identify possible areas for coordination and identify existing gaps. The next meeting will be in two weeks.

The Bangkok regional delegation's disaster management advisor was invited to UNDP today to provide their tsunami task force with an overview of the Red Cross and Red Crescent Movement's response to the tsunami. The advisor emphasized the importance of community-based preparedness, particularly in warning dissemination.

Two Finnish Red Cross delegates met with Thai Red Cross senior officials on Thursday, 20 January, to discuss possible areas of joint cooperation for the rehabilitation of the disaster-affected village of Phang Nga. The Finnish Red Cross has also provided a scholarship to one of the Thai Red Cross relief staff to participate in an emergency response course to be held in Helsinki, Finland in late January 2005.

### **Red Cross and Red Crescent action - objectives, progress/achievements, impact, constraints**

The number of volunteers both in Bangkok and the affected areas will be confirmed by the Thai Red Cross in the near future. The total number of Thai and foreign volunteers at the Thai Red Cross Relief and Community Health Bureau is currently 9,764 persons. Cash donations to the Thai Red Cross Relief and Community Health Bureau, as of 23 January, is THB 151,521,757 (CHF 4,666,506).

The Thai Red Cross Fundraising Bureau, in cooperation with the 'Diplomatic Participants Committee 2004 – 2005' for the Thai Red Cross Society, will organize its traditional fundraising event entitled "Diplomatic Red Cross Bazaar 2005" which will be held on 29 January 2005. This international event will sell each country's handicrafts and products, and the income generated will support the Thai Red Cross Society.

## Outstanding Needs

### Human Resources

The recruitment of Federation delegates for Sri Lanka, Indonesia, Maldives and for the Federation's office in New York continues, and 22 posts remain to be filled, as detailed below. The recruitment of head of operations for Indonesia is extremely urgent. The recruitment for a logistics coordinator and logistics delegate for the Banda Aceh operations centre (with strong procurement skills and knowledge of Federation systems) is also an urgent priority.

Place of assignment	Positions to be filled
Sri Lanka	Logistics coordinator, organisational development delegate, recovery programme coordinator
Indonesia – Jakarta	Head of operations, logistics delegate, recovery programme coordinator
Indonesia – Banda Aceh operations centre	Programme coordinator, administration delegate, logistics coordinator, relief coordinator, relief delegate, health coordinator, water-sanitation coordinator, IT delegate, psychosocial delegate
Indonesia – Medan sub-office	Head of office, relief delegate
Indonesia – Meulaboh sub-office	Head of office, water-sanitation delegate, health delegate
Maldives	Construction delegate
New York	UN liaison delegate

### Relief Needs

The following table summarizes the major outstanding material needs in the affected countries under this Revised Preliminary Appeal. Any national societies wishing to contribute to the relief pipeline are kindly requested to contact the logistics department at the Federation secretariat in Geneva (contact details on Page 2 of this update).

Country	Major outstanding needs		
Indonesia	8,860 tarpaulin sheets	37,840 kitchen sets	24,635 family tents
	108,758 jerry cans	8 dispensary tents	60,000 baby kits
	62,500 hurricane lamps	77,334 length of rope	
Sri Lanka	73,200 jerry cans	20,000 cooking stoves	
	33,055 kitchen sets	22,000 mosquito nets	
	225,000 sleeping mats	200,000 women's underwear	
Myanmar	8,500 kitchen sets
