ASIA: EARTHQUAKE & TSUNAMIS

28 January 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 181 countries.

In Brief

Revised Preliminary Appeal No. 28/2004; Operations Update no. 31; Period covered: 27-28 January 2005; Appeal coverage: 100.7% ([Click here to view the provisional contributions list attached, also available on the Federation's website.](#))

Appeal history:

- Preliminary appeal launched on 26 December 2004 for CHF 7,517,000 (USD 6,658,712 or EUR 4,852,932) for 6 months to assist 500,000 beneficiaries.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 1,000,000.
- Revised Preliminary Appeal issued on 29 December 2004, for CHF 67,005,000 (USD 59,152,246 or EUR 53,439,988) for 2 million beneficiaries for 6-8 months.
- The Preliminary Appeal was originally launched titled "Bay of Bengal: Earthquake and Tsunamis". The title was subsequently changed to "Asia: Earthquake and Tsunamis" in the Revised Preliminary Appeal launched on 29 December 2004.
- Operations update No. 16 issued on 12 January 2005 revised the Revised Preliminary Appeal 28/2004 budget to CHF 183,486,000 (USD 155,286,000 or EUR 118,669,000) with programme extensions for Sri Lanka, Indonesia, the Maldives and East Africa.

Highlights of the Day:

- The Federation is recruiting for the following new positions in Sri Lanka: head of delegation, water-sanitation delegate, water-sanitation coordinator, field relief coordinator and disaster management delegate.
- The Sri Lanka field assessment and coordination team (FACT) disbanded today, handing over core functions for management of the relief operations in the country to the delegation.
- A relief coordinator has arrived and assumed duties in the Maldives this week.
- The Indonesian Red Cross has agreed to host the Red Cross and Red Crescent Movement's tsunami coordination meeting in Jakarta on 14-15 February.
- Sanitary conditions are said to be very poor in many of the IDP centres in Indonesia, as population numbers overwhelm the facilities available and many sites have no latrines. RCRC hygiene kits helping to compensate for short supply of soap and other basic hygiene commodities.

For further information specifically related to this operation please contact:

All International Federation assistance seeks to adhere to the [Code of Conduct](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response](#) in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in these or other countries, or for a full description of the national society profiles, please access the Federation's website at <http://www.ifrc.org>

Background

The magnitude 9.0 earthquake that struck the area off the western coast of northern Sumatra on Sunday morning, 26 December 2004, at 7:59 am local time (00:59 GMT) triggered massive tidal waves, or tsunamis, that inundated coastal areas in countries all around the Indian Ocean rim – from Indonesia to Somalia. Sri Lanka, the Indonesian province of Aceh, four states of southern India, the Maldives, coastal areas of Thailand, Malaysia, and Myanmar were the most severely affected. The earthquake epicentre was located at 3.30 N, 95.78E at a depth of 10 kilometres. The area is historically prone to seismic upheaval due to its location on the margins of tectonic plates. However, tidal waves of this magnitude are rare and therefore the level of preparedness was very low.

Summary of the human toll caused by the tsunami as of 27 January

Countries	Dead	Missing	Displaced	Homeless	Sources
Indonesia*	228,448	-	n/a	617,159	Government
Sri Lanka	30,959	5,644	396,295	480,000	Government
India	10,749	5,640	647,599	20,000	Government
Maldives	82	21	21,663	n/a	Government
Thailand	5,388	3,132	n/a	n/a	Government
Myanmar	90	10	n/a	3,200	Government
Malaysia	68	12	n/a	4,296	Delegation
East Africa	314	n/a	52,000	n/a	Government
Total	276,098	14,459	>1,117,557	>1,124,655	

*In Indonesia only, the number of dead includes persons previously listed as missing.
Note: East Africa covers tsunami-affected countries of Kenya, Madagascar, Seychelles, Somalia and Tanzania.

Thousands of staff, relief and medical personnel, and volunteers of the Red Cross and Red Crescent societies of the tsunami-affected countries have provided a vital initial response, in search and rescue, clean-up, providing temporary shelter and immediate relief assistance, emergency medical services, psychological first aid and tracing. It is estimated that almost 12,000 Red Cross and Red Crescent volunteers and 76 relief and medical teams have been mobilized in the disaster-affected areas.

The Federation immediately launched a Preliminary Emergency Appeal on the day of the disaster with a focus on Sri Lanka, Indonesia and the Maldives. On 3 January 2005, the ICRC launched budget extensions additional to its 2005 Emergency Appeal for Indonesia and Sri Lanka. Along with initial support from the country and regional

delegations, the Federation deployed within 24-72 hours three [Field Assessment and Coordination Teams \(FACT\)](#) and 18 [Emergency Response Units \(ERU\)](#) in the sectors of water and sanitation, health care, aid distribution, telecommunications, and logistics/transportation to Sri Lanka, Indonesia and the Maldives.

A total of 102 relief flights have now arrived in the various affected countries and a further 23 flights are in the Federation relief pipeline, making a total of 125 relief flights coordinated through the Federation.

The Federation and the ICRC in Geneva are currently working on an organizational framework for Movement coordination in the tsunami operations. A note has been sent out to national societies and delegations on this today, for consultation. It is expected that the framework, which will set in place strong platforms for coordination, will be finalized shortly, and a final note will be sent out by the Federation and the ICRC next week.

Operational Developments

Indonesia

Overview

The Indonesian Government has set 26 March as the deadline for emergency relief implementation in Aceh and North Sumatra provinces, at which point the operation will shift its focus to rehabilitation and reconstruction. By that date, the government says that it hopes to have completed the burial of hundreds of thousands of bodies, the relocation of refugees, the construction of better refugee camps and the construction of houses for Acehnese.

On Thursday, Indonesia announced it had buried over 100,000 tsunami victims. Indonesian Red Cross (Palang Merah Indonesia/PMI) volunteers have been at the forefront of this most delicate and difficult of tasks – that of the retrieval of bodies, and recovered a total of 41,628 bodies as of 24 January.

An inter-agency rapid health assessment team, under the guidance of the UN Coordinator for Sumatra, issued a report on 27 January focusing on the situation on the ground in the more remote areas south of Banda Aceh, along the coast to Alue Bilie. The report stressed “the continued absence of a systematic response to the multiple needs of the population” and noted that the provision of health services lacked coordination and that information remained fragmentary. At the same time, the report underlined the fact that the expected outbreaks of disease had not occurred and that there were a number of signs that the massive humanitarian effort was effective. The team did not come across any isolated settlements that had not received any kind of assistance. Furthermore, the report mentions that food stocks – although limited in protein and calorie density – are nevertheless reaching most large population groups. In addition, food has begun to re-appear in local markets.

Sanitation is proving to be another area of concern. Sanitary conditions are said to be very poor in many of the IDP sites, with population numbers overwhelming the available facilities. Many sites have no latrines. Soap and other basic hygiene commodities are said to be in short supply, which would explain the enthusiastic reception by the local population of RCRC hygiene kits.

In a separate development, Australian researchers have warned of the threat of fungal infection amongst survivors. Doctors have reported treating a case of mucormycosis – a disease said to be difficult to diagnose and treat. The infection is caused by fungi found in soil and in decaying vegetation and people injured by the tsunami could be at risk of infection, according to the doctors.

One of the challenges facing the relief effort is the continuing mobility of the IDP population. People are still moving around, to community shelters, neighbouring villages or away to other areas in Aceh. This is making it difficult for authorities and agencies to accurately count and target the population. There are nevertheless indications that IDP populations are making their way towards the larger population centres such as Calang and Meulaboh.

Authorities have made substantial progress in clearing away the accumulated debris and rubble and the Indonesian government has announced a so-called ‘green line’, where rebuilding will not be allowed because of proximity to the sea. Exact details are not yet available. As a way of organizing rehabilitation and reconstruction aid, representatives of UN agencies and aid organizations have agreed on the categorization of rebuilding needs, in

order to better target their assistance. The first of three categories include people who used to live along the coast outside the 'green line', where rebuilding is not allowed; the second category comprises people who have land but whose houses have been completely destroyed, whilst the third group includes those whose houses have only been partially damaged and can be repaired.

Conservation groups have warned that the massive demand for timber needed to rebuild could ravage local forests. According to a study by World Wildlife Fund and the local group Greenomics, Aceh alone will need four to eight million cubic metres of timber over the next five years – equivalent to 227,000 hectares of forest. They have called on donor countries to send some of the promised aid in the form of logs.

Coordination:

PMI has agreed to host the Movement's tsunami coordination meeting in Jakarta on 14 and 15 February; confirmation of the meeting has been sent to relevant PNS and a detailed programme is being developed. This meeting will set the groundwork for a larger meeting between all national societies affected by the tsunami, the Federation, ICRC and relevant PNS, which will be held in Hong Kong during the first week of March 2005. The meeting aims to discuss and develop national plans on tsunami operations for all affected national societies.

The OD capacity building plan for Aceh is being drafted, and will cover the rehabilitation of chapter and branches in Aceh, Sumatra. The plan is a follow-up to the meeting in Lhokseumawe on 17 January, where various chapters and branches reported on their situation and progress in the tsunami's aftermath. PMI is also revising the pay scales of their national office and looking to recruit new staff for the overstretched national office division, as many personnel have been mobilized for the tsunami operations.

The Federation's head of delegation also met with the Minister of Finance today to discuss visa problems faced by delegates involved in the tsunami operations. A number of delegates in-country since the early days of the operation are extending their missions. Visas are currently only being extended for two weeks, despite earlier assurances that they would be renewed for up to 30 days.

Red Cross and Red Crescent action - objectives, progress/achievements, impact, constraints

Overall Goal: Up to 100,000 internally displaced and otherwise affected families (approximately 500,000 people) in western Aceh receive adequate and timely emergency humanitarian assistance over the next six months.

Objective 1 (emergency relief): Basic supplementary food and non food needs of the 500,000 IDP (Internally Displaced People) and most vulnerable beneficiaries are met so that they can start rebuilding their future.

Progress/ Achievements

Relief distribution is on-going along the west coasts of Aceh. Details from the field were unavailable due to problems with the local communications network.

Impact

Relief goods were distributed to an estimated 40,400 beneficiaries along the west coast of Aceh between 11 and 26 January. This figure does not include relief distribution undertaken by the Federation, ICRC and PMI prior to that date, from relief stocks available in-country at the time of the disaster.

Relief goods are flowing more smoothly through the pipeline, with a steady stream of non-food items reaching the target communities. Relief distribution figures are currently being compiled from the Banda Aceh operations base.

Objective 2 (logistics): PMI will have a strengthened supply chain capability and capacity to ensure timely transport of material and human resources to the areas of operation.

Progress / Achievements

An assessment of needs and resources by the Federation's logistics team based at Batam has resulted in some revisions to the way that onward delivery of goods will be handled in the near future. Current capacity from Batam, including the use of the C-130 until 30 January and the AN-12 until 29 January, gives the operation a combined 23-ton daily capacity to Banda Aceh and up to 30 tons to Medan.

At present, Batam has some 300 tons of high priority goods (tents, hygiene packs, and tarpaulins) and about 100 tons of lower priority items (blankets, bed sheets and medical kits). The use of the two aircraft alone is proving insufficient to enable logistics to clear this backlog – and this does not include provisions for unsolicited goods which may be arriving, nor the expected priority 270 tons of tarps from British Red Cross.

Moving ahead, the Batam team has recommended extending the deal on the C-130 (negotiations are presently underway with BP for an additional 9 days). Otherwise, the operation will concentrate on moving materiel by sea, commencing with five containers from Maersk which are expected shortly. These containers will be delivered to Medan and a request has gone into Maersk to transport some or all of the filled containers from Medan to Meulaboh. This is also being negotiated at present.

The Batam logistics hub now also has the free use of a large warehouse at the Batam port and has received a quote from an agent to receive, transport, palletize goods received as well as manage the warehouse. Day labour is now being used to unload and load aircraft.

The Batam-based logistics delegate underlines however that the above scenario is very much subject to change in the operational environment and will be revised as required.

Banda Aceh continues to act as a key relief distribution hub. Transportation of relief items and personnel is summarized below.

Helicopter flights 27 January 2005

Aircraft	Destination	Cargo
Sykorsky	Teunom	Relief supplies: tents and family kits + pick-up of 11 members of out-going German RC watsan team
	Calang	Food parcels + pick-up 2 PMI volunteers
	Lamno	Relief supplies: tents and family kits, as well as 4 members of Austrian RC watsan team
Bell 212 #2	Teunom	Food parcels
	Meulaboh	Pick-up of two Federation delegates and 2 PMI volunteers
	Calang	Food parcels, as well as two members of Austrian RC watsan team

Boat trips 27 January 2005

Water craft	Destination	Cargo
7 ton	Teunom	300 hygiene kits, 154 family tents, 1,320 jerry cans
7 ton	Teunom	1,300 tarpaulins, 80 tents, 1,600 blankets

The 40-kilometre stretch of road south from Banda Aceh, as far as Leupong, has been reopened following the rebuilding of one of the collapsed bridges.

Impact

A coordinated logistics operation and team is now in place, with the capability to deliver and store 1000 metric tons of relief goods per week, as well as ERU equipment and support personnel, using both air and sea routes.

Supply lines have been established to four distribution points (Lamno, Calang, Teunom and Meulaboh), through two marshalling areas (Meulaboh and Banda Aceh), supported by a national and international hub (Medan and Batam, respectively).

Constraints

Relief distribution is constrained by the load capacity of the helicopters and the number of craft available to the operation. Additional distribution by sea is being considered. However this mode of transport is expected to be hampered from March until September, when seasonal sea swells make onshore landings very difficult.

Objective 3 (health): primary health care service provided to the tsunami-affected communities and potential epidemics are prevented or adequately addressed.

Progress / Achievements

Japanese Red Cross Society BHCU – Meulaboh

The JRCS BHCU clinic saw 75 patients on 27 January, most of who continue to show signs of chronic disease unrelated to the disaster. Sterilization of the area around the clinic was carried out.

The Japanese team continues to support the hospital. Care was provided to 17 post-operative in-patients, two plastic surgery operations were carried out and two surgical consultations provided. The JRCS team report an increase in the number of Indonesian medical staff at the hospital and a concomitant decrease in NGOs.

There is no mobile clinic this week. A JRC team of one doctor, four nurses and two technicians arrived in Meulaboh. The total JRC team now numbers 19 members.

Other PNS

The Malaysian RC is rotating its medical team. A new six-person team arrived to take over yesterday. They are focusing on three activities:

- Providing assistance to the PMI clinic in Banda Aceh
- Taking over the operation of the Malaysian armed forces clinic near the airport
- Running mobile clinics.

It is estimated that they are seeing 80 patients per day in each of the clinics.

Impact

RCRC	Communities served	Activities	Beneficiaries	Constraints / Comments
German RC ERU BCHU (as from 10/01/05)	Teunom	<ul style="list-style-type: none"> ▪ Basic health care services 	<ul style="list-style-type: none"> ▪ Serving a population of up to 20,000 ▪ 100-150 patients / day (OPD) – cumulative (26/01): 2,121 	Team of 6, joined by Swiss RC (2) on 16 Jan. + PMI volunteers
Japanese RC ERU BCHU (as from 29/12/04 with limited equipment)	Meulaboh + outlying communities (Ache Barat, Nagan Raya)	<ul style="list-style-type: none"> ▪ Medical support to Cut Nyak Dhein hospital (ICU, ER, OT) ▪ BHCU in IDP camp ▪ Needs mapping in outlying villages ▪ Mobile health clinic to IDP camps 	<ul style="list-style-type: none"> ▪ Up to 300 patients / day overall at the hospital. ▪ BHCU in IDP (from 26 January) 124 patients ▪ Vaccinations: tetanus: 1602 measles: 214 	<p>Initial loss of medical equipment and supplies (reportedly damaged or looted). New equipment coming in with change-over team.</p> <p>Team change-over in process (24/01.05)</p>

		▪Measles + tetanus vaccination		
ICRC Hospital (as from 16 January)	Banda Aceh	Referral Hospital	Up to 100 patients / day	Also setting up a camp for discharged patients (up to 400)
PMI	Banda Aceh, Lam No, Calang, Simeulue Meulaboh	▪Mobile health teams ▪ 34 doctors and 28 paramedics / nurses ▪ Doctor working with BCHU + 30 PMI volunteers	Estimated cumulative total of 70,000 patients (at 27 January)	8-12 teams operational at any one time. Other teams deployed directly by PMI chapters to affected area.

Objective 4 (water and sanitation): the spread/outbreak of infectious diseases is prevented through water and sanitation interventions.

Progress / Achievements

The Chairman of PMI has asked that the Spanish Red Cross' ERU look into water and sanitation operations on Simeulue Island. The Federation water and sanitation coordinator and the Spanish team are investigating the best way in which to provide optimum support to the operation on Simeulue, in conjunction with overall relief activities.

Sanitation activities are being geared up, in particular the school cleaning programme in association with UNICEF.

The Austrian/Swedish ERU team is being deployed to Lamno and Patek, following local assessments.

Meulaboh

Sanitation work is beginning, in accordance with the plan put in by the previous water and sanitation delegate. The Spanish RC team rotation is underway, with the new team leader expected in-country within the next few days.

The team is regularly travelling with the distribution truck in order to ensure that the water is reaching the right people, and to identify gaps. They have also been monitoring the handling and storage of water after collection, in order to prevent contamination.

Teunom

Both the 5,000-litre bladder set up in town and the 1,500-litre bladder set up in the school ground continue to be well received by the community. An additional five water distribution points are being set up to service a greater number of IDPs and the community at large.

The team has started building latrines in the school ground and at some of the IDP settlements.

Sigli and Salamanga

Operations continue to meet local demands.

Impact

Water is being supplied on a regular basis to an estimated beneficiary population of over 76,000 people.

Water and Sanitation ERU	Distribution / liters	Means of Distribution	Beneficiaries	Constraints / Comments
Spanish RC (Meulaboh)	▪ Up to 300,000 L mass water / day.	6 municipal trucks of 3,500t capacity;	4,000 families + estimated 20,000	Water capacity exceeds means of

	<ul style="list-style-type: none"> ▪ All 5 specialised water units in operation (23/01). Producing 40,000L ▪ Team reached the 4.5 million L distribution mark on 26/01 	1 UN truck of 7,000l capacity; Arrival of 2 water 15,000L tankers from Spain.	IDPs in 4 camps + specialized water to Japanese RC BHC team + other agencies as requested.	distribution
French RC (Salamanga and Sigli)	90,000 L / day + 70,000 L per day	<ul style="list-style-type: none"> ▪ By tap and tanker truck. Four water tankers arrived (23/01) + 2 local-hire flat bed trucks ▪ 40 x 3000l tanks to be used for distribution points 	12,000 IDPs + approximately 20,000 general population (drinking water only)	<p>Requisition of material for latrines construction, coordinated through logistics.</p> <p>Team in rotation. Only 3 members currently in place.</p>
German RC (Teunom)	35,000 L/ day	5,000 L + 1500L bladder tanks set up in town	At least 1,500 via distribution, as well as serving BHCU. Overall estimated beneficiaries: 4000	
Swedish / Austrian RC (Lamno / Patek)				Assessments finalized. The team will be located in both Lamno and Patek,

Sri Lanka

Overview

The Sri Lanka Red Cross Society (SLRCS) attended a ceremony today to officially announce its housing reconstruction project to build 15,000 permanent houses in the country, officiated by the President of Sri Lanka. Present at the ceremony were the SLRCS President as well as the Federation's country representative.

Relief operations continue in the country, supported by the Federation and the ICRC. The American Red Cross' ERU has begun relief distributions in the eastern district of Ampara, in coordination with the ICRC. It had already established a distribution base in the southern city of Galle.

With over 5,500 people reported still missing (as of 20 January), the tracing and re-establishing family links programme (RFL) by the ICRC will be necessary for quite some time. The 24-hour, seven-day RFL call centre has been maintained by the ICRC, supported by 15 volunteers dealing with tracing and registration of missing people.

For maps and reports on the general background of the disaster in Sri Lanka please refer to <http://www.lk.undp.org/ndmc/>

Coordination

In addition to the National Society, more than 200 delegates/staff are currently working in Sri Lanka comprising the Federation (country delegation, field assessment and coordination team, recovery assessment team, and emergency response units), the ICRC and partner national societies (PNS). Productive discussions have been held over the past week between the Movement coordinator and several PNSs based in Sri Lanka, including the German, Maltese, French, and Netherlands Red Cross societies, with progress made in improving coordination mechanisms between PNSs and the Federation.

Red Cross and Red Crescent action - objectives, progress/achievements, impact, constraints

Overall Goal: Up to 40,000 families (about 200,000 people) in the south of the country receive immediate relief, shelter, health and care, and community support over the next six months.

Objective 1 (water and sanitation): Adequate sanitation and water supply provided to a selected number of temporary shelters/welfare centres, and water and sanitation systems to serve the affected population.

Progress/Achievements:

The table below reflects the progress of Sri Lanka Red Cross and emergency response units (ERUs) in water, sanitation and hygiene improvement activities, to date.

Red Cross/Red Crescent	Location	Work carried out to date	Future plans
French Red Cross supporting the SLRCS Ampara branch	Ampara district	<ul style="list-style-type: none"> - cleaned 1500 wells between Kalmunai and Maruthaiminei - repaired water network and supply water in the same area 	To continue similar activity in this district
Federation supporting the SLRCS with an emergency water ERU and a mass water distribution ERU	Ampara district	<ul style="list-style-type: none"> - water treatment plant ERU (distributing avg. 120,000 litres/day to a total population of 34,000); - Cleaned approx 100 wells of a targeted 1,000 wells - Distribution system of 9 tanks of 11 m³ and 1 tank of 70 m³ 	<ul style="list-style-type: none"> - Continue well cleaning activities; - Construction and rehabilitation of wells and latrines in the Pottuvil/Komari area
SLRCS	Matara district	<ul style="list-style-type: none"> - Cleaning of 150 wells 	
SLRCS	Country wide	<ul style="list-style-type: none"> - The SLRCS operates 12 water bowsers throughout the country 	
Spanish Red Cross supporting the SLRCS in sanitation and livelihood programme	Galle and Kalutara district	<ul style="list-style-type: none"> - Red Cross volunteers and people from the affected families clearing debris at household and the community levels - Affected people receive cash for relief work to support livelihood. 	<ul style="list-style-type: none"> - Provide support to the affected population in sanitation and livelihood sectors

Objective 2 (shelter): Temporary shelter provided to up to 15,000 families (about 75,000 people) whose houses have been destroyed and have no extended family to live with.

Progress/Achievements:

The American Red Cross' ERU located in Pottuvil has started its first distributions through SLRCS in the district of Ampara, providing 18 family tents and 666 tarpaulins to some 350 families on its first day of operation (some families receive one or two tarpaulins depending on the size, usually 16 square meters per family). Meanwhile, distributions in the southern coastal towns of Sri Lanka continue to reach families in need of relief goods, with items such as kerosene stoves and mosquito nets, in the pipeline.

Objective 3 (immediate livelihood restoration): The minimum livelihood requirements provided for up to 40,000 families (about 200,000 people) whose houses have been destroyed and have lost their belongings.

Progress/Achievements:

Excellent links have been established by the American Red Cross' ERU with the local SLRCS branch in Ampara. The branch has mobilized volunteers and provided counterparts for the relief and logistics teams. Distributions

started today in Pottuvil, with nearly 350 families in the east coast of Sri Lanka receiving non-food relief items (NRFI) including water containers, kitchen sets, hygiene kits, blankets and bed sheets. The plan is to continue every day for the next week as future plans are developed.

Discussions are underway by the Colombo-based British Red Cross ERU with a local airline to shuttle Red Cross personnel to Ampara on a weekly basis. Lanka Air is also looking at the possibility of landing planes in the lagoon next to Pottuvil (all their planes can land on water), which would save on airport charges and speed up the delivery time of relief items to Pottuvil, some two hours by road from Ampara.

Constraints: The American Red Cross' ERU relief and logistics teams in Ampara as well as the local SLRCS branches have a shortage of vehicles. Two vehicles from Colombo are to be sent to the region to assist in the relief activities. The difficulty in hiring vehicles makes this a priority.

Capacity of the National Society

Key staff in the three Federation warehouses in Colombo, Galle and Ampara are being trained by the American Red Cross' ERU so that they can take over some of the duties currently being performed by delegates. On the whole, the American Red Cross' ERU is looking to train local staff for long-term logistics positions and have provided information including positions required, duration, and job descriptions to the Federation's delegation for the recruitment process.

Prior to distributions in the eastern district of Ampara, the SLRCS and American Red Cross' ERU trained 40 new and existing volunteers in relief distribution as well as the Movement's principles.

Communications – Representation, Advocacy and Public Information

Federation information delegates and the media department of the SLRCS continue to provide media coverage, photo exchange, stories and interviews to the local and international media.

Maldives

Overview

The National Disaster Management Centre will close on 31 January and government staff assigned to the relief operation will return to normal duties on 1 February. Coordination mechanisms will remain, though implementation of programmes will happen increasingly at sectorial levels.

All schools opened on 25 January and were functional at some level. It will still be some time before all schools are restored to pre-tsunami capacity because of logistical difficulties re-supplying furniture and stationery and reprinting and replacing text books. An AUSAID team has almost completed a survey of structural damage to schools.

In the area of health, a shortage of physicians/general practitioners is causing some concern. With the assistance of WHO, approaches are being made to VSO and the Commonwealth Secretariat to try to identify volunteers.

A relief coordinator has arrived and is taking over from the delegate temporarily assigned from the Bangladesh delegation.

The inherent difficulty for both personnel and materials to reach far flung islands with the relatively limited resources available in the country continues to provide some frustration in implementing the programmes on a timely basis.

Overall Goal: Tsunami-affected families in Maldives receive immediate non-food relief, shelter, electricity, health, water and sanitation services; and a national society established.

Objective 1 (Shelter): Temporary shelter provided for 3,440 families and permanent shelter material provided for 5,500 families whose houses have been completely or badly damaged.

Progress/Achievements

To speed up the delivery of corrugated iron sheeting for the temporary housing, 3,600 sheets are now to arrive by air from India. This will cover the initial temporary housing requirement, though the authorities are now proposing to increase the number of housing units from 89 to 101 as it becomes evident that two more islands require six units each of accommodation.

The balance of the 21,000 sheets of corrugated iron is to be delivered by sea from India to help cover the repair of damaged houses.

A construction delegate from the India delegation arrives next week to review design and advise on monitoring.

Discussions are taking place with UNDP which proposes to build up to 600 permanent houses as an integrated part of the housing programme. The Federation will most likely provide the corrugated iron sheeting as its plan of action covers all the roofing needs.

Constraints:

Exact figures on the number of families needing new housing or repairs to existing structures are still not available as governmental survey teams have yet to complete their tasks.

Objective 2 (immediate livelihood restoration): electric power restored for 30,000 people and the minimum livelihood requirements supported for 2,000 families whose houses have been destroyed or badly damaged, and have lost their belongings.

Progress/Achievements:

A total of 23 generators have now been despatched to various islands. One still awaits shipping and this is being arranged by the island authorities. Installation is proceeding on the islands and six generators are presently operational providing electricity for 3,491 people.

Some of the generators repaired after the tsunami have broken down or developed major faults because of salination. The authorities have identified a need for a further 12 generators, mostly on Laamu Atoll, to replace the machines that cannot be repaired. The Federation has been approached with a "wish list". Further information is being sought.

UNDP proposes to make USD 300,000 available to assist in the costs of repairing/replacing electrification infrastructure, such as street lights and poles, for reticulation from the Federation-provided generators.

Constraints

The speed of installation on the islands has slowed because technical resources are stretched with so many generators to wire for electricity distribution.

Objective 3 (health): the physical and mental health of the affected population is ensured through the provision of needed basic medical supplies and psychosocial support.

Progress/Achievements:

Since the last report, there has been no further psychosocial training by the American Red Cross team. Team members are now travelling to conduct training in three atolls over the next two days.

Some 1,400 hygiene kits have been delivered to Laamu Atoll by the US Navy. These are now being distributed.

The health authorities continue to report no existing concerns about epidemics or the spread of disease.

Objective 4 (water and sanitation): about 5,000 people have access to adequate water and sanitation facilities.

Progress/Achievements:

A water and sanitation delegate arrives on Saturday, 29 January, and will review the situation before the Federation takes any further implementation steps in this area.

India**Overview**

The meeting on Tsunami rehabilitation activities is continuing in Chennai (running 27-29 January). The meeting is developing an endorsed plan of action and budget for tsunami rehabilitation and reconstruction activities in the states of Andhra Pradesh, Kerala and Tamil Nadu. These states are being represented by a total of 15 district branches while the Indian Red Cross national headquarters, state and district branches, the Federation, ICRC and in-country PNS are also present. It is expected that consolidated figures and details of relief provided to date by the Indian Red Cross along with rehabilitation plans will be available from next week, once the Chennai meeting has concluded.

All five water purification plants previously mobilized by national headquarters to the Andaman and Nicobar Islands are now operational. One is situated in the capital Port Blair and the other four are in Dollyganj.

Outstanding Needs**Human Resources**

The recruitment of Federation delegates for Sri Lanka, Indonesia, Maldives and for the Federation's office in New York continues, and 25 posts remain to be filled, as detailed below. The recruitment of head of operations for Indonesia is extremely urgent. The recruitment for a logistics coordinator for the Banda Aceh operations centre (with strong procurement skills and knowledge of Federation systems) is also an urgent priority.

Place of assignment	Positions to be filled
Sri Lanka	Head of delegation, logistics coordinator, organisational development delegate, recovery programme coordinator, water-sanitation delegate, water-sanitation coordinator, field relief coordinator, disaster management delegate
Indonesia – Jakarta	Head of operations, recovery programme coordinator
Indonesia – Banda Aceh operations centre	Administration delegate, logistics coordinator, relief coordinator, relief delegate, health coordinator, water-sanitation coordinator, IT delegate, psychosocial delegate
Indonesia – Medan sub-office	Head of office, relief delegate
Indonesia – Meulaboh sub-office	Head of office, water-sanitation delegate, health delegate
Maldives	Construction delegate
New York	UN liaison delegate

Relief Needs

The following table summarizes the major outstanding material needs in the affected countries under this Revised Preliminary Appeal. Any national societies wishing to contribute to the relief pipeline are kindly requested to contact the logistics department at the Federation secretariat in Geneva (contact details on Page 2 of this update).

Country	Major outstanding needs		
Indonesia	42,500 hurricane lamps 77,334 length of rope	37,840 kitchen sets 8 dispensary tents	21,799 family tents
Sri Lanka	73,200 jerry cans 33,055 kitchen sets 225,000 sleeping mats	20,000 cooking stoves 200,000 women's underwear	
Myanmar	8,500 kitchen sets
