

# Emergency appeal

International Federation  
of Red Cross and Red Crescent Societies

## Viet Nam: Flood and typhoon

Emergency appeal n° MDRVN006  
GLIDE n° [FL-2009-000207-VNM](#)  
2 October 2009

This Preliminary Emergency Appeal seeks CHF 4,939,626 (USD 4.75 million or EUR 3.25 million) in cash, kind, or services to support the Viet Nam Red Cross Society to assist 50,000 families (approximately 210,000 people) for 12 months.

CHF 314,064 (USD 324,167 OR EUR 214,633) was allocated from the Federation's Disaster Relief Emergency Fund (DREF) on 29 September 2009 to support this operation. Unearmarked funds to replenish DREF are encouraged.

As of 9pm local time on 1 October 2009, Typhoon Ketsana has resulted in 99 confirmed deaths, 14 missing and up to 252 people injured. Up to 17,302 houses collapsed, 201,167 were damaged and 169,180 flooded in what is described as the worst flooding in 45 years. Based on the situation, this Preliminary Emergency Appeal responds to a request from the Viet Nam Red Cross Society, and focuses on providing support in delivering assistance and relief in food and non-food distributions, livelihoods support, water, sanitation and hygiene and shelter to affected communities, as well as capacity building of the national society including its staff, members and volunteers.

This operation is expected to be implemented over 12 months, and will therefore be completed by 30 September 2010; a Final Report will be made available by 31 December 2010 (three months after the end of the operation).

[<click here to view the attached Emergency Appeal Budget;](#)  
[here to link to a map of the affected areas; or](#)  
[here to view contact details>](#)

Viet Nam Red Cross quickly responded to the needs of the affected communities following the typhoon and floods, including in the province of Quang Tri. VNRC.

## The situation

Typhoon Ketsana hit the central part of Viet Nam on September 29 from mid-afternoon to late evening with wind gusts of up to 160 km/h. The typhoon, locally categorized as 9-10 on a scale of 12, swept through 12 provinces including Quang Binh, Quang Tri, Hue, Da Nang, Quang Nam, Quang Ngai, Binh Dinh, Phu Yen, Kon Tum, Dak Lak, Lam Dong and Gia Lai, causing wide-spread devastation, particularly in provinces of Quang Nam, Quang Ngai, Kon Tum, Thua Thien Hue, Da Nang, Dak Lak and Quang Tri.

The typhoon was preceded by a tropical depression with heavy rainfalls causing deaths, flooding and destruction of houses, livestock and rice fields. In preparation for the actual landfall of typhoon Ketsana,

authorities ordered the evacuation of more than 400,000 people in flood-prone areas. The evacuation was carried out by up to ten thousand military staff, supported by organizations including the Viet Nam Red Cross. Coordinated by the government, the military is leading response and rescue activities in the affected areas. As of 1 October 2009, more than 150,000 people are still displaced without knowing when they may return home.

Viet Nam Red Cross participated actively in this evacuation and in disseminating further warnings, encouraging people to stay in safe houses during the typhoon and to stockpile food and water for 7-10 days.

As of 9pm local time on 1 October 2009, Typhoon Ketsana has resulted in 99 confirmed deaths, 14 missing and up to 252 people injured. Up to 17,302 houses collapsed, 201,167 damaged and 169,180 flooded in what is described as the worst flooding in 45 years.

Trees and electricity poles fell down, and floodwaters rose to 1-2 meters above normal levels across vast areas of central Viet Nam, in some places up to four metres. Initially, road networks and telecommunication infrastructure broke down and certain areas are still cut off. As a result, thousands of trucks, buses, cars and trains with passengers are stuck as roads and railway lines were made impassable due to broken bridges, landslides and flooding. Latest reports from VNRC relief teams indicate that transportation has been restored in main roads or highways. However, many communes in Quang Binh, Quang Tri, Hue and Da Nang still cannot be accessed by car, but only by boat. In Kon Tum, almost all districts and communes in mountainous areas remain inaccessible as of 1 October 2009.

As of 2 October, the water had subsided in some provinces, but continuous heavy rain in other provinces has hampered and delayed relief efforts. In some instances, Red Cross workers were stuck for hours while trying to reach new areas with relief items. Communities along the Hieu river in Quang Tri province had to evacuate Thursday as the river flooded. Schools were planned to re-open on 30 September, but only those in towns or higher places could commence on 1 October. Schools in rural areas, particularly in remote areas, are expected to re-open early next week, to allow the flood waters to recede and cleaning efforts to take place.

The detailed overview of the total damages is not yet fully established. However, this is currently being developed from statistics and updates regularly provided by VNRC. At time of writing, it is estimated that up to 3,000,000 people have been affected.

Local governments have appealed to the central government for large scale support, including 24,100 tonnes of rice, 600 tonnes of rice seeds, 20 tonnes of vegetable seeds, 30 tonnes of maize seeds, and VND 678 billion (CHF 40 million USD 88.5 million) are requested. The central government have so far pledged 10,000 tonnes of rice (approximately 41 per cent of the estimated needed amount). In addition, the government health sector has provided 200 emergency health kits and up to five million water purification Chloramin B tablets to the typhoon/flood affected provinces.

The VNRC Quang Binh chapter mobilized its pre-positioned stocks which include instant noodles and distributed them to affected families in the province. VNRC Quang Binh chapter.

## Coordination and partnerships

To ensure coherence in response activities, the International Federation's country office has a coordinating role with support from partner national societies present in Viet Nam, supporting Viet Nam Red Cross (VNRC) on a long term basis. These include the American Red Cross, French Red Cross, German Red Cross, the Netherlands Red Cross and Spanish Red Cross through the VNRC. Coordination meetings with the VNRC and its partners has taken place every day since the onset of the disaster to update all on the recent developments, situation gathered from the fields, and plan support to VNRC in a holistic approach. A joint meeting between VNRC, the International Federation and partner national societies was held on 30

September to update all about the VNRC plan of action, and how to approach potential international donors. The International Federation's country office is also assisting VNRC in responding to information requests from the public who have shown much interest in their activities.

The in-country Inter-Agency Disaster Relief Working Group engaged in disaster management are regularly updating and circulating information. A joint rapid needs assessment will be carried out from 1 - 5 October, by six different teams consisting of representatives from UN agencies and international non-governmental organizations working in Vietnam. The national society will also take part with two representatives.

The International Federation received a confirmed contribution of USD 100,000 from the USAID country office towards its activities on 2 October 2009.

## Red Cross and Red Crescent action

The national central committee for storm and flood control is coordinating evacuation and relief efforts in the country where VNRC plays a key and significant role.

More than 2,000 VNRC staff and volunteers supported national preparations before the typhoon made landfall, assisting with the mass evacuation and warning citizens beforehand. They will continue to be involved in this operation.

Staff and volunteers from provincial branches in this disaster-prone area of Viet Nam have been trained in contingency planning, including evacuation, early warning, rescue and life saving as well as first aid. Thousands stood ready to help early Wednesday morning on 29 September, helping stranded people to safer houses and distributed instant noodles and water.

VNRC household kits which include cooking and kitchen utensils, blankets and water plastic containers were distributed to affected families in the province of Da Nang. VNRC Da Nang chapter.

VNRC chapters immediately released food and water, boats, lifejackets and other relief items stockpiled in provincial Red Cross warehouses, as well as money from their contingency funds to provide instant noodles and water to the affected population. In the province of Quang Binh, Red Cross chapter response includes the following:

Province	District	Emergency relief items distributed as of 1 October 2009
Quang Binh	Le Thuy (three communes)	2,500 boxes of instant noodles (750,000 bag of noodles) 200 crates of drinking water (4,800 bottles)
	Quang Ninh (three communes)	
	Tuyen Hoa (six communes)	
	Quang Trach (four communes)	
	Dong Hoi (six communes)	
	Bo Trach (two communes)	
	Minh Hoa district (three communes)	600 boxes of instant noodles

The Red Cross chapters are exhausting their pre-positioned stocks and are ready to resume activities with new supplies included in this operation to reach more people. Reports from chapters show that household kits, food and shelter (roofing) are urgently needed at this stage. At a later stage, there will be a great need for seeds for winter crops, fertilizer and re-construction of homes.

In some provinces, the distribution of household kits has commenced with the first 1,000 household kits delivered on 1 October by VNRC headquarters to the provinces of Quang Binh, Quang Tri, Da Nang, Quang Nam and Quang Ngai (click [here](#) for attached table).

Vietnam Red Cross headquarters has dispatched three initial assessment teams to the affected areas, one team lead by the vice president and secretary general. The teams will reinforce the ongoing assessment by the local branches.

VNRC has allocated USD 74,000 of its own funds to assist the branches to procure relief items and provide financial support to families who have lost members of their families. In addition, the International Federation has released CHF 314,000 from DREF for initial support to VNRC.

VNRC has also deployed a water treatment unit contributed by Australian Red Cross to Hue Province with initial support from a German Red Cross water and sanitation delegate. Refresher training for VNRC personnel has commenced. Two Australian Red Cross technical water and sanitation delegates are presently en route to Viet Nam and will support both the operation and further training on the functions of this unit. The water treatment unit has the capacity to provide drinking water for up to 5,000 people. Other partner national societies representatives in-country including American Red Cross, French Red Cross, Netherlands Red Cross and Spanish Red Cross are in intense dialogue with their respective headquarters and missions as well as the European Commission's Humanitarian Aid Office (ECHO) for potential contributions.

The communications delegate has conducted several interviews with international media, especially from 29 September – 1 October 2009. The communications delegate has also assisted American, Australian, Norwegian, German and Spanish Red Cross delegates in-country interviewed by national media by providing information and guidance on joint key messages.

The International Federation works closely with national societies present in Viet Nam to support VNRC in their relief and recovery efforts. A total of three Federation delegates covering coordination, disaster management and communications from the regional office in Bangkok have been deployed to Viet Nam to reinforce coordination and planning activities of the International Federation's country office, and enhance its support to VNRC in conducting needs assessments in the field.

In addition, the International Committee of the Red Cross (ICRC) will provide technical support to VNRC in restoring family links activities if needed.

## The needs

At present it is difficult to ascertain the exact details of the extent of the damage and needs of the affected populations. However, based on initial assessments conducted by VNRC and supported by the International Federation and partner national societies in-country, the humanitarian needs identified at present include food (rice), access to safe water, relief items including household kits, and shelter assistance and livelihood support to assist early recovery, including the distribution of agricultural assistance (i.e. seeds for the upcoming winter crop in November).

## The proposed operation

The VNRC, supported by the International Federation, will focus on the provision of food and non-food items, the improvement of water and sanitation facilities of evacuated and returning families, and the repair and/or rebuilding of homes. Throughout the operation, capacity building in terms of needs assessment, distribution, planning, monitoring, and reporting will be provided to VNRC staff and volunteers.

<b>Relief distributions (food and basic non-food items)</b>	
<b>Objective:</b> Provision of 10 kilogrammes of rice per person for 50,000 families (210,000 people) for one month in Quang Nam, Quang Ngai, Kon Tum, Thua Thien Hue, Da Nang, Dak Lak, and Quang Tri.	
<b>Expected results</b>	<b>Activities planned</b>
210,000 people (50,000 families) who have lost basic income and crops during the floods have received 10 kilogrammes of rice.	<ul style="list-style-type: none"> <li>• Training on needs assessment, selection of beneficiaries, relief distribution</li> <li>• Identification of beneficiaries through criteria agreed upon between the national society and the local communities.</li> <li>• Procurement of rice based on International Federation logistics standards</li> <li>• Organization of transport to the distribution point.</li> <li>• Organization of the various distributions by the concerned local</li> </ul>

	<ul style="list-style-type: none"> <li>• chapters.</li> <li>• Distribution of rice with a proper recording system.</li> <li>• Monitoring and evaluation.</li> </ul>
--	---

### Non-food items

**Objective:** By end of January 2010, 10,000 families (40,000 people) in the affected areas in 12 provinces of Quang Nam, Quang Ngai, Kon Tum, Thua Thien Hue, Da Nang, Dak Lak, Quang Tri, Quang Binh, Binh Dinh, Gia Lai, Lam Dong and Phu Yen will receive one basic household kit composed of: cooking and kitchen utensils, one mosquito net, two blankets, one 10-litre water bucket and one 40-litre water plastic container. The provision of these items aims to meet the immediate needs of the affected families so as to enable them to return to everyday life as quickly as possible.

Expected results	Activities planned
The immediate needs of non-food items for 10,000 affected families are met to enable them to return to everyday life as quickly as possible.	<ul style="list-style-type: none"> <li>• Training on needs assessment, selection of beneficiaries, relief distribution</li> <li>• Identification of beneficiaries using criteria agreed between the national society and the local communities.</li> <li>• Procurement of items for the basic household kits based on International Federation logistics standards.</li> <li>• Training beneficiaries on using relief items.</li> <li>• Organization of the transport and distribution system for the basic household kits by each of the local chapters concerned.</li> <li>• Distribution of basic household kits with a proper recording system.</li> <li>• Monitoring and evaluation.</li> </ul>

### Water and sanitation

**Objective:** By end of September 2010, support will have been provided to up to 7,500 families (31,500 people) with no or limited available means to restore or rehabilitate their water and sanitation facilities. The provision of appropriate hardware will be linked to relevant hygiene promotion campaigns and awareness-raising.

Expected results	Activities planned
7,500 families (31,500 people) will be provided with appropriate water and sanitation facilities. 15,000 people will be trained on how to treat the water at home during emergency period. One water treatment unit will provide clean water to maximum 5000 people per day in 30 coming days.	<ul style="list-style-type: none"> <li>• Identification of beneficiaries with destroyed/damaged water and sanitation facilities, through strong community participation.</li> <li>• Hygiene promotion activities focusing on personal hygiene, sanitation and safe water for targeted populations</li> <li>• Community meeting to discuss design of appropriate water supply and sanitation facilities.</li> <li>• provision of potable drinking water from national society water treatment unit</li> <li>• provision of water collection containers (within household kit)</li> <li>• provision of household water treatment equipment through the distribution of water purification tablets.</li> <li>• Training of Red Cross staff and volunteers on monitoring and evaluation following the agreed model and standards</li> <li>• Training beneficiary family on how to treat water during emergency period</li> <li>• Monitoring and evaluation</li> </ul>

The Australian Red Cross water treatment unit has been deployed to Hue province. Refresher training of VNRCS personnel has commenced. This will be supported by two technical water and sanitation delegates from Australian Red Cross (for up to one month). The water treatment unit has the capacity to provide drinking water for up to 5,000 people.

### Livelihood support

**Objective:** By end of January 2010, 5,000 families (21,000 people) in the worst affected areas, who have lost their homes and/or crops and other means of income, have a viable source of income.

<b>Expected results</b>	<b>Activities planned</b>
5,000 households (21,000 people) have improved livelihood means.	<ul style="list-style-type: none"> <li>• Conduct household and livelihood needs and capacity assessments.</li> <li>• Scope the capacity of VNCS and the International Federation to deliver a variety of livelihoods initiatives such as cash for work and other recovery initiatives for vulnerable families to reinforce economic and social security.</li> <li>• Develop beneficiary targeting strategy and registration system with communities to deliver intended assistance.</li> <li>• Provide support to the most vulnerable groups for restoration and alternative livelihood options.</li> <li>• Distribute resources according to plans emanating from livelihoods assessments linked to shelter assistance.</li> <li>• Monitor and evaluate the activities and provide reporting on distribution.</li> </ul>

### Shelter

**Objective:** By end of September 2010, 1,000 families (4,200 people) in the worst affected areas, whose houses are destroyed, will be supported to re-construct their homes with access to water and sanitation facilities.

<b>Expected results</b>	<b>Activities planned</b>
1,000 families (4,200 people) households are supported to repair their structures together with water and sanitation facility.	<ul style="list-style-type: none"> <li>• Deploy trained local VNRC staff and volunteers to carry out beneficiary selection, including dissemination of self help programme</li> <li>• Identification of villages and beneficiary selection for VNRC assistance</li> <li>• Public notification of assistance to beneficiaries.</li> <li>• Provision of emergency shelter assistance to support beneficiaries with their self recovery</li> <li>• Procurement and distribution of locally appropriate shelter materials, tools and guidance to improve the privacy, repair damages and collectively maintain the premises</li> <li>• Training beneficiary families on safe and resilient shelter construction and design</li> <li>• Reconstruction of new houses</li> <li>• Monitoring and evaluation</li> </ul>

### Institutional capacity building

**Objective: VNRC staff and members at headquarters and relevant Red Cross chapters will improve their skills and capacity on needs assessments, monitoring and reporting.**

<b>Expected results</b>	<b>Activities planned</b>
By end of September 2010, 1,200 Red Cross staff, volunteers are provided with relevant on-the-job training skills to carry out assessments, and monitoring and evaluation.	<ul style="list-style-type: none"> <li>• Briefing and coaching of VNRC volunteers, staff and branches on needs assessments, monitoring and reporting skills.</li> <li>• Organization of workshops</li> <li>• Carrying out of evaluation and documenting lessons and recommendations</li> </ul>

### Logistics

Logistics support will be provided following International Federation procedures to source and procure needed relief items as well as the efficient and timely delivery of these items for the success of the operation. The primary tasks of the logistics team will be the following:

- Coordinate with VNRC, the programme managers and Kuala Lumpur regional logistics unit for the timeliest and cost efficient sourcing option for the items required for the operation.
- Coordinate the mobilization of goods and reception of incoming goods.
- Existing warehousing facilities and vehicles will be utilized for storage and efficient dispatch of goods

- to the final distribution points.
- Pre-positioned stock in regional logistics unit warehouse in Kuala Lumpur will be mobilized on need basis.
- Many items are to be sourced locally and procurement will be done to Federation standards and supported if required by the regional logistics unit.
- Liaise and coordinate actions with other key actors to ensure that the Federation logistics operation uses all information to be as efficient and effective as possible.
- A detailed and up-to-date mobilization table may be established (**not yet requested**) and will be available on the Federation's Disaster Management Information System (DMIS).

The International Federation will work on mobilizing specific relief items to respond to needs in the field and donors should coordinate with the Kuala Lumpur regional logistics unit regarding outstanding needs. Shipping instructions will be provided to donors, with a consignment tracking number which will be issued before shipping any goods to the operation. Procurement of goods and transport can also be arranged through the regional logistics unit.

### Communications – Advocacy and Public information

The steady flow of timely and accurate information between those working in the field and other major stakeholders will support the programme objectives of this emergency appeal, increase the profile, funding and other support for the national society and the International Federation, and provide a platform on which to advocate in the interests of vulnerable populations. In close collaboration with the operation, those affected by this emergency will be provided with information to support their relief and recovery. Donors and partner national societies will receive information and materials they can use to promote this operation and communications initiatives will help to build the information and public relations capacity of the host national society for future emergencies

### Capacity of the National Society

The VNRC is established under Vietnamese Law and its mandate is to act as the leading humanitarian organization in providing relief, health and welfare assistance to the most vulnerable sectors of society. The VNRC enjoys nationwide recognition and respect, and is equipped with strong and established experience of disaster management, including experience and lessons learnt from the Damrey, Xangsane/Durian and Lekima typhoons and recent floods operations. The main lessons from previous operations include strengthening the mobilization of the national society's members, volunteers and staff to provide even better and timely assistance.

The national society and its provincial chapters have extensive knowledge in conducting relief and rehabilitation programmes in the wake of natural disasters, which occur regularly in Viet Nam. It is represented in all provinces and major cities with a total of 64 chapters and 1,000 sub-chapters. Each chapter has human resources of eight to 20 professional staff. The VNRC works in partnership with the government and non-government agencies to achieve effective networking and implementation of services. It is also in partnership with a number of partner national societies such as Japanese Red Cross, Spanish Red Cross, Netherlands Red Cross, Norwegian Red Cross, French Red Cross and German Red Cross in community-based disaster preparedness and disaster reduction projects and programmes.

### Capacity of the International Federation

The International Federation is represented by an experienced country representative who just arrived in Hanoi on 1 October 2009. The International Federation's Viet Nam country office is staffed with a team of very experienced and committed local staff supporting the VNRC in the monitoring and implementation of ongoing disaster preparedness and disaster risk reduction projects, health initiatives and the organizational development of the institution.

The International Federation's Viet Nam country office is further supported by the Southeast Asia regional office in Bangkok and the Asia Pacific zone office in Kuala Lumpur in disaster management; health and care; water and sanitation; organizational development; resource mobilization; planning, monitoring, evaluation and reporting; and communications. At time of reporting, three delegates from the Bangkok regional office are

present in Viet Nam to supplement the planning and coordination capacity to the country office, as well as carry out needs assessment on field.

The Federation country office in Viet Nam will be reinforced for the operation with a Federation operations manager, a regional disaster response team officer as well as professional logistics expertise. Further human resource needs may be identified in the next couple of weeks.

The disaster management unit at the Asia Pacific zone office in Kuala Lumpur is coordinating international support for this operation. The International Federation's Viet Nam country office is assisted by the International Federation's Southeast Asia regional office based in Bangkok, as well as the Asia-Pacific zone office with logistics; communications; resource mobilization; planning, monitoring, evaluation and reporting; and finance support.

### **Budget summary**

See attached budget ([Annex 1](#)) for details.

Yasemin Aysan

Disaster Response and Early Recovery Division

Bekele Geleta  
Secretary General

## How we work

*All International Federation assistance seeks to adhere to the [Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations \(NGOs\) in Disaster Relief](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response \(Sphere\)](#) in delivering assistance to the most vulnerable.*

The International Federation's activities are aligned with its Global Agenda, which sets out four broad goals to meet the Federation's mission to "improve the lives of vulnerable people by mobilizing the power of humanity".

### Global Agenda Goals:

- Reduce the numbers of deaths, injuries and impact from disasters.
- Reduce the number of deaths, illnesses and impact from diseases and public health emergencies.
- Increase local community, civil society and Red Cross Red Crescent capacity to address the most urgent situations of vulnerability.
- Reduce intolerance, discrimination and social exclusion and promote respect for diversity and human dignity.

Save the children pledged 5,000 household kits through VNRC. Plan of distribution is not yet decided by VNRC																			

Food parcel: from IFRC DREF under procurement process

102 tonnes of rice are planned to be distributed from October to December with support from Swiss RC

(\*): number of household kits are reported by VNRC HQ in monthly coordination meeting

3,900 household kits have been distributed from 29.09 to 1.10 October in response to Ketsana typhoon (emergency release from VNRC warehouse)

5,000 kits are being transported to response to flood from 23 - 26 September (released from VNRC warehouse but with support from IFRC DREF)

5,000 Water purification tablet from IFRC DREF - under procurement process

900 water purification tablet from Luxemburg government - under procurement process

900 water container (500 litre) to be distributed in response to Ketsana typhoon (29 September) with support from Luxemburg government - under procurement process

VND 850 million have been distributed from 29 September to 1 October in response to Ketsana typhoon ( 29 September) - from VNRC contingency fund

VND 100 million are planned to be distributed in September in response to flood 23 - 26 September - from VNRC contingency fund

Updated on 1 October
