

## INDIA/GUJARAT: EARTHQUAKE

9 March 2001

*appeal no. 04/01*

*situation report no. 16*

*period covered: 6 - 7 March 2001*

---

*Indian Red Cross Society (IRCS) / Federation activities in the field of health, water and sanitation and relief are being maintained with improved facilities and procedures. Assessments have established that those in urban areas are the most vulnerable and remain in need of solutions as regards longer-term shelter. The methodology for the nutritional survey to be undertaken by the Federation, the WFP, Save the Children and Oxfam has been defined.*

---

### *The context*

At 08.50 hours on Friday, 26 January, a series of powerful earthquakes struck Gujarat state in western India, peaking at a massive 7.9 on the Richter scale, with tremors being felt across several states as well as in Delhi and Mumbai (Bombay) and in neighbouring Pakistan. The epicentre of the quake was 30 km north of the town of Bhuj (population of 150,000), the headquarters of Gujarat's Kutch district while, at the same time, seriously affecting the area within a range of 100 km from the epicentre including Ahmadabad, the largest city in the state of Gujarat.

Infrastructure has been severely damaged, resulting in large scale collapse of buildings, mine cave-ins, train derailments and power failure, cutting off the water supply. A series of aftershocks (more than 400 with 19 measuring over 5 on the Richter scale) has been keeping the population and the authorities on constant alert.

India is divided into five seismic zones with respect to the severity of earthquakes. The entire Kutch area lies close to the western margin of the Indian plate and falls into zone 5. It is thus very prone to

earthquakes. According to the 1991 census, the population in Kutch district was 1.2 million. It is estimated that the population in the district before the earthquake had reached around 1.6 million.

## *Latest events*

Although activities slowed down slightly over the reporting period as a result of two national holidays, the state government has introduced a plan to ensure a significant contribution in manpower towards the recovery of the affected areas in the Kutch district. This will take the form of a “kar seva”: a work drive. The state president stated that each volunteer worker would spend a minimum of 10 days in the affected areas and assist with the construction of houses for the disaster victims. According to the state government, some 250,000 workers are expected to join the kar seva to be organised during the current month.

## *Red Cross/Red Crescent action*

### **Overview •**

The International Federation has sought CHF 25.6 million in cash, kind and services to assist 300,000 beneficiaries (60,000 families) for four months to support Indian Red Cross Society activities in the most affected areas in the district of Kutch, state of Gujarat. Some 40 Red Cross Red Crescent Societies and/or their governments have so far extended their support to the International Federation operation.

The main objective has been to provide the beneficiaries with essential shelter, health and medical services, safe water and other urgently needed relief items.

In support of the IRCS, Red Cross Red Crescent Societies responded with relief supplies and emergency response units (ERUs) comprising a 350-bed joint Norwegian/Finnish Red Cross emergency response referral hospital, German and French Red Cross water and sanitation units, a Japanese Red Cross mobile clinic, a British Red Cross logistics emergency response team, a telecommunications emergency response team from the Austrian and Spanish Red Cross Societies and a Spanish Red Cross emergency response primary health care unit.

To date, 12,953 patients have been treated in the Red Cross health facilities, 368 operations have been performed and 112 deliveries have taken place. Since 3 February, 1,028 patients have been x-rayed and 1,054 tests have been conducted in the laboratory. Fifty one deaths have been registered so far.

Approximately 193,000 blankets, 64,000 tarpaulins, 4,300 tents, 15,000 kitchen sets and 13,000 water containers have been distributed since the operation commenced. Each family assisted receives two tarpaulins and five blankets, with water containers and kitchen sets provided to those whose homes have been completely destroyed.

In addition, more than 50 water tanks (storage tanks, collapsible bladder tanks, “onion” tanks) with capacity ranging from 2,000 litres to 95,000 litres, have been installed by the French and German Red Cross Societies’ water/sanitation teams in the area of Bhuj, Anjar and Bhachau, whilst the German Red Cross water purification facility at the Red Cross compound in Bhuj produces approximately 70,000 litres of water per day for the Red Cross hospital and general needs for the compound.

In parallel with their daily emergency response activities, the emergency response units operating from the Red Cross compound in the town of Bhuj as well as from Sukhpur and Bhachau, have been increasingly integrating into the Federation’s system and structures.

The Secretary General of the Norwegian Red Cross, accompanied by the Norwegian ambassador stationed in India, as well as the head of the international aid department of the Swedish Red Cross and a representative of the Swedish government (SIDA), have visited Bhuj this week.

### **Indian Red Cross Society •**

The National Society has continued its commitment to relief activities in the field. The IRCS forms part of the planning mission and, as such, actively participates in discussions and assessments towards definition of the recovery and rehabilitation phase of the Gujarat earthquake operation.

### **Recovery and rehabilitation planning mission •**

The planning mission team continued its field mission which included a visit to the Gujarat state Red Cross branch and has held discussions with state government officials in Ahmadabad. The members of the planning mission are now back in Delhi and will begin to draw up recommendations for the recovery and rehabilitation programme in Gujarat.

### **Health •**

The comprehensive structure of the Kutch health network includes: 5-6 sub-centres covering a population of 5,000 (approx. 5 villages) with one male and one female multi-purpose health worker; 3-4 primary health centres with 6 beds, 1 doctor and 7-8 paramedics covering a population of approximately 30,000; 9 community health centres, one in each taluka (sub-district) covering a population of approximately 100,000 with 30-40 beds and 3 specialist doctors (GP, surgeon/gynaecologist and paediatrician) and 4 medical officers. There are two government-appointed psychiatrists in Kutch, both stationed at the psychiatric hospital, in Bhuj. This institution had 40 beds before the earthquake, but is presently offering out patient services only.

Several primary health centres have already re-established their practice in prefabricated structures, and the Spanish Red Cross primary health care unit in Bhachau and the Red Cross hospital in Bhuj are referring an increasing number of patients to these facilities.

At the same time, the Red Cross hospital in Bhuj has received a request from the local authorities to refer all medical cases with a legal dimension, such as assaults, burns, traffic accidents, snake bites, poisoning, drowning, strangulations, rape and camel bites to the government health facilities immediately after provision first aid assistance. In addition, all death certificates should, in future, be signed by local doctors.

Conditions in the Red Cross hospital in Bhuj have further improved. Cooling systems have been installed in several wards. The Spanish Red Cross team in Bhachau has started making plans for the recovery and rehabilitation phase. The Japanese Red Cross mobile clinic team has decided, following assessments, to continue working in Sukhpur, but to discontinue field visits as the number of new cases has reduced significantly.

The table below shows the number of patients treated in all Red Cross medical facilities during the reporting period:

Reporting period	Norwegian/Finnish Red Cross emergency response referral hospital in Bhuj	Japanese Red Cross mobile hospital in Sukhpur	Spanish Red Cross primary health care unit in Bhachau
<b>6 - 8 March</b>			
Treated patients (total)	526	391	415
Surgical operations	38		
Trauma cases	0	54	69
Inpatients	average 90		
Deliveries	11		
Deaths	18		
X-ray	97		
Laboratory tests	122		

Trauma cases registered in the two health units in Sukhpur and Bhachau include secondary infections developed by patients who underwent surgery immediately after the earthquake.

The objective of the nutritional survey which will be conducted by the Federation, the WFP, Save the Children and Oxfam is to determine the effects of the current situation on the nutritional status of the population and to gauge the level of acute malnutrition in Kutch. Anthropometric measurements will facilitate the compilation of baseline nutritional data which can be used to target assistance and thereafter determine its impact. Children in the target group (aged up to 59 months), undergoing a period of rapid growth, are sensitive to nutritional stress. Therefore, this group provides a realistic indication as to the prevalence of malnutrition in a community. Local interviewers will be engaged to conduct the survey, training will be provided and support will be given by experienced staff throughout the entire data collection phase.

**Water and sanitation •**

The Red Cross Red Crescent water and sanitation teams continue to liaise closely and to address the ongoing water and sanitation issues both within the Red Cross compound and outside. The German Red Cross team continues to upgrade facilities in the Red Cross hospital and other areas of the compound, whilst the French Red Cross team maintains its field presence, improving storage capacity in villages and strengthening the existing piped network by installing prefabricated steel tanks. In view of the integration of the emergency response units into the Federation system, a Federation delegate now organises repairs to damaged and collapsed foundations of concrete storage tanks which form part of the piped network.

During the reporting period, the German Red Cross team replaced the Red Cross compound water supply network of flexible hose with galvanised iron pipe to overcome recurring breakages. The team has continued to maintain the equipment and machinery at the Red Cross compound, as well as providing technical support, as required.

The French Red Cross team has installed two prefabricated iron tanks (95 m3 and 70 m3) and a 5 m3 water bladder in three villages in Anjar taluka.

Two local building companies have been contracted to build public toilet facilities in two camps in Bhuj township and a further company has been contracted in Anjar.

Field assessments are ongoing with particular emphasis on the sustainability of a mobile team which would be involved in cleaning village ponds and cattle watering points, conducting health campaigns in schools and primary health centres and supervising the rehabilitation of primary health centres and other structures under the recovery and rehabilitation programme.

**Relief distributions •**

During the reporting period, distributions were carried out in Bhuj town, villages north-west of Bhuj town and Bhachau town. The distribution breakdown for 6-8 March is as follows:

blankets	13,445
tarpaulins	4,992
tents	804
Kitchen sets	2,796
Water containers	2,796

Field assessments and monitoring visits were also undertaken in Nakhatrana, Bhuj town and Bhachau town.

**Logistics •**

Rolls of shelter material are being cut at a rate of approximately 1,600 per day. This number ensures sufficient quantities for scheduled distributions.

The logistics movements during the reporting period (6-8 March) are as follows:

<b>Received</b>	<b>Dispatched</b>
332 tents - British Red Cross	1,553 buckets
3,000 kitchen sets - Federation	2,500 blankets
	504 tents
	1,499 kitchen sets
	2,986 tarpaulins

Local contractors have started preparing preliminary plans and budgets for prefabricated structures for the Red Cross hospital in Bhuj.

**Tracing •**

The Indian Red Cross tracing officer has continued activities in Bhuj. The head of the IRCS family news and tracing service is in Bhuj for meetings with the authorities in order to support liaison between the IRCS tracing officer and official structures, as well as to clarify procedures regarding the collection of official lists of the dead and information on the missing. A further meeting was held with the deputy collector regarding the compilation of lists of the dead. Four people looking for family members were provided with advice.

**Psychological support •**

The psychological support team left Bhuj upon the completion of its assessment and submission of recommendations. Further psychological support activities will be included in the overall recovery and rehabilitation programme.

**Delegation •**

Showers in the Red Cross compound and the security lighting system have been further upgraded. A fire-prevention system for the compound is under consideration.

***Outstanding needs***

Additional unearmarked cash contributions remain of paramount importance, particularly in view of the envisaged recovery and rehabilitation phase of the Red Cross Red Crescent operations in Gujarat.

## ***External relations - Government/UN/NGOs/Media***

### **Bhuj •**

The latest relief coordination meeting confirmed that communities in urban areas are among the most vulnerable and await longer-term solutions to meet their shelter needs.

International and local media have continued coverage of Red Cross activities in the affected area. Journalists from the Indian print media in the USA, Radio Netherlands, a British cable and network company and Norwegian and Swedish crews have followed activities on a sectoral basis.

## ***Contributions***

See Annex 1 for details. The appeal coverage currently stands at 113.4 per cent.

Peter Rees-Gildea  
Head a.i.  
Relationship Management Department

Hiroshi Higashiura  
Head  
Asia & Pacific Department

**This and other reports on Federation operations are available on the Federation's website: <http://www.ifrc.org>**
