

INDIA/GUJARAT: EARTHQUAKE

8 June 2001

appeal no. 04/2001

situation report no. 28

period covered: 18 - 31 May 2001

The reporting period was dominated by preparations for a tropical cyclone which looked likely to strike the earthquake affected areas. These preparations included the evacuation of patients from the Red Cross hospital, mobilization of volunteers and stocking of warehouses with relief supplies. Needs for the recovery and rehabilitation phase continued to be assessed by the new head of delegation for the extended programme design/appeal document to be issued shortly.

The context

At 08.50 hours on Friday, 26 January, a series of powerful earthquakes struck Gujarat state in western India, peaking at a massive 7.9 on the Richter scale, with tremors being felt across several states as well as in Delhi and Mumbai (Bombay) and in neighbouring Pakistan. The epicentre of the quake was 30 km north of the town of Bhuj (population of 150,000), the headquarters of Gujarat's Kutch district while, at the same time, seriously affecting all the area within a range of 100 km from the epicentre including Ahmadabad, the largest city in the state of Gujarat.

Infrastructure has been severely damaged, resulting in large scale collapse of buildings, mine cave-ins, train derailments and power failure, cutting off the water supply. A series of aftershocks (more than 400 with 19 measuring over 5 on the Richter scale) kept the population and the authorities on constant alert for quite a while.

India is divided into five seismic zones with respect to severity of earthquakes. The entire Kutch area lies close to the western margin of the Indian plate and falls into zone 5. It is thus very prone to earthquakes. According to the 1991 census, the population in Kutch district was 1.2 million. It is estimated that the population in the district before the earthquake had reached around 1.6 million.

Latest events

On Wednesday, 23 May a tropical cyclone with wind speeds of more than 200 kilometres per hour was reported to be situated about 500 km west of the Indian coast. By the morning of Friday, 25 May it was located 500 km south-west of Veraval in Gujarat state and the Indian Meteorological Department predicted that it may curve back towards Veraval and Maliya and was likely to hit by 26 May with winds predicted at 220-240 km per hour. Heavy rains and a storm surge of about 2.5 - 4.0 metre above normal tide level was expected near the point of landfall. Still picking up the pieces in the aftermath of January's massive earthquake in the north-west region of Gujarat, thousands of people are still living in tents or semi-permanent structures constructed with plastic sheeting or corrugated tin. The Indian authorities evacuated inhabitants from the coastal villages. Local media in Gujarat reported on 25 May that two such villages in the Veraval area were washed away because of heavy rain. No other extensive damage was reported. The cyclone weakened into a cyclonic storm and by Tuesday, 29 May resulted in heavy rainfall in Bhuj.

Red Cross/Red Crescent action

Overview •

The International Federation sought CHF 25.6 million in cash, kind and services to assist 300,000 beneficiaries (60,000 families) for four months to support the emergency relief activities of the Indian Red Cross Society (IRCS) in the most affected areas in the district of Kutch, state of Gujarat with the main objective to provide the beneficiaries with essential shelter, health and medical services, safe water and other urgently needed relief items. Some 40 Red Cross and Red Crescent Societies and/or their governments responded to the appeal in cash, kind and services including relief supplies and emergency response units (ERUs), i.e. an emergency response referral hospital, two emergency response water and sanitation units, a mobile clinic, an emergency response primary health care unit, and logistics and telecommunications emergency response teams.

With the emergency needs met and the relief operation finalized as of 31 May, the transition phase from relief to rehabilitation is now underway. Work continues on the finalization of the project proposals within five main programmes envisaged for the recovery and rehabilitation phase. They will be condensed into an extended programme design/appeal document, for release in June, detailing projects and costs through 2001 and indicating a wider, state and national dimension plan and budget for the following two years.

Transition phase follow-up •

Development of a detailed plan of action for the five envisaged programmes for the rehabilitation operation in Gujarat is now in full gear. The extended programme design/ appeal document is targeted for finalizing by mid-June, following consultations with the Indian Red Cross.

A teleconference meeting was held on 29 May with desk officers from the Federation's headquarters, the transition coordinator for India operations, head of delegation (HoD) of the India operations (outgoing), and HoD of India operations (incoming) to discuss pending human resource issues and the proposed construction process for the new Red Cross hospital.

Health •

In response to the cyclone alert, all patients in the Red Cross hospital were evacuated to other hospitals in the area. Nine tents were dismantled while six with more sturdy structures were left standing. Two mobile warehouses also were taken down.

The draft proposal for the integrated health programme was completed. Field nurses from the Federation rehabilitation health team began visiting local villages together with water sanitation teams.

A meeting between the Ahmedabad authorities, IRCS and the Federation's construction and health delegates was arranged for 31 May to discuss the rebuilding of *anganwadis* (primary health care centres).

The proceedings of the construction of the new hospital were put on hold while the process is clarified between the IRCS and the Federation. However, drilling for the soil testing at the proposed site was completed and the Federation’s construction delegate, an engineer with experience in reconstruction after the Turkey earthquake, arrives on 4 June. Draft contracts are being prepared to facilitate the process once approved. Preliminary designs and concepts were delivered by a Delhi-based architectural consulting firm. Discussions are on-going between the IRCS, Federation and government officials in order to secure approval for the new hospital.

The Federation’s medical logistics delegate initiated a co-ordination committee during the last reporting period. The 13-member group, comprising Federation delegates, hospital staff and a representative of patients’ needs, holds weekly meetings. The group was formed as a forum for information-sharing, problem-solving and maintaining good relations between the Federation and the hospital staff. Several extraordinary meetings were held throughout the reporting period to discuss preparedness activities in wake of the cyclone alert.

During May, the hospital, which is now fully managed by the government, treated 4,376 patients, performed 46 gyno-obstetric surgeries, 577 x-rays and conducted 3,270 laboratory examinations. There were 113 deliveries and 21 deaths.

The monsoon-proofing of the tented hospital is well underway and is expected to be completed in the next two weeks.

Water and sanitation •

A total of 90 dams were rehabilitated since the commencement of the dam reconstruction programme which started a little over three months ago. Currently, five mobile teams are operational in the following *talukas*: Rapar, Anjar, Bhuj, Nakhtrana and Lakhpat.

Number of dams completed in each *taluka* is as follows:

Anjar	15
Bhachau	27
Bhuj	22
Rapar	25
Lakhpat	1
Total	90

Stone pitching of the wall at Gonthana dam in Rapar by the local village community is half finished and should be completed in the next 10 days. Discussions between the IRCS, Federation and the chief engineer from the irrigation department in Bhuj were held last week and resulted in the latter’s strong support of the programme.

In addition, the chief officer of forestry in Bhuj agreed to supply three seedlings for the health awareness programme which encourages children to water their own seedling with the same water that they have used to wash their hands.

The division of the dam reconstruction and health awareness teams into two main groups is working well. The first rains to fall in the area as a result of the cyclonic storm were minimal, with the expected arrival of the monsoon being mid-June.

Health Awareness:

The health awareness team was divided into two groups comprising three women in each team. One is concentrating its activities to the west of Bhuj and the other to the east. A total of 41 villages were visited to date, 1,550 women and 5,305 children were attended to, and 3,384 neem trees and buckets were distributed. The number of men attending the sessions steadily increased.

Sanitation:

A total of 46 permanent toilet units are functional in Bhuj as well as 30 individual washing units constructed of concrete block and galvanized iron roofing. Half of these are connected to the existing sewage system and the other half are functioning on a septic tank system. Rubbish collection is ongoing by the tractor and trailer team.

Tank repair:

Twenty-two foundation repairs were carried out on storage tanks and currently work is in progress on two in Bhuj *taluka*.

Logistics •

Logistics work during the reporting period included compilation of tracking systems reports; identification of additional vehicles for future programme activities in Gujarat; ongoing monsoon-proofing activities in the Red Cross' compound in Bhuj, and the transfer of stock from mobile warehouses to IRCS warehouses. Transferred warehouse items will be used as disaster preparedness stock and weigh a total of 147,850 kg, with a volume of 529.223 m³. Destinations are as follows: Arakkonam, Chennai; Bahadurgarh, Delhi; Vikroli, Mumbai; and Salt Lake, Kolkatha.

An additional motorcycle was purchased for the wat/san programme.

Telecommunications •

The telecom delegate set up the new computer network and secured the network connection against water damage in preparation for both the cyclone and the monsoon season. Testing of satellite phones was also completed.

Delegation •

The new head of delegation arrived on 27 May. After briefing in New Delhi he departed for three days in Bhuj to meet with the coordinators of the programme areas. The new head of sub-delegation was recruited and will arrive by the end of June.

The new India earthquake programme officer and the head of the audit and risk management department, both from Federation headquarters, arrived 27 May and met with delegates from all areas of the operation to discuss and identify outstanding issues.

At the end of the reporting period there were in 24 delegates in Bhuj, six in Ahmedabad and 10 in the Operations Centre in New Delhi. While the departure of many delegates from the relief operation will occur over the coming weeks, it will be accompanied by the arrival of new delegates for the recovery and rehabilitation phase.

Response to cyclone threat •

With the threat of a cyclone hitting the already devastated region of Kutch, the Indian Red Cross and Federation ensured that systems were in place for a possible disaster relief operation. Existing warehouse stocks were reviewed and ready to be mobilized according to possible needs

Indian Red Cross Society Action •

The IRCS was well prepared for a disaster response operation in Gujarat. The headquarters of IRCS in New Delhi worked closely with the Gujarat state branch to ensure state and district branch volunteers and resources were on standby to respond to the needs as required. The IRCS warehouse in Verangan, 60 km from Ahmedabad, was well stocked with relief items including high protein biscuits, blankets and plastic sheeting. The district Red Cross branches in Bhavnagar, Surendranagar, Rajkot, Gandhidham and Jamnagar have a strong volunteer contingent, largely as a result of the earthquake relief operation.

Federation Action •

The Federation released an information bulletin alerting participating national societies and external audiences of the possible need for emergency relief in Gujarat. Preparations for the cyclone were carried out in the Bhuj Red Cross compound. Three teams were designated, focusing on the hospital, logistics and relief, and the Red Cross compound. Team One evacuated the Red Cross hospital, now run by Indian authorities, stored medical equipment and drugs, and secured the tents and mobile warehouses. Team two dismantled the administration, restaurant and female residence tents. They also secured the huts with rope, cleared the building site of all bamboo sticks and waste, secured water supply for two to three days, and ensured continued electricity supply. Team three was on standby to coordinate logistics and relief as needs arise.

The resulting heavy rainfall caused water to enter the tents, damaging one laptop and a network hub.

Outstanding needs

The HoD is assessing the outstanding needs for the recovery and rehabilitation operation and will attend a meeting in Geneva in June to discuss human resource and other needs. An initial list of staffing needs was communicated by the Federation to the participating national societies. Accordingly, some positions for the forthcoming recovery and rehabilitation phase were already filled. All other outstanding needs will be incorporated into the Federation's extended programme design/appeal document due to be issued in the coming weeks.

External relations - Government/UN/NGOs/Media**Media •**

Media interest in the relief operation steadily declined however it is anticipated that on the six-month anniversary at the end of June, there will be renewed interest. The BBC approached the Federation's information delegate about a possible segment on the current situation in Bhuj for BBC World. Two stories were written for national societies.

Indian print media quoted the regional information delegate in regard to Red Cross preparations in the wake of the cyclone alert.
