ASIA: EARTHQUAKE & TSUNAMIS

28 April 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 181 countries.

In Brief

Revised Preliminary Appeal No. 28/2004; Operations Update no. 53; Period covered: 15 – 27 April 2005; Appeal coverage: 155.8% ([Click here to view the provisional contributions list attached; also available on the Federation's website](#)).

Highlights :

- The Indonesian Red Cross (Palang Merah Indonesia/PMI) appointed a special representative to collaborate at senior levels on coordination issues who is based in an office in the Banda Aceh service centre. The special representative attended the Movement partnership task force meeting held in Jakarta on 27 April, participating alongside Federation and partner national society (PNS) managers in the review and approval of recovery, rehabilitation and reconstruction projects submitted by the six technical working groups.
- With Nias now an active and integral part of the Aceh operation after the 28 March quake, additional delegates were identified for the various positions identified for the Nias sub-office. PMI has 86 volunteers active on Nias, engaged in health, water and sanitation, relief distribution, disinfection, tracing and mailing service and continuing with the last of the searches to recover bodies.
- Japanese Red Cross opened a basic health care centre at a school in Nias' capital of Gunung Sitoli for 11 days in April. In the period between 11-22 April, 722 patients were treated, with most patients suffering from respiratory tract infections. The Japanese basic health ERU officially closed on 22 April and has been handed over to PMI.
- A one-day relief workshop was conducted last week in Galle, with participation of all Sri Lanka Red Cross Society (SLRCS) branches involved in relief operations. The aim was planning for the recovery phase and to discuss ongoing distribution procedures, such as beneficiary targeting, commodity requisition, analysis of records of requisitioned and distributed goods, monitoring and reporting.
- The psycho-social technical committee in Sri Lanka has defined the goal of the national society's psycho-social programme to be developing resilient and empowered communities. Based on this, a broad framework is being developed and a one-day workshop was held on 19 April to discuss various activities that can be carried out at community level. Branch volunteers, community members and branch governance will be consulted to develop the framework further. The Danish Red Cross continues to act as the lead for other PNS providing psycho-social support.
- Over 60 per cent of the temporary housing blocks in the Maldives have been completed. A second instalment of funds has been transferred to the government to cover the cost of materials after a full financial report was received and progress was independently monitored.
- The delegation in the Maldives is also working, with the help of a logistics consultant from Geneva, on procurement of 15,000 domestic (2,500-litre) water tanks for 80 tsunami-affected islands. Every household on the selected islands will receive a water tank, guttering and a down pipe connection kit to boost rain water harvesting, the key source of drinking water.

Appeal history:

- Preliminary appeal launched on 26 December 2004 CHF 7,517,000 (USD 6,658,712 or EUR 4,852,932) for 6 months to assist 500,000 beneficiaries.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 1,000,000.
- Revised Preliminary Appeal issued on 30 December 2004, for CHF 67,005,000 (USD 59,152,246 or EUR 53,439,988) for 2 million beneficiaries for 6-8 months.
- The Preliminary Appeal was originally launched titled “Bay of Bengal: Earthquake and Tsunamis”. The title was subsequently changed to “Asia: Earthquake and Tsunamis” in the Revised Preliminary Appeal launched on 29 December 2004.
- Operations update No. 16 revised the Revised Preliminary Appeal 28/2004 budget to CHF 183,486,000 (USD 155,286,000 or EUR 118,669,000) with programme extensions for particularly Sri Lanka, Indonesia, the Maldives and East Africa.

[Click here for contact details related to this operation](#)

Background

The magnitude 9.0 earthquake that struck the area off the western coast of northern Sumatra on Sunday morning, 26 December 2004, at 7:59 am local time (00:59 GMT) triggered massive waves, or tsunamis, that inundated coastal areas in countries all around the Indian Ocean rim – from Indonesia to Somalia. Sri Lanka, the Indonesian province of Aceh, four states of southern India, the Maldives, and coastal areas of Thailand, Malaysia, and Myanmar were the most severely affected. The earthquake epicentre was located at 3.30N, 95.78E at a depth of 10 kilometres. The area is historically prone to seismic upheaval due to its location on the margins of tectonic plates. However, waves of this magnitude are rare and therefore the level of preparedness was very low.

Summary of the human toll caused by the tsunami as of 28 April

Countries	Dead	Missing	Displaced	Homeless	Sources
Indonesia*	128,645	37,063	532,898	n/a	Government
Sri Lanka	31,147	4,115	519,063	480,000	Government
India	10,749	5,640	647,599	20,000	Government
Maldives	82	26	21,663	n/a	Government
Thailand	5,395	2,932	n/a	n/a	Government
Myanmar	61	10	n/a	3,200	Government
Malaysia	68	12	n/a	4,296	Delegation
East Africa	312	158	2,320	n/a	Government
Total	176,459	49,956	>1,723,543	>507,496	

* The International Federation relies on official government sources for update of the casualty figures in this table and does not bear responsibility for accuracy. Those listed as missing will be officially declared as dead in most countries a year after the disaster. Note: East Africa covers tsunami-affected countries of Kenya, Madagascar, Seychelles, Somalia and Tanzania.

Thousands of staff, relief and medical personnel, and volunteers of the Red Cross and Red Crescent societies of the tsunami-affected countries have provided a vital initial response, in search and rescue, clean-up, providing temporary shelter and immediate relief assistance, emergency medical services, psychological first aid and tracing. It is estimated that over 22,000 Red Cross and Red Crescent volunteers and 76 relief and medical teams were mobilized in the disaster-affected areas.

The Federation immediately launched a Preliminary Emergency Appeal on the day of the disaster with a focus on Sri Lanka, Indonesia and the Maldives. On 3 January 2005, the ICRC launched budget extensions additional to its 2005 Emergency Appeal for Indonesia and Sri Lanka. Along with initial support from the country and regional delegations, the Federation deployed within 24-72 hours three [Field Assessment and Coordination Teams \(FACT\)](#) and 18 [Emergency Response Units \(ERU\)](#) in the sectors of water and sanitation, health care, aid distribution, telecommunications, and logistics/transportation to Sri Lanka, Indonesia and the Maldives.

A total of 285 relief consignments (232 by air and 53 by sea) have now arrived in Indonesia, Sri Lanka, the Maldives and Myanmar and a further 13 are in the relief pipeline, making a total of 298 relief consignments coordinated through the Federation through 14 April.

Indonesia

Overview

Seismic activities have continued in Aceh Province and North Sumatra following the 26 December earthquake and tsunami and 28 March earthquake. Between 28 March and 16 April the United States Geological Survey recorded 278 aftershocks with magnitudes ranging from 4.7 to 6.7. Despite this continued seismic activity, many internally displaced persons (IDPs) are returning to their places of origin, erecting temporary shelters on the sites of their former homes, as they are concerned that they may lose their right of ownership or use of their land. In the last fortnight, the UN Development Programme (UNDP) has been hosting a land advisor to look at the possibility of developing a community-based land mapping project that would work with local communities in areas where no land titles and ownership documents survived the tsunami, in order to ascertain ownership and therefore who is entitled to build homes on the land plots.

The World Food Programme (WFP) school feeding programme, which started in early April in the worst-hit areas of Aceh, aims to improve children's educational performances through increased attendance and enhanced nutrition. The programme is set to increase in the coming months, with the number of beneficiaries estimated to reach 340,000 by August 2005.

Since the 28 March earthquake, the WFP has sent approximately 1,600 metric tonnes of food to Nias and Simuelue islands. A further 630 metric tonnes is expected to be shipped to Nias by the end of the month, to complete the WFP food distribution for April.

The ministry of health noted that food prices in Nias have returned to pre-earthquake levels in Gunung Sitoli for rice, salt, sugar and other food items, and that stocks are being brought in via Sibolga. Markets in Lolofita Moi and Hidanagao are functioning normally again. However, rural areas still face steep market prices.

According to WFP, 19,161 beneficiaries are in need of food and shelter in Singkil on Simuelue Island, while in Sibolga, of the 2,000 IDPs identified, only 352 qualify for food assistance, as sufficient rice is being made available by the local authorities.

Tsunami casualty figures to 20 April as reported by the government list 128,645 dead, with an ever fluctuating IDP count of 532,898 (513,278 in Aceh province, 19,620 in North Sumatra). The reported number of deaths to 16 April as a consequence of the 28 March earthquake stands at 692 (650 in Nias, 42 in Aceh province), with IDPs after the Nias quake numbering 106,800 (60,500 in Nias, 46,400 in Aceh province). The Bakornas disaster management department states that there are no further missing people in Nias. The overall number of missing people in Indonesia remains unchanged at 37,063.

The Government of Indonesia on 12 April announced the master plan for the rehabilitation and reconstruction of the regions and communities of the province of Nanggroe Aceh Darussalam and the island of Nias, province of North Sumatra. The plan is in effect for five years and its guidelines also serve as the reference for preparation of Aceh and Nias restoration and reconstruction follow-up plans in the long-term.

The main section of the master plan also includes funding and accountability aspects, as well as procedures for programme supervision. Each of the plan's 11 detailed booklets contains damage and loss inventories; efforts that have been and that continue in the emergency response phase; programme targets, policy direction, and strategy, and; detailed plans for rehabilitation and reconstruction activities in each sector.

Coordination

Four months into the Movement's tsunami response, the intense demands of the operation have forged an even stronger working relationship between Indonesian Red Cross (Palang Merah Indonesia/PMI) and the Federation. PMI has appointed a special representative to collaborate at senior levels on coordination issues. That individual has established an office in the Banda Aceh service centre, and there is now ongoing, as-needed information sharing with the Federation's head of operations. The special representative attended the Movement partnership task force meeting held at the PMI head office in Jakarta on 27 April, participating alongside Federation and PNS managers in the review and approval of recovery, rehabilitation and reconstruction projects submitted by the six

Asia: Earthquake and Tsunami; Appeal no. 28/2004; Operations Update no. 53

technical working groups (TWGs) for implementation as an integral part of the coordinated Movement framework for Indonesia.

The Special Representative also formally chairs each of the six TWGs, in collaboration with the heads of the working groups who guide the technical aspects of each sectoral team.

To keep communication at a high level between the Federation, PNS and PMI, it has been agreed that PNS and the Federation will conduct weekly informal meetings to discuss matters relating to administration, security and other relevant issues as required.

With Nias now an active and integral part of the Aceh operation after the 28 March quake, additional delegates have been identified for the various positions identified for the Nias sub-office. Within the last two weeks, an administrator and three relief delegates have begun their work, with the finance, health and water and sanitation delegate positions yet to be filled with the best suitable candidates. The head of office in Nias will start his new posting as soon as his visa and travel documents are completed.

PMI has 86 volunteers active on Nias, who are engaged in health, water and sanitation, relief distribution, disinfection, tracing and mailing service and continuing with the last of the searches to recover bodies. The national society has provided medical treatment to more than 5,400 persons at its fixed and mobile clinics on Nias. Nine PMI volunteers who have been trained by the French Red Cross and the Spanish Red Cross are distributing water to people in the badly-damaged south of the island at Teluk Dalam and in the surrounding areas. The national society has distributed family kits, tarpaulins, tents, mosquito nets and blankets.

The Federation's delegates are meeting regularly with PMI staff and volunteers of the Nias chapter. Support to the Nias chapter includes usage access to the Federation's landing craft for transport of relief items donated to PMI and the provision of warehouse space and camp facilities. 350 MT tons of relief items donated directly to PMI arrived last week. A number of trucks and warehouse Rubb Halls (portable warehouses) were handed over to PMI for its use on Nias. Logistics delegates trained local PMI volunteers in warehouse management and goods dispatch.

The Federation has trained eight PMI Nias volunteers on the use of satellite phones, and GPS devices for mapping. These volunteers were involved in road infrastructure surveys and general needs assessments, and in supporting the general distribution of goods to those affected by the earthquake.

In Meulaboh, a meeting was held with the chairman of the PMI Aceh Barat branch and branch staff to review the support activities of the Federation. In turn, PMI also briefed on its activities locally and on the requirements of the local government authorities regarding reconstruction projects. It was agreed to hold regular meetings between the Aceh Barat branch leadership and Federation representatives.

The Federation's health delegate in Meulaboh is now meeting regularly with the health delegates of PNS in the operational area to discuss and coordinate reconstruction activities relating to health.

Security

It was reported that the third round of peace talks between the Indonesian government and GAM ended successfully on 16 April in Helsinki, with both parties agreeing to continue the talks from 26 to 31 May in Finland. However, there have been stories of clashes between the two parties in Aceh province, with TNI and GAM rebels apparently involved in a conflict on 19 April in the hills of Lampuuk, south of Banda Aceh, just a day before the President of South Africa visited the province. There were no accounts of injuries or deaths.

All Federation staff, field workers and PMI volunteers are advised to carry the proper documentations on their person at all times.

Red Cross and Red Crescent action

Overall Goal: Up to 100,000 internally displaced and otherwise affected families (approximately 500,000 people) in western Aceh receive adequate and timely emergency humanitarian assistance over the next six months.

Objective 1 (emergency relief): Basic supplementary food and non-food needs of the 500,000 IDP and most vulnerable beneficiaries are met so that they can start rebuilding their future.

Progress/Achievements

The assessments and distribution of community recovery tool kits are ongoing in Lam No, Calang and Teunom, with the IDPs in Teunom making good use of the kits in cleaning up rubble from destroyed houses and community mosques and halls.

In the last fortnight, the relief team completed distributing the first round of food parcels, baby kits and hygiene kits in Lam No and Calang, while tents have been distributed to IDPs returning to their villages in Lam No. A second round of food parcel, baby kit and hygiene kit distribution is set to begin shortly in Lam No and Calang.

On Nias, based on the assessment by a PMI team, motorcycles and small vehicles can travel the roads but it is still too risky for trucks containing relief items, let alone for heavy equipment transportations. Ruins are to be found everywhere on the streets. Massive destruction can also be seen in Mandrehe sub-district and in the area of Tetesua on Nias' west coast.

In this difficult situation, 91 SATGANAs and medical personnel of PMI are still striving to deliver humanitarian services. Relief distribution, consisting of food items, logistics and medicines are being transported to the sub-districts of Gunung Sitoli, Desa Onozikho, Desa Lolomboli and Lolomoyo on a helicopter funded by the Netherlands Red Cross.

A day before disbursement of each planned relief distribution, PMI representatives meet with the local head of village to form a committee which includes members of the local community. One or two Satgana members also participate in each committee.

In these last days of the emergency phase, PMI evacuation activities are now done on an 'on call' basis when a body is discovered in destroyed buildings being cleaned of rubble.

Additional to the Federation's relief reporting figures, a donation from the Singapore Red Cross arrived in a landing craft at Gunung Sitoli on 21 April. Relief items in that shipment included 93,094 kgs of rice, 2,163 kgs of full-cream milk, 135,378 litres of water and 662 kgs of canned tuna. All of these relief items are being distributed by PMI volunteers, except 12 per cent of rice and 48 per cent of water which will be donated to a local orphanage, Mother of Hope. The Federation has supporting the PNS in transporting goods from the shore to the city and providing trucks for onward distribution.

To date, the relief team has distributed 3,792 tents, 45,518 tarpaulins, 3,600 kitchen sets, 40,969 hygiene kits, 90,033 blankets, 61,227 jerry cans, 18,164 family kits, 9,452 baby kits, 8,732 stoves, 43,084 mosquito nets, 15,344 food parcels and 1,331 recovery kits. Based on figures to date, the relief team has distributed food and non-food items to 52,588 families throughout the province.

The ration card registration continues along the northeast coast of Aceh province. The first round of distributions using the ration card registration was conducted by the PMI Pidie district team. The ration card registration will provide a more accurate picture of beneficiary numbers on the ground. Heads of villages and *poskos* (health posts) have been very supportive of the ration card system, and the relief team will continue to update IDP and host family ration card information in the coming weeks.

Constraints

The road from Lam No to Teunom through Calang is now accessible. However, the accessibility depends on the weather situation, which limits the relief distribution.

Asia: Earthquake and Tsunami; Appeal no. 28/2004; Operations Update no. 53

The differences in contents of complementary food parcels require strategic distribution to avoid confusion among beneficiaries.

Ration card registration has been proving to be a challenge for the PMI branches, as IDPs continue to move from location to location and beneficiaries are absent during the day as they work outside the camps.

Objective 2 (logistics): PMI will have a strengthened supply chain capability and capacity to ensure timely transport of material and human resources to the areas of operation.

Progress/Achievements

Work has begun on the construction of a PMI/Federation warehouse in Medan.

Logistic systems are fully operational to support the Aceh province's east coast distributions.

The base camp equipment for Nias has been received in Medan, cleared through customs and then dispatched to Nias. As well, logistics delegates have supported the setting up of two Rubb Halls in Teluk Dalam on Nias. Additionally, support has been provided to PMI for the transport by ship and subsequent offloading at Nias of 350 MT of unsolicited relief items.

Federation personnel have constructed logistic hubs in both Gunung Sitoli and Teluk Dalam on Nias, thereby providing additional capacity to PMI relief operations.

In Meulaboh, PMI has successfully negotiated land rights to construct a Rubb Hall for additional storage space to pre-position relief supplies for future distributions.

Contract support to the telecom delegate and to the IT staff has assisted the implementation of the wired *ethernet* computer networks in the Jakarta service centre and in the delegation's office.

An additional 30,000 family food parcels are in the process of procurement.

Most recent weekly activity report: 16-22 April

Constraints

Warehouse capacity in Banda Aceh needs to be expanded

Objective 3 (health): primary health care service provided to the tsunami-affected communities and potential epidemics are prevented or adequately addressed.

Progress/Achievements

There has been no substantial change in the overall health situation in the affected area. Some suspected measles cases in Aceh Barat have resulted in 400 vaccinations carried out in response. Documentation from the second measles campaign conducted in Aceh Besar indicates 83 per cent coverage, with this figure awaiting confirmation.

UNICEF nutrition survey results find that interventions during the emergency phase have improved the relative nutritional status of children in the tsunami zone, with prevalence of weight loss having decreased from 12.7 per cent in Jan 2005 to 9.5 per cent in March 2005. A high instance of anaemia in children showed that the food aid coverage was mainly macronutrient and not micronutrient. Morbidity (such as diarrhoea, acute respiratory infections, fever and skin infection) among children was relatively high, with more IDP children than non-IDP children being affected. There was no significant difference found in nutritional status between IDP and non-IDP children.

PMI/Federation health assessments continue, however the absence of an assigned PMI staff counterpart resulted in a shortage of one team and so data on Banda Aceh, Aceh Besar and Pidie was not part of the most recent survey. Thus far, the main concern of people seems to be shelter and water. Health is also considered an issue amongst the people, but not a priority one. Assessments continue in the coming weeks in Aceh Utara, Aceh Timur and Lhoksemawe.

The French Red Cross' medical team is conducting walk-in clinics in health centres. Psycho-social support services are expanding outside Aceh Barat and starting to be delivered in temporary living centres. Delivery of PSP services to PMI volunteers continues.

Banda Aceh

Due to the proposed closure of the Banda Aceh ICRC field hospital (supported by the Norwegian Red Cross) in mid-May, an assessment of other health facilities and their capacities has been initiated in the city so that medical support and thresholds for medical evacuation can be established.

Meulaboh - Japanese Red Cross' basic health care unit (BHCU)

The health delegate in Meulaboh is coordinating with the PNS health staff in the town to do an assessment as a combined team. The Federation's health coordinator visited Meulaboh to work with the health delegate and Japanese Red Cross to establish a joint plan of action and to further increase collaboration. The coordinator also met with representatives of the district health office, along with representatives of the Spanish Red Cross and French Red Cross.

PMI's mobile clinics continue to provide care, with volunteer doctors from Medan supported by the Singapore Red Cross' medical team. A first aid emergency tent was set up near the PMI office tent.

Teunom - German Red Cross' BHCU

The health situation in the area remains stable. Almost all of the BHCU medical equipment has been moved from the German tents to the town's *puskesmas* (clinics). With the BHCU tents due to be dismantled, and the next phase of training and hand-over approaching, the German Red Cross' team has secured alternate accommodation for itself. Water and sanitation support to health activities continued uninterrupted.

Simuelue Island - Japanese Red Cross' BHCU

The health delegate visited the island with the water and sanitation coordinator on 12-13 April 2005. Meetings were held with the district health office, PMI, the public utility and a number of NGOs.

Asia: Earthquake and Tsunami; Appeal no. 28/2004; Operations Update no. 53

Of the 54 health clinics on Simuelue prior to the earthquake, it has been reported that 16 were totally destroyed and need total rehabilitation while 34 more are in need of renovation. A number of NGOs have agreed to carry out this work but no memorandum of understanding (MoU) has yet been signed.

The 28 March earthquake emergency phase is now over, with daily life returning to normal. Some 30 per cent of the island's health personnel are working again, and the number of available medical staff numbers increases daily.

Nias

Members of the Japanese Red Cross' emergency response unit (ERU) opened a basic health care centre at a school in the island's capital of Gunung Sitoli for 11 days in April. The five-member team, made up of two doctors and four nurses, gave medical treatment to 672 persons. The team found no evidence of epidemics in the area and provided general medical treatment. The team performed some surgical operations using local anaesthesia. Japanese Red Cross had an agreement in place with the US Navy ship Mercy for referral cases, but fortunately no such transfers were required.

In the period between 11-22 April, 722 patients were treated in the Japanese Red Cross' BHCU, with most patients suffering from respiratory tract infections. The Japanese basic health ERU officially closed on 22 April and has been handed over to PMI.

The Dutch Red Cross and Belgium Red Cross are conducting assessments on Nias for possible projects with PMI in the south at Teluk Dalam.

The Singapore Red Cross' medical team, comprising one doctor and a nurse, ran a field hospital at Gunung Sitoli on Nias for six days, April 9-14, and treated 660 patients.

In order to deliver effective health services, 26 PMI volunteer medical personnel (five medical doctors and 21 paramedics) were mobilized to work in Gunung Sitoli at a community hall and at a local high school, and in Teluk Dalam with mobile clinics covering Ladara, Kilidoko, Siramili-Kecamatan Gikko. To date, the health posts have provided services to 3,964 patients. The common health problems identified are acute respiratory syndrome, Chepalgia, post-traumatic stress disorder, broken or fractured bones and general injuries.

PMI also makes house calls for earthquake victims who need emergency assistance. PMI provides three ambulance units; one each in Teluk Dalam, Gunung Sitoli, and Tabulala.

Constraints

Contact with PMI health counterparts has been irregular, due to an apparent high staff turnover among personnel designated to work with the Federation's health delegates.

As no PMI health specialist attended the TWG sectoral meeting in Medan, there were no significant health inputs from PMI on proposed projects, nor benefit of guidance on PMI health programme policies. It is apparent how the tsunami response operations are taxing the capacities of PMI and stretching its human resources.

A potential candidate has been identified for the medical logistics position but as yet there is no confirmation of that critical position being filled. The Federation's health team is being challenged in its dual coordinating and implementing role, and the need to have a complete team is becoming ever more apparent.

Objective 4 (water and sanitation): the spread/outbreak of infectious diseases is prevented through water and sanitation interventions.

Progress/Achievements

Initial work on the construction of water storage facilities commenced in two temporary living centres in Banda Aceh, with a local construction supervisor hired to assist. Consultations with the ministry of public works and with UNICEF are ongoing concerning the most appropriate way forward in the humanitarian support to the temporary living centres. A meeting to consider forming a special water distribution 'caucus' was held with the ministry,

Asia: Earthquake and Tsunami; Appeal no. 28/2004; Operations Update no. 53

together with other agencies such as CARE, Islamic Relief, UNICEF, and OXFAM GB. Discussion was focused on the need to provide information to the ministry's general database, developed with the assistance of UNICEF.

Banda Aceh

Preparatory and construction work is underway for extending the water supply to another temporary living centre at Ladong.

The ERU of the Austrian/Malaysian/Macedonian Red Cross societies distributed 263,000 litres per day to 15,000 beneficiaries in Banda Aceh city and its environment.

A new team leader is in place, and a development officer is currently preparing proposals for sanitation in the temporary living centres within Banda Aceh.

Teunom

Daily production of the German Red Cross' ERU is 28,300 litres of water, distributed through 13 bladder tanks set up in town and in the IDP settlements, benefiting 5,000 IDPs and local residents.

Meulaboh

The Spanish Red Cross is producing some 360,000 litres of water daily, with eight mobile water plants working 15 hours a day. Using 21 tankers, the water is distributed to 45,000 beneficiaries in four camps housing IDPs.

PMI volunteers continue to be trained and mobilized for water and sanitation activities.

Sigli and Samalanga

Together with PMI volunteers, the French Red Cross is distributing water in 25 temporary living centres and in 20 IDP camps. The French Red Cross ERU produces 240,000 to 260,000 litres of water daily, distributed with eight tanker trucks.

Nias Island

In the last fortnight, the water and sanitation coordinator visited Nias and Simeulue islands. The specific needs and locations for water supply for the overall community were identified, but as the locals have been relying on rivers and bore holes for their water needs before the earthquake, the situation does not warrant an urgent or emergency response. The Federation will provide support to identified communities in obtaining safe and improved water supply and in building sanitation infrastructures.

The French and Spanish Red Cross ERUs are now fully deployed in Teluk Dalam. Currently, 60,000 litres of water is produced daily and distributed to 11 storage and distribution points in Teluk Dalam and along the western coast of the island. Assessments are ongoing to determine the numbers of beneficiaries. A further need has been identified for seven additional bladder tanks, each with a 5,000-litre capacity. Proposals for water supply, hygiene promotion, community management and sanitation are amongst the projects that are currently being developed.

The French and Spanish teams are also training local PMI volunteers on how to operate water treatments plants and how to test water. The water treatment plants and the water trucks will be handed over to PMI at the completion of the emergency phase.

In order to assist victims who are having difficulties obtaining clean water, PMI water and sanitation volunteers trained by the Federation have also been deployed from Meulaboh on Sumatra to Gunung Sitoli to help provide clean water together with the French and Spanish Red Cross. Using water drawn from the river in Gunung Sitoli, they produced 20,000 litres on the first day of operations, 11 April, and is now up to 42,000 litres per day.

Summary table of water and sanitation activities

Water and sanitation ERU	Distribution/litres	Means of distribution	Beneficiaries	Constraints/Comments
French Red Cross (Sigli and Samalanga)	Two water treatment and pumping stations are delivering 240,000	Eight tanker trucks. 80 x 3000-litre tanks and 6 x 10,000-litre	60 camps of 25,000 IDPs, PMI volunteers	

	to 260,000 litres per day	tanks used for distribution points	are on board and provide support to the operation	
French Red Cross in Teluk Dalam, Nias Island district in North Sumatra	Four ERU WTP units at Sohua Village east of Teluk Dalam. 60,000 litres daily production drinking water	Two PDAM and two city fire engine tankers into 3 x 5,000-litre bladders	Assessments being made to determine number of beneficiaries	Started work on 8 April 2005. May need additional 7 x 5,000-litre bladder tanks.
Spanish Red Cross in Teluk Dalam at Pemancar Area (6km to Sorake resort)	One mass production plant and two sets specialized water units) – working with the French ERU	Two PDAM and two city fire engine tankers into 3 x 5,000-litre bladders	Assessments being made to determine number of beneficiaries	Started work on 11 April 2005
Spanish Red Cross (Meulaboh)	Up to 360,000 litres / day. Eight mobile water plants produce 4,000 litres per day working 15 hrs/day	21 tankers (five from water company-PDAM, three from Spanish RC, three from OXFAM, five from Waskita,, one from TNI (army), one truck (Trakindo)	Estimated 45,000 IDPs in four camps + specialized water to Japanese RC BHCU	
German Red Cross (Teunom)	Produces about 28,300 litres per day	13 bladder tanks set up in town, and in the IDP settlement. ACF have cleaned 158 wells in villages	At least 15,000 (5,000 IDPs and local residents) from water production and to the BHCU site	Will soon wind down as ERU but continue to operate in support of PMI
Austrian/Malaysian /Macedonian Red Cross and Red Crescent (Bandar Baru)	263,000 litres per day; operational in Banda Aceh city and environs	Two x 20 CBM tankers, Two x 5 CBM trucks, and two M6 trucks for trucking to 23 T10-95 OXFAM and 5/10 CBM bladder tanks and distribution points	Water trucked to 15,000 people	

Impact

The occurrence of waterborne diseases in tsunami-affected areas is being reduced by increased water and sanitation activities.

Coordination within the Movement has improved to a much greater level, with information flow becoming more timely.

Constraints

Coordination with PMI on water and sanitation activities still remains a challenge whilst awaiting the PMI counterparts to be recruited. Consequently, long-term water and sanitation policies remain to be developed in coordination with PMI.

Objective 5 (telecommunications): fast and reliable means of communication is secured in the areas of the relief operation.

Progress/Achievements

On Nias, the Federation installed a radio repeater to increase the operational radius of radios to 40-45 kilometres around Gunung Sitoli in the northeast of the island. Telecommunication delegates last week went to Teluk Dalam to look for potential sites to place a repeater in the south for direct communication with Gunung Sitoli.

The HF base stations and VHF repeaters have been installed and are now operational in Banda Aceh, Meulaboh and Gunung Sitoli. Eight Federation vehicles are now equipped with VHF/HF radio systems.

Following the Nias earthquake, the Spanish Red Cross' technical team, together with the assessment team, have been deployed to Nias to support the ERUs on the island. Federation and PNS delegates are now in the field.

Temporary setups for satellite communication for voice and data, a local area network, printing facilities, file server and HF and VHF radio systems have all been established in Gunung Sitoli.

Impact

Fully functional VHF/HF systems in Banda Aceh, Meulaboh and Gunung Sitoli are now available.

Constraints

Due to customs clearance delays in Medan, six Federation vehicles await installation of their radio systems. As well, delays in receiving other needed equipment have created further waiting time for some of the installation plans.

Delays in obtaining supplementary licenses from the ministry of telecommunication have resulted in the HF network not being fully operational due to shortage of frequencies in some areas.

Sri Lanka**Overview**

A new head of delegation has been appointed and will join the Federation's delegation in Sri Lanka on 2 May. The Sri Lanka Red Crescent Society (SLRCS) has appointed a new acting director general. Recovery operations are ongoing as outlined below.

For maps and reports on the general background of the disaster in Sri Lanka please refer to <http://www.lk.undp.org/ndmc>.

Logistics

New living quarters and a warehouse (with 600 m² capacity) for the Federation are due to open in Ampara this week, strengthening the logistics team and providing assistance to PNS in the field. A procurement delegate has been recruited for two months, as has a fleet delegate. Additional drivers have also been recruited for the PNS and the Federation.

Open delegate positions

Numerous key delegate positions remain open and require filling urgently. These include: construction delegate for 12 months; fleet/transport management delegate for 12 months; finance development delegate for six months; water and sanitation delegate for 12 months; head of administration for 12 months; head of operations for 12 months; livelihoods coordinator for 12 months; and an information delegate for 12 months. Further positions within the health department will open shortly. Other positions also listed in the outstanding needs section at the end of this operations update.

Coordination

The Movement platform in Sri Lanka (composed of SLRCS, ICRC and Federation representatives) has successfully approved over 170 concept papers which will allow more defined project proposals for recovery and rehabilitation activities across tsunami-affected areas to be submitted and approved without delay.

Coordination at district level

There are varying degrees of interaction between the SLRCS and PNS at district level. With the deployment of Movement coordination/organizational development or disaster management delegates this should be regularized. The SLRCS, Federation and ICRC are finalizing discussions on the establishment of Federation sub-offices in the south, and for Federation-appointed staff to join existing ICRC sub-delegations to provide support in the field of capacity building and other required technical areas. In the meantime PNS are strongly reminded of their obligation to work with or through the SLRCS branches and to provide support for the development of immediately needed branch capacities and for implementation where required. PNS are strongly discouraged from setting up parallel structures to eventually manage programmes.

Coordination with ICRC

ICRC continues to support PNS and SLRCS coordination within its sub-delegations. ICRC technical coordinators attend and actively contribute to the technical committees.

For more information on SLRCS and ICRC activities to support tsunami-affected populations please go to www.slrscs.org and www.icrc.org, respectively.

Red Cross and Red Crescent action

Overall Goal: Up to 40,000 families (about 200,000 people) in the south of the country receive immediate relief, shelter, health and care, and community support over the next six months.

Objective 1 (water and sanitation): Adequate sanitation and water supply provided to a selected number of temporary shelters/welfare centres, and water and sanitation systems to serve the affected population.¹

Provision of potable water supply to the affected population through water production, rehabilitation of affected systems and construction of new schemes in eight districts

The German Red Cross ERUs installed in Pottuvil and Thirrukovil have ended their missions although both units are still operational under the Federation's management. Both units are producing around 1,887 cubic metres weekly and delivering water to around 20 camps.

The French Red Cross' water production unit working in the northern areas of Ampara district (Kaluwaichikudi – Kallar) produces 120 cubic metres daily but distribution is not more than 70 cubic metres daily due to the lack of bowsers.

Two Federation teams in Ampara district have been providing maintenance to six water tanks installed during the emergency phase; some need major repairs or relocation.

As part of coordination efforts, the Federation assisted in the organization of two meetings with representatives of the government and donor community working in the sector of water and sanitation.

A memorandum of understanding between the Red Cross and Red Crescent Movement and the ministry of urban development and water supply is expected to be signed in May. This will mark the starting point for major water and sanitation projects in Sri Lanka.

Establishment of sustainable environmentally-friendly sanitation services for 100,000 beneficiaries

A location in Ampara district has been identified with the help of local authorities for installation of beds for the discharge of waste water from septic tanks. Design for the filter beds has been agreed with local authorities to avoid contamination of ground water sources. Once filter beds are in place, the programme to install sanitation services (septic tanks, etc.) will continue.

¹ This objective contains three new sub-headings, which form part of the newly revised consolidated tsunami appeal, to be launched shortly.

Establishment of 15 viable and sustainable hygiene promotion teams working within their own communities regarding use of water and sanitation infrastructure.

A Federation specialist in PHAST² has been invited to Sri Lanka to conduct the first training-of-trainers in the middle of May 2005. This training-of-trainers will initiate a participatory community-based water sanitation programme with a higher level of involvement from the SLRCS.

The capacity of Sri Lanka Red Cross Society to implement water and sanitation programmes has been raised to the same standard as other water sanitation agencies operating in Sri Lanka.

A focal person for water sanitation programmes in the SLRCS headquarters has been identified, and all the information since the beginning of the operation has been shared with him.

Next week, the Federation will conduct a technical workshop for six ICRC water habitat delegates, eight water sanitation delegates from PNS, two Federation delegates and one SLRCS representative. The workshop has two main objectives: 1) to share information about actual, future projects, resources and experiences; and 2) to develop a common understanding about the Federation's activities in the water and sanitation sector in the country. A strategy for the water sanitation sector will be drafted.

Objective 2 (shelter): Temporary shelter provided to up to 15,000 families (about 75,000 people) whose houses have been destroyed and have no extended family to live with.

Progress/Achievements

To date, the Sri Lankan government has allocated land for 9,000 of the 15,000 houses planned for construction.

The SLRCS has decided to hire professional services from multi-disciplinary architectural and engineering firms for the planning, design, tendering, quality control and implementation of the projects. The tender documents have been carefully prepared in line with the established guidelines for tendering for professional services, in order to avoid any ambiguities and to accelerate the reconstruction work. This document has been reviewed by the Federation, PNS, an auditor and a reputed consultant. The SLRCS has nominated members of the technical evaluation committee (TEC), representing the government, International Federation, and PNS.

More than 20 firms have shown interest in bidding for professional services. The tender documents will be opened by TEC on 11 May 2005. The comparative bid analysis will be prepared based on technical and financial proposals, and forwarded to the tender board for approval. At the same time, the TEC recommendation will be forwarded to the Federation and PNS for their consent. It is expected that the contract agreements with selected companies will be signed by the end of May 2005.

As part of preparatory activities for the construction of houses, the Netherlands Red Cross is carrying out the beneficiary and land selection process, with the assistance of the University of Matara in the analysis of questionnaires. So far, 100 beneficiaries have been selected. Also, the Malta Red Cross is continuing the construction of 68 houses in Rekewa, Hambantota.

Overall, the Federation and SLRCS envisage finalizing 60 per cent of the construction work by the end of 2006, and the remaining 40 per cent in 2007. However, meeting these deadlines depends upon a number of external factors: the resolution of land issues; the availability of land and acceptance from the local beneficiaries; the availability of local skilled and unskilled manpower; the timely availability of construction material; and, finally, the performance of construction companies.

Please refer to the table under objective 3 for full details of tent and tarpaulin distributions by the American Red Cross' ERU operating in Ampara, Galle, Matara and Hambantota. The ERU, together with the SLRCS branches in Galle, Matara, Hambantota and Ampara, distributed 39,837 tarpaulins and 692 tents.

² PHAST is the standard hygiene promotion methodology adopted by the Federation.

Objective 3 (immediate livelihood restoration): The minimum livelihood requirements provided for up to 40,000 families (about 200,000 people) whose houses have been destroyed and have lost their belongings.

Progress/Achievements

The procurement of additional hygiene kits started this week. They will be distributed in Galle and Ampara, over a period of three and six months, respectively, during the recovery phase of the operation. Similarly, other PNS (Canadian, Swiss and possibly Japanese Red Cross societies) will distribute hygiene kits in the northern areas. All recovery plans and operations are well coordinated with ICRC and the SLRCS branches. The American Red Cross has confirmed that it will cover the entire cost for the procurement of 300,000 hygiene kits.

Total distribution of non-food items by the American Red Cross' relief ERU operating in the east and south of Sri Lanka up to 9 April

Non-food item	Ampara (1st and 2nd distributions)	Galle (1st and 2nd distributions)	Matara (1st and 2nd distributions)	Hambantota (1st and 2nd distributions)	Total
Water containers (10-litre)	76,067	7,762	31,145	6,532	121,506
Water containers (20-litre)	2,868	22,760	21,265	40,792	87,685
Tarpaulins	15,011	7,441	11,655	5,730	39,837
Tents	631	3	0	58	692
Kitchen sets	6,493	6,483	9,670	3,171	25,817
Family kits*	5,863	0	0	0	5,863
Family hygiene kits**	25,543	15,752	22,621	20,622	84,538
Blankets	33,332	16,829	34,242	32,103	116,506
Bed sheets	79,624	36,543	64,417	62,628	243,212
Sarees	9,454	5,916	5,450	6,616	27,436
Sarongs	10,142	5,153	4,850	4,314	24,459
Mosquito nets	38,096	6,719	16,380	6,057	67,252
Kerosene stoves	9,047	1,375	8,080	644	19,146
Sleeping mats	22,386	10,045	30,802	29,831	93,064
Laundry soap	52,084	25,523	45,196	36,735	159,538
Rope	14,438	16,668	29,510	5,570	66,186
Underwear	9,407	14,050	26,000	26,310	75,767
Kerosene Lamps	6,284	2,065	1,776	8,114	18,239
Baby kits	6,647	3,450	10,956	10,334	31,387

* Family kit contains: 2 pots with lids, 2 large spoons, 2 metal plates, 2 cups, 1 plastic container, 1 bucket, 2 bars of soap, 1 saree, 1 sarong, matches and candles.

** Hygiene kits contains: 4 bars of body soap, 4 bars of laundry soap, 2 bottles of shampoo, 6 tubes of toothpaste, 6 toothbrushes, 3 towels, 60 sanitary pads, 6 shaving blades and 20 rolls of toilet paper.

The table above includes items distributed to schools and other institutions. The second round of distributions is concentrating on replenishing stocks distributed during the first round, and includes items not available during the first round of distributions (lamps and underwear). Not all families receive the same relief items, and quantities change according to stock in warehouses and assessments.

A one-day relief workshop was conducted last week in Galle, with participation of all SLRCS branches involved in the relief operation. The aim of the workshop was to have the necessary planning for the recovery phase, and to discuss ongoing distribution procedures, such as beneficiary targeting, commodity requisition, analysis of records of requisitioned and distributed goods, monitoring and reporting. Discussions focused on lessons learned from the relief operation so far and the operation's strengths and weaknesses. This is the first exercise of its kind to be held since the start of the operation. A second workshop, with more focus on relief and camp management, is planned for the near future.

Impact

Since the operation began, the number of individual distributions has reached 386,733 (104,814 in Ampara and 281,919 in Galle, Hambantota and Matara).³ Monitoring and evaluations are being conducted daily and all items are appreciated by the over 200,000 estimated beneficiaries. Support and training are provided continuously.

Objective 4 (health): A constant, good level of health is ensured for up to 20,000 families (about 100,000 people) through prevention and basic health care, as well as health and hygiene promotion.⁴

Infrastructure

The ministry of health requested a MoU to be signed as soon as possible for the additional health facilities that the Movement wishes to reconstruct/rehabilitate. The list under discussion includes 16 health facilities plus the sewerage works at Kalmunai. The signing of the MoU has been delayed due to concern about the wording of the agreement.

The Norwegian Red Cross, to which two of the temporary nurse training schools were allocated, has presented a project proposal for prefabricated buildings that could be completed very quickly.

A concept paper from the Saudi Red Crescent Society to supply 15 ambulances to the ministry of health has been approved by the Movement platform. Discussions with the ministry of health concerning standards are underway, and this is another project that could be implemented quickly.

With the construction coordinator now in place, the construction of health facilities is expected to begin in November, as soon as the construction of houses has been completed (see objective 2).

Community-based health

The working group is developing a framework for an SLRCS national community-based health care programme. The two SLRCS assistant directors for health, who were managing programmes prior to the tsunami, have now agreed to join the group.

The SLRCS hosted the fifth South Asia Regional Network for HIV/AIDS (SARNHA) meeting in Colombo from 19-23 April. The meeting, which was attended by South Asian national societies, discussed issues relating to HIV/AIDS prevention and education, and provided a forum for regional information sharing.

Objective 5 (psycho-social support): The resilience of the affected population and the local relief workers is enhanced through psycho-social support.

Progress/Achievements:

The psycho-social technical committee has defined the goal of the national society's psycho-social programme to be developing resilient and empowered communities. Based on this, a broad framework is being developed. As part of the exercise, a one-day workshop was held on 19 April to discuss various activities that can be carried out at community level to develop resilient communities. It was also decided that the branch volunteers should be consulted on their psycho-social needs, in order to develop the framework further. As a first step, a workshop will be held in Galle on 29 April, with participation of volunteers, community members and branch governance.

The Danish Red Cross is acting as the lead for other PNS providing psycho-social support. For details, refer to operations update no. 50.

Red Cross and Red Crescent activities outside this appeal

The American Red Cross has established a relationship with the National College of Education, Kalutara. The goal is to recognize and enhance resilience in schoolchildren, by training 600 student teachers and providing them with technical and material resources. The project will also institute the same affiliation with the National College of

³ Those beneficiaries included in both distribution rounds have been counted twice.

⁴ This objective contains two new sub-headings, which form part of the newly revised consolidated tsunami appeal, to be launched shortly.

Asia: Earthquake and Tsunami; Appeal no. 28/2004; Operations Update no. 53

Education in Galle and Matara. It will initially target schools that are partially damaged and those that are hosting migrated children as a result of the tsunami, as well as their communities. The team is also in the process of identifying culturally appropriate resilience building activities for each school and community with the help of local Red Cross branches, school communities, and other community members.

Capacity of the national society

The capacity of the national society continues to increase with new Federation/SLRCS recruitment of technical experts and ongoing and planned training of volunteers and staff. Volunteers continue to support all areas of the relief operation – please refer to the individual objectives above for further details.

On 26 April, the first organizational development coordination meeting was conducted with active participation of the SLRCS, PNS, ICRC and the Federation. During the meeting, the SLRCS/Canadian Red Cross branch assessment report was presented. The report provided a detailed account of the strengths and weaknesses of SLRCS branches, and suggested recommendations to improve branch capacity. Communication gaps between the SLRCS headquarters and branches are considered to be among priority areas for improvement.

Communications – Representation, Advocacy and Public Information

Federation information personnel and the media department of the SLRCS continue to provide media coverage, photo exchanges, stories and interviews to the local and international media. To mark the fourth month since the tsunami, the Federation and SLRCS published an article of the Red Cross and Red Crescent Movement's progress in the national English, Tamil and Sinhala press. Media coverage of Red Cross and Red Crescent activities included a team of Swedish journalists accompanying the Crown Princess Victoria on her visit to SLRCS, and a visit from Danish journalists.

Maldives

Overview

The Government of the Maldives (GoM) convened a meeting of partners on 26 April. Ministers expressed concern that pledges were slow in materializing. The national recovery and reconstruction plan seeks USD 374 million and the GoM has to date received cash and firm pledges which amount to USD 201 million, or 53 per cent of the plan. The government is strengthening its internal coordination mechanisms, with the ministry of finance and treasury being responsible for coordinating all aid programmes. The GoM also expressed dissatisfaction with slow implementation of projects and benefits to beneficiaries.

The GoM acknowledge the considerable demands being placed on administering post-tsunami budgets of around USD 400 million (with relief budgets included) for a government which normally has a national budget of about USD 30 million. New staff is being recruited for the GoM tender board in order to expedite the increasing work.

The Federation's construction projects are at the tender and quotation stage, and following the finalization of memoranda of understanding with GoM, project delivery on the ground should commence before the end of May. The Federation has committed to finance three engineer staff members to enable the housing unit to manage a significantly increased workload, including activities of the British and French Red Cross societies. The Movement is providing 85 per cent of the new houses needed.

Red Cross and Red Crescent action

Overall Goal: Tsunami-affected families in Maldives receive immediate non-food relief, shelter, electricity, health, water and sanitation services; and a national society is established.

Objective 1 (Shelter): Temporary shelter provided for 3,440 families and permanent shelter material provided for 5,500 families whose houses have been completely or badly damaged.

Progress/Achievements

Over 60 per cent of the temporary housing blocks have been completed and a second instalment of USD 478,600 has been transferred to the GoM to cover the cost of materials. The Federation received a full financial report from the government and has independently monitored progress by way of site visits.

A MoU between the French Red Cross and the GoM is now ready for signing. It covers the building of 500 houses on Gan Island, Laamu atoll, as well as the construction of a primary school, a community centre, an extension to the regional hospital, a stadium and the purchase of two ambulances. A construction delegate is scheduled to arrive early next month to supervise the construction projects.

The British Red Cross is proceeding with preparation of tender documents and a MoU pending confirmation of its housing and livelihood projects in Laamu, Thaa and Meemu atolls.

The Federation's MoU for the Dhuvafaru Island project is awaiting approval. The tender process for 50 houses on Kudahuvadhoo Island has progressed – bids have been opened for the qualification of contractors.

Objective 2 (immediate livelihood restoration): electric power restored for 30,000 people and the minimum livelihood requirements supported for 2,000 families whose houses have been destroyed or badly damaged, and have lost their belongings.

Progress/Achievements

The last shipment of 8,000 hygiene parcels for IDPs and host families, out of the total of 20,000, is expected to arrive in the coming days. A distribution plan is now being finalized. In addition, 5,000 mattresses, 10,000 pillows and bed-sheets for IDPs are expected to arrive as of next week.

Objective 3 (health): the physical and mental health of the affected population is ensured through the provision of needed basic medical supplies and psycho-social support.

Progress/Achievements

The German Red Cross' project of repairing, re-equipping and supplying health posts, health centres and hospitals continues as planned. Two health facilities have been added to the project, bringing the total number of facilities assisted to 25.

The German Red Cross is also considering assisting a water safety programme in the country.

Objective 4 (water and sanitation): about 5,000 people have access to adequate water and sanitation facilities.

Progress/Achievements

A Federation consultant is presently working with the delegation to assist in the selection of an appropriate design of sewer systems for all new housing projects for the Federation and the new housing area to be built on Gan Island by the French Red Cross.

The delegation is also working, with the help of a logistics consultant from Geneva, on the procurement of 15,000 domestic (2,500-litre) water tanks for 80 tsunami-affected islands. This represents a major logistical challenge because of the volume of the goods and the number of islands that need to be reached. Every household on the selected islands will receive a water tank, guttering and a down pipe connection kit to boost rain water harvesting, the key source of drinking water.

Outstanding Needs

Human Resources

The recruitment of Federation delegates for Sri Lanka and Indonesia continues, and the 22 posts below remain to be filled.

Place of assignment	Positions to be filled
Sri Lanka	Finance development delegate, procurement delegate, information delegate, legal delegate, water and sanitation delegate (reopened), construction delegate (reopened).
Indonesia – Banda Aceh operations centre	IT delegate, recovery programme coordinator, livelihoods delegate, 2 logistics delegates.
Indonesia – Medan sub-office	
Indonesia – Nias island	Health delegate, logistics delegate, IT/telecommunications delegate.
Maldives	Water and sanitation delegate, logistics delegate.
