PAKISTAN: EARTHQUAKE

22 November 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 183 countries.

In Brief

Appeal No. 05EA022; Operations Update no. 15; Period covered: 17-21 November 2005; Appeal coverage: 55.3%; ([click here to go directly to the attached Contributions List, also available on the website](#)).

Appeal history:

- Preliminary Emergency Appeal (launched as South Asia: Earthquake) on 9 October 2005 for CHF 10.8 million (USD 8.4 million or EUR 7 million) for four months to assist 30,000 families (some 120,000 beneficiaries).
- Operations Update No. 3 of 12 October 2005 increased the Preliminary Appeal budget to CHF 73,262,000 (USD 56,616,692 or EUR 47,053,307) to assist up to 150,000 families (some 750,000 beneficiaries) for six months, as an increasingly serious situation has unfolded.
- Operations Update, No. 5, revised down the number of targeted families to 70,000 (some 500,000 beneficiaries) based on the newly assessed delivery capacity and average family size of seven.
- Revised Emergency Appeal launched on 25 October 2005 for CHF 152 million (USD 117 million or EUR 98 million) to assist 81,000 families (some 570,000 beneficiaries) for six months.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 200,000.

Outstanding needs: To date CHF 84 million has been received, of which CHF 42.5 is in cash and CHF 41.6 is in kind contributions. More pledges are in the pipeline and will be reflected in the next operations update. Additional pledges – especially in cash – are very urgently needed.

Related Emergency or Annual Appeals: [Pakistan Annual Appeal 05AA049](#), [South Asia Regional Annual Appeal 05AA051](#)

Operational Summary:

An aftershock measuring 5.5 on the Richter scale jolted northern Pakistan yesterday but with no immediate reports of casualties or damage. A total of 1,340 aftershocks have shaken the region since last month's earthquake and people remain nervous as the ground continues to shift.

The Federation/Pakistan Red Crescent Society (PRCS) have reached more than 128,000 beneficiaries with relief supplies so far and the main priority remains the provision of tents, blankets, sleeping bags, and plastic sheeting to affected families in the higher mountains and in remote areas. Shelter repair kits are also very much a priority.

More than 41,000 beneficiaries have had access to health services provided by Red Cross Red Crescent partners and the Federation/PRCS continue to expand operations further to the north and west of the country. Water and sanitation operations have by now reached some 30,000 beneficiaries and numbers are expected to increase as additional structures are installed. Again, the Federation's support in water and sanitation is being extended to more isolated and remote regions in the north-west of Pakistan.

The Federation and the International Committee of the Red Cross (ICRC) participated at the international donors' conference on 19 November. During the conference nearly USD 5.9 billion of aid and pledges were made towards the relief, rehabilitation and reconstruction of earthquake-hit areas.

For further information specifically related to this operation please contact:

- In Islamabad: Pakistan Red Crescent, Khalid Kibriya (Secretary General), phone +92 51 9250 404; fax: +92 51 925 0408
- In Islamabad: Irja Sandberg (Head of Delegation), email; ifrcpk08@ifrc.org; phone + 92 51 925 0416, fax +92 51 443 0745; Azmat Ulla (Acting Head of Delegation), email azmat.ulla@ifrc.org, phone +92 301 522 6903; Flemming Nielsen (Head of Operations), email: flemming.nielsen@ifrc.org, mobile: +92 0300 555 4522 (Pakistan) + 41 79 217 3343 (Geneva)
- In Geneva: Jagan Chapagain (South Asia Regional Officer), jagan.chapagain@ifrc.org, phone +41 22 730 4316, fax +41 22 733 0395; Christine South (Pakistan Desk Officer), christine.south@ifrc.org phone +41 22 730 4529; Penny Elghady (Asia Pacific Department), penny.elghady@ifrc.org, phone: +41 22 730 4864.
- For logistics /mobilization and coordination of consignments, in-kind donations and shipping instructions please contact: Victoria Tattersfield (Logistics Department), victoria.tattersfield@ifrc.org, phone +4122 730 4852; mobile: +41 79 308 9820; fax +41 22 730 4906.

All International Federation assistance seeks to adhere to the [Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations \(NGO's\) in Disaster Relief](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response](#) in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in this or other countries, or for a full description of the national society profile, please access the Federation's website at <http://www.ifrc.org>

Background

An earthquake with a magnitude of 7.6 on the Richter scale, centered 95 kilometres north-east of Pakistan's capital, Islamabad, struck at 0350 GMT (0850 local time) on 8 October 2005, with tremors felt across the region from Kabul to Delhi. The quake has decimated northern Pakistan and northern India. In Pakistan alone, an estimated 86,000 people have been killed and over 128,000 injured. More than 3.5 million people have been made homeless. The immensity of the disaster is one of deadliest in the region in living memory.

Situation

An aftershock from last month's massive earthquake jolted northern Pakistan yesterday but with no immediate reports of casualties or damage. The tremor measuring 5.5 on the Richter scale was the biggest to hit the country since an aftershock of 6.0 magnitude hit on 6 November. A total of 1,340 aftershocks have shaken the region since the 8 October disaster.

At the 19 November donors' conference in Islamabad, the international community made aid commitments and pledges for relief, rehabilitation and reconstruction of earthquake-hit areas of nearly US \$5.9 billion, which surpassed the target set by the Pakistan government and international lending agencies. Most of the money was in the form of soft loans, not grants - critics forecast this may contribute to the country's debt burden in the long term. The Pakistan government has provided donors with firm guarantees of transparency regarding the use of the funds.

An estimated 1.1 million people have lost their livelihoods in earthquake affected areas of Pakistan

The United Nations has warned that waste and debris left in the wake of the earthquake could become toxic and seriously endanger survivors' health, and has stressed that proper management of the unprecedented large quantities of debris and waste is essential. According to Pakistan government environmental officials, reforestation is also essential to prevent more deadly landslides. The International Labour Organisation (ILO) has reported that up to one million people in North West Frontier Province (NWFP) and Pakistan administered Kashmir (PAK) lost

their jobs as a result of the earthquake. The agency has stressed the need for projects that focus on labour-intensive work with local hiring essential to bring income generation back into communities.

On 20 November, for the first time in nearly 60 years, a group of Kashmir residents crossed the heavily militarized Line of Control (LoC) in the north-eastern Neelum Valley by foot, to learn the fate of relatives affected by last month's earthquake. All five crossing points at the LoC have now been open for the exchange of relief goods.

Operational Developments

The Pakistan military has so far registered 100,000 people from the Kagan and Allai valleys who have been displaced from their original place of settlement. According to military officials, the current population movement is expected to last for another week to ten days after which it is expected that anyone who intends to move to the lowlands for the winter will have done so. Official figures being used to plan camps cover 120,000 people, however, only half of these people will be in official camps run by the military, UNHCR or NGOs - there are currently ten such camps in Mansehra and Balakot districts. During the past week, the Pakistan military registered more than 13,000 people from the Kagan valley and 4,500 from the Allai valley in these camps.

Estimates for the Allai and Kagan valleys (as well as the sub-valleys off them) suggest approximately the same number of people will remain in the highlands. Government policy is now not to encourage people to come down from their villages unless they want to and agencies are being encouraged to focus their efforts on the provision of shelter to those remaining behind. Information received by the Federation operations base in Mansehra from sources in Paras (Kagan valley) indicates that although people did move to Balakot town, it has been reported that some families have decided to return after the assistance they had been promised by the government did not materialize.

The number of affected families assisted by the Federation/PRCS is quickly picked up again. The new office in Mansehra is now functional and the first residence is occupied. The Federation is looking for a second residence; however, with the influx of foreign organisations suitable residences are hard to find. Rents are rising rapidly. Finding a second residence is now urgent given the expected relocation of coordinators from Islamabad to the operations base in Mansehra.

Health services provided by Red Cross Red Crescent partners have reached more than 41,000 beneficiaries and continue to expand further to the north and west of the country. Assessments have been carried out by Federation health and relief teams in the Allai valley and tomorrow a joint helicopter assessment is being conducted by the UN, International Organisation for Migration (IOM) and the Federation. To date, water sanitation operations have reached some 30,000 beneficiaries and numbers are expected to increase as additional structures are installed. Again, the Federation's support has started to extend to regions further to the north-west (from Batagram to Besham and in the Allai and Kohistan valleys), which have less coverage because of their remoteness.

Coordination

Red Cross and Red Crescent Movement

In order to sustain health activities in future, the Federation's health plan of action has incorporated the crucial involvement of the PRCS, in particular at the provincial and district level. Discussions have been held with the Peshawar provincial branch over the past few weeks to ensure the branch is up to date on Federation health activities and to look into the capacity and support needs of the PRCS. Information from these meetings has been shared with the PRCS national headquarters.

Prior to the earthquake the PRCS was in the process of developing branches in disaster prone areas of NWFP but implementation was set back because of the disaster. This plan has since been revisited, and at a recent planning and capacity building meeting with PRCS, the Federation agreed to facilitate the opening of a branch office in the Besham Civil Hospital. As further back-up, the Federation will support PRCS with the hire of one doctor and one paramedic for four months to work with the mobile health team. In the coming months, opportunities to support PRCS in volunteer recruitment to support health and other activities will be identified and followed up.

Cooperation with the ICRC and other Movement partners continues to go well. Formal weekly meetings have been established in Islamabad between the Federation and the ICRC Heads of Delegation and cooperation / Movement coordination represents. A second meeting with donor national society representatives has also taken place to discuss the draft recovery framework and the role of Movement partners in support of this plan.

As the operation moves forward, there are an increasing number of request from donor national societies for support for field visits. While the delegation is trying to accommodate these requests as best as possible, it is important that donors ensure that these visits are notified well in advance to the desk in Geneva or to the delegation and are limited to essential visits only. Due to limited resources in Islamabad, it may not be possible to accommodate specific requests to support each individual visit and donors are requested to be flexible in relation to the resources available.

External partners

The Federation, together with international groups such as Caritas, World Vision, the Swiss Agency for Development and Cooperation/Swiss Humanitarian Aid (SDC/SHA), Save the Children, Norwegian Refugee Council, Catholic Relief Services, Mercy Corps, Oxfam and Concern continue to attend weekly shelter coordination meetings hosted by the IOM. The Federation/PRCS and SDC/SHA have agreed to work together on shelter issues. SDC/SHA has already identified thousands of vulnerable families to whom the Federation/PRCS will provide stoves, shelter repair kits and other non-food items.

Government requirements for the registration of foreign organizations in the field are gradually being tightened. The military now requires all agencies to notify them of the areas in which they operate. All expatriate NGO staff are now required to be registered with the police (in line with normal regulations in Pakistan) and all NGO facilities (offices and residences) have also to be notified to the police. The civil administration is also registering each agency. The government will provide a detachment of police to guard each facility. The military has made it very clear that the safety of the humanitarian community is one of its highest priorities.

In recent UN Office for the Coordination of Humanitarian Affairs (OCHA) coordination meetings, both the Pakistan military and police have highlighted the aspects of behaviour of foreigners that are unacceptable in Pakistan. This has predominantly referred to dress code, particularly of women, and driving behaviour. The Federation strongly recommends that female staff should consider wearing a headscarf when making field visits.

Red Cross and Red Crescent action - objectives, progress, impact

1. Emergency relief (food and non-food)

Objective: the basic shelter and household needs of 81,000 earthquake-affected families (approximately 570,000 people) in northern Pakistan are met over the next six months, enabling them to start rebuilding their future.

Progress/Achievements

The number of affected people assisted by the Federation/PRCS during the reporting period has been limited due to the number of winterized tents arriving in Mansehra – distributions are limited without this important relief item and a steady supply of stocks are due in over the coming weeks. Some 700 tents, 5,000 blankets, 700 sleeping bags and 700 plastic sheets were distributed to nearly 800 families in Balakot, Garhi Habibullah and Batagram, bringing the total number of families assisted so far to nearly 18,300. The Federation's main priority remains the provision of tents, blankets, sleeping bags and plastic sheeting to affected families in the higher mountains and remote areas. Moreover, shelter repair kits, which are being locally purchased, are very much in demand. In order to speed up beneficiary selection process, partnerships with other organisations are being established.

New geographical locations, where few or no other organisations are operating, have been explored by the Federation/PRCS in Kohistan and the Allai Valley. The M6 trucks, donated by Norwegian Red Cross, are potentially useful for the Allai valley and other isolated areas in Palas. Relief assessments and assistance by helicopter to cut off areas of the Kagan Valley continues as planned.

A rapid assessment mission in Allai Valley identified 10,000 affected families with the need for full or partial packages of relief items. A further 15,000 families have been identified in Kohistan, some of whom will be assisted through the helicopter operations. A piece of land in Allai Valley has been identified for a Rubb Hall (temporary warehouse for the storage of relief goods) and to pitch winterized tents for the field teams. No basic facilities such as latrine/washroom are yet in place.

The Federation conducted a one-day mapping exercise in Mansehra with all relief field teams to fully map out the areas field teams had covered so far and to select new locations. A plan for the forthcoming weeks and an over-all distribution plan have now been finalised.

Over the last six weeks, 42 regional disaster response team (RDRT) members from Red Cross Red Crescent societies in eight countries (Afghanistan, Bangladesh, Lao PDR, Malaysia, Nepal, the Philippines, Singapore and Thailand) have worked on the operation. As of 21 November, the third wave of 13 RDRT members started working in the field. Additional female nurses have joined the mobile health teams and relief and logistics administrators have joined the relief team, replacing outgoing members. However, the need still exists for more RDRT members particularly in relief. The next rotation will take place early December. It is hoped to stage a review of the valuable contribution made by the RDRT teams to date and to share lessons learned for future operations.

Constraints

The continued need for RDRT members is linked to the limited number of experienced PRCS volunteers in this area. Support to PRCS capacity building in this region and in the area of disaster response and preparedness will be an important element of the longer-term recovery plan.

2. Emergency health and care

Objective: Some 250,000 earthquake-affected people in northern Pakistan have access to appropriate quality health care, safe water and sanitation services in the next six months.

Progress/Achievements

Basic health care:

Since operations began one month ago, the total number of patients seen by the Federation/Red Cross Red Crescent partners has topped 41,000. Health services continue to expand, particularly in the area to the north and west of the country.

The Federation recently agreed to facilitate the opening of a PRCS branch office in the Besham Civil Hospital. A base is now being established there by the Federation health team that includes two RDRT nurses to support PRCS in the area of health activities. In the coming week the team will set up an office, receive stock, liaise with the PRCS representative who will establish a new base for the branch office, and assist with the recruitment of PRCS staff (one doctor and one paramedic/woman health volunteer to be funded by the Federation). In addition, one new emergency health kit and one surgical kit have been donated to the Besham Civil Hospital.

The mobile medical teams continue to expand beyond main towns to reach communities in isolated and remote areas

The team will also work in coordination with the authorities to establish a schedule for daily mobile clinics, based on the outstanding primary health care needs in Besham, Shingle and Patton. The team will work closely with women health workers (WHW) in the Besham area, who have received support from the Federation, and use this community network to support the delivery of preventative health care programmes.

In the long-term, the Federation's goal is to establish two teams at Besham comprised of Federation/PRCS staff to build the health capacity of the new branch, including community based first aid and hygiene promotion capacity, and incorporate a psychosocial (PSP) component into the overall programme.

Following assessment visits, plans have also been made by the Federation to provide health care support in additional districts of Kohistan, Shingle and Mansehra to those already outlined in previous updates. These areas are not currently being assisted in primary health care by any other organisations. The purpose of this support is to contribute to the resumption of basic health services for the earthquake-affected population in and around the rural catchments areas of basic health units in Mansehra (Balakot and Garhi Habibullah), Shingle (Besham, Allure and Martin) and Kohistan, and to contribute to the resumption of support and referral mechanisms for WHW.

The selection parameters for the provision of equipment and supplies to these basic health units (BHU) are that:

- Health facilities have been completely damaged
- Health staff assigned to these units are still in the community and can continue to provide basic health services if temporary facilities are provided
- District office/Ministry of Health can assign a focal person for the health units to enable the Federation/PRCS to provide additional support (e.g. the provision of mobile teams are being organised to provide logistical support to these BHU and to deliver health services in communities which have difficulty in accessing the services of fixed health units)
- No other organisation is operating in the community/catchment areas nor is planning to provide similar health services in the coming winter months

Of the twenty BHUs assessed, all have been completely damaged by the earthquake. Of these, the Federation will support ten in Mansehra district, five in Shingle district and five in Kohistan district. The equipment and supplies provided to the BHUs include:

- A new emergency health kit (a complete kit of 24 boxes of supplies for each BHU with a medical officer or a basic unit of ten boxes for each BHU without a medical officer)
- A 24 square metre winterised tent
- A kerosene heater
- A generator
- Folding beds and sleeping bags (two per facility)
- Tarpaulins (to serve as tent partitions)

Water and sanitation:

The Federation water and sanitation ERU teams continue to deliver purified water to field hospitals and clinics, as well as to the population of some camps and villages. To date, operations have reached some 30,000 beneficiaries and numbers are expected to increase as additional structures are installed. Latrine construction is going well, with about 200 latrines due to be completed by the end of this week. The Federation's support will be extended to regions further to the north-west (from Batagram to Besham and the Allai and Kohistan valleys), which so far have had less coverage due to inaccessibility.

Hygiene promotion teams are active in and around Balakot and Batagram. Training of local staff and of PRCS volunteers is underway and covers sanitation topics, such as latrines, waste water, water supply and hygiene promotion. Related emergency health programmes in remote areas are under assessment and additional support will be provided as necessary. The table below reflects the Federation's water sanitation activities to date.

Location	Water sanitation activities
Balakot	Purified water, latrine construction, hygiene promotion and technical support
Batagram	Purified water, latrine construction, hygiene promotion and technical support
Garhi Habibullah	Latrines, hygiene promotion and small water supply
Maira (tent camp)	Assessment for sanitation structures (latrines)
Shohal Nadjaf (Balakot area)	Latrines, hygiene promotion and small water supply

Abbottabad (Federation multinational field hospital)	20 toilets with showers will be completed by the end of next week. Eight are already functioning
Bagh, PAK	Purified water supply for Qatar Red Crescent field hospital
Chakoti, PAK	An assessment has been carried out and water supply for the PRCS field hospital and 2,000 persons will be provided. Latrines are under construction.

Psychosocial programme:

The psychosocial programme (PSP) focuses on support activities for children, implemented through teachers and the school system, and on group activities based on community expressed needs and resources.

The Federation is in the process of recruiting one PSP programme manager and 16 field workers for the programme. Field workers will be split into four teams, to be based in Batagram, Balakot, Garhi Habibullah and Islamabad, with activities focused on camps, small community clusters, villages and shelters. The PRCS programme coordinator will supervise the work in the field in close collaboration with the Federation/Danish Red Cross PSP team and with staff from Rozan (a local NGO). Rozan has been charged with developing culturally sensitive training modules and specific guidelines for PSP activities.

The Federation has discussed potential collaboration and coordination with the Turkish Red Crescent Society (TRCS), now running psychosocial activities in Camp H11 in Islamabad. TRCS has plans to support the entire camp of 9,500 inhabitants and the Federation has discussed the idea of splitting responsibilities between different groups. During the reporting period, TRCS has organized various outings for children living in the TRCS tents, to help them overcome the distress of the earthquake. Accompanied by local teachers the children have, among other activities, visited the local zoo and restaurants in the city.

In Muzafarabad, local psychologists hired to work as facilitators in programmes for earthquake survivors living in camps, have undergone basic training covering topics such as psychological first aid, community participation, trauma and psychosocial support for staff. The support provided by ten teachers for the children in Jalalabad camp has continued. The TRCS plans to establish further psychosocial support programmes in Challabandi, Jalalabad, Mera, Tonalia and Tariq Abad camps.

3. Logistics/IT/Telecommunications

Objective: The ongoing PRCS and Federation relief operation have efficient logistical, IT and telecommunication infrastructure in the operational areas.

Progress/Achievements

Logistics:

Air and sea freighted Federation relief goods and equipment continue to flow into Islamabad, Peshawar and Karachi, with more than 100 flights received and nearly 450 truck loads of goods dispatched so far. Together with PRCS, some 850 trucks loads of aid have been dispatched to date for distribution to earthquake survivors.

The transport support unit has assisted the Swedish water and sanitation ERU in Balakot to transport more than 120,000 litres of water to affected communities in the area. Another two M6-trucks have been dispatched to Batagram to provide similar support to the German water and sanitation ERU.

Constraints

With the increasing demand to procure goods in-country for the expanding operations, the logistics team urgently needs to recruit additional staff, including one procurement officer in Islamabad and logisticians to support the field and helicopter operations.

4. Communications – Advocacy and Public Information

Objective: The needs of the earthquake-affected population in Pakistan are advocated for and the Red Cross and Red Crescent's interventions profiled through national and international media coverage

Progress/Achievements

The information team prepared background information material and a press release to be issued after the international donors' conference held by the Pakistan government on Saturday 19 November. The Federation director of operations, Susan Johnson, and the Pakistan delegation's acting head of delegation, plus the head of operations and the movement coordinator represented the PRCS and the Federation's operation during this meeting. The conference generated a few media interviews, including on ABC (Australian television), Polish and Icelandic national radios. A journalist from the Swedish news agency TT is currently visiting Red Cross Red Crescent programmes in Abbottabad, Mansehra and Balakot. An Australian ministerial team accompanied by journalists visited the Red Cross Red Crescent office in Mansehra yesterday.

No field trips were undertaken during the reporting period as was planned and as of 23 November the information team will be down to one delegate.

Outstanding Needs

- Response to the appeal has picked up in recent days however, donors are still urged to continue to contribute to the appeal. Cash contributions are still needed to allow the Red Cross and Red Crescent to fully mobilize its emergency operations and to remain flexible to changing needs as we move into winter.
- The detailed mobilization table is available and updated on [Disaster Management Information System \(DMIS\)](#). In-kind contributions to the Federation's operation in Pakistan have slowed down a bit in recent days and we would encourage donors to contact our Logistics Department in Geneva, to ensure that the necessary relief items can be mobilized. Where possible, relief items will be procured locally.
- The following longer-term positions need to be sought internationally and regionally: head of operations, head of support services, finance delegate, human resources delegate, legal delegate, information coordinator, IT/telecom coordinator, logistics delegate, procurement delegate, warehouse manager, security coordinator, shelter coordinator, recovery coordinator, health coordinator, health delegates, general surgeon, orthopaedic surgeon, operating theatre and surgical ward nurses, and water and sanitation delegates (to cover hygiene).
