PAKISTAN: EARTHQUAKE

25 November 2005

The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in over 183 countries.

In Brief

Appeal No. 05EA022; Operations Update no. 16; Period covered: 22-24 November 2005; Appeal coverage: 54.7%; ([click here to go directly to the attached Contributions List, also available on the website.](#))

Appeal history:

- Preliminary Emergency Appeal (launched as South Asia: Earthquake) on 9 October 2005 for CHF 10.8 million (USD 8.4 million or EUR 7 million) for four months to assist 30,000 families (some 120,000 beneficiaries).
- Operations Update No. 3 of 12 October 2005 increased the Preliminary Appeal budget to CHF 73,262,000 (USD 56,616,692 or EUR 47,053,307) to assist up to 150,000 families (some 750,000 beneficiaries) for six months, as an increasingly serious situation has unfolded.
- Operations Update, No. 5, revised down the number of targeted families to 70,000 (some 500,000 beneficiaries) based on the newly assessed delivery capacity and average family size of seven.
- Revised Emergency Appeal launched on 25 October 2005 for CHF 152 million (USD 117 million or EUR 98 million) to assist 81,000 families (some 570,000 beneficiaries) for six months.
- Disaster Relief Emergency Funds (DREF) allocated: CHF 200,000.

Outstanding needs: To date CHF 84 million has been received, of which CHF 42.5 is in cash and CHF 40.6 is in kind contributions. More pledges are in the pipeline and will be reflected in the next operations update. Additional pledges – especially in cash – are very urgently needed.

Related Emergency or Annual Appeals: [Pakistan Annual Appeal 05AA049](#), [South Asia Regional Annual Appeal 05AA051](#)

Operational Summary:

In addition to the 17 camps set up by the Pakistan government and army, hundreds of “spontaneous settlements” have sprung up in the North West Frontier Province (NWFP). Official government policy is to try and consolidate the spontaneous settlements, but it is not yet clear how this will be achieved nor where the new camps will be.

Relief operations are still building and the Federation/Pakistan Red Crescent (PRCS) is providing what has been deemed to be a strong response, with good outreach to isolated, rural communities. However, the needs still remain daunting and time still remains a pressure. Relief goods including winterized tents, blankets, tarpaulins, jerry cans and sleeping bags continue to be distributed by land and air and have reached nearly 130,000 beneficiaries so far.

The Qatar Red Crescent (QRCS) field hospital has started operations in Bagh, Pakistan administered Kashmir and treated 70 patients on its first day. Twice weekly mobile clinics are expected to begin soon in a new area, Lohar Bella. More than 43,000 people have received basic health care services from the Red Cross Red Crescent since operations began last month.

More communities have access to clean water produced by the two water and sanitation ERUs in Balakot and Batagram, with nearly 40,000 beneficiaries reached to date. In both towns Federation delegates are training local women on the dissemination of hygiene promotion in camps and villages.

For further information specifically related to this operation please contact:

- In Islamabad: Pakistan Red Crescent, Khalid Kibriya (Secretary General), phone +92 51 9250 404; fax: +92 51 925 0408
- In Islamabad: Irja Sandberg (Head of Delegation), email: ifrcpk08@ifrc.org; phone + 92 51 925 0416, fax +92 51 443 0745; Azmat Ulla (Acting Head of Delegation), email azmat.ulla@ifrc.org phone +92 301 522 6903; Flemming Nielsen (Head of Operations), email: flemming.nielsen@ifrc.org, mobile: +92 0300 555 4522 (Pakistan) + 41 79 217 3343 (Geneva)
- In Geneva: Jagan Chapagain (South Asia Regional Officer), jagan.chapagain@ifrc.org, phone +41 22 730 4316, fax +41 22 733 0395; Christine South (Pakistan Desk Officer), christine.south@ifrc.org phone +41 22 730 4529; Penny Elghady (Asia Pacific Department), penny.elghady@ifrc.org phone: +41 22 730 4864.
- For logistics /mobilization and coordination of consignments, in-kind donations and shipping instructions please contact: Victoria Tattersfield (Logistics Department), victoria.tattersfield@ifrc.org, phone +4122 730 4852; mobile: +41 79 308 9820; fax+41 22 730 4906.

All International Federation assistance seeks to adhere to the [Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations \(NGO's\) in Disaster Relief](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response](#) in delivering assistance to the most vulnerable. For support to or for further information concerning Federation programmes or operations in this or other countries, or for a full description of the national society profile, please access the Federation's website at <http://www.ifrc.org>

Background

An earthquake with a magnitude of 7.6 on the Richter scale, centered 95 kilometres north-east of Pakistan's capital, Islamabad, struck at 0350 GMT (0850 local time) on 8 October 2005, with tremors felt across the region from Kabul to Delhi. The quake has decimated northern Pakistan and northern India. In Pakistan alone, enormous numbers of people have been killed and injured. More than 3.5 million people have been made homeless. The immensity of the disaster is one of the deadliest in the region in living memory.

Situation

While more than a dozen official tent camps have been established by the Pakistan government and army in North West Frontier Province (NWFP), literally hundreds of so-called "spontaneous settlements" have also sprung up, ranging from those with a few families to those with several hundred families. Interagency efforts to map these settlements are ongoing. Four new camps have been created during the reporting period, including one at Havelian, south of the earthquake zone. Official government policy is to try and consolidate these settlements, but how this will be achieved, and where new camps will be created is not yet clear.

Besides official tent camps, hundreds of "spontaneous settlements" of earthquake survivors have sprung up in the NWFP

The major fear on the government's side, as well as on the part of many agencies, is the poor sanitation in the camps and, in particular in these "spontaneous settlements". The Pakistan military is openly asking aid agencies to provide technical advice and support to avoid accidents and the possible spread of disease.

Also unclear is the official position on unaccompanied children and single females – it is reported that they may be taken to institutions in Islamabad. The reported removal of some orphans by the Ministry of Social Welfare and their subsequent disappearance from one camp, has been highlighted by Church World Services.

The International Organization for Migration (IOM), lead agency for the shelter cluster in Pakistan, estimates that some 330,000 tents have been distributed in NWFP since the start of the operation. The official priority is now to seek out those families remaining above 5,000 feet and distribute shelter repair kits and corrugated iron sheeting. The Pakistan government has stated at the recent donors' meeting that families have to have "ownership" of their shelter and has encouraged support to help families build their own shelter. Five engineering battalions are working in the Kagan and Allai valleys and have constructed approximately 500 temporary shelters. This approach seems to be effective as the local population appear willing to build temporary shelters if tools and materials are made available. Official estimates indicate there are around 250,000 family homes that will need to be reconstructed during the rehabilitation phase.

Attention is also turning much more to the issue of food security which is likely to be the next priority after emergency shelter. There is also an issue concerning the situation of local livestock. With homes and barns in ruins and winter at the doorstep, many mountain communities are slaughtering or selling the animals that survived the earthquake. Some families are fearful of not being able to keep their animals alive after the snows come. Milk production has fallen dramatically since the earthquake, partly because so many animals were killed, but also partly because many of the animals that survived have been neglected since the earthquake. According to agriculture and health officials, farm animals are vital for the health and economic well-being of the highland people of northern Pakistan, providing an essential part of the diet of these people.

Operational Development

Relief operations are still building and the Federation/Pakistan Red Crescent (PRCS) is providing what has been deemed to be a strong response, with good outreach to isolated, rural communities. However, the needs still remain daunting and time still remains a pressure. Items including winterized tents, blankets, tarpaulins, jerry cans and sleeping bags distributed by land and air have to date reached nearly 130,000 beneficiaries in NWFP. In the pipeline for distribution are some 30,000 wood burning stoves/heaters.

More communities now have access to clean water produced by the two water sanitation emergency response units (ERUs) in Balakot and Batagram. In addition, the Federation's transport support unit is trucking filtered water. In total, nearly 40,000 beneficiaries have been reached to date. In both towns Federation delegates are training local women on the dissemination of hygiene promotion in camps and villages.

Medical help being received at the Spanish Red Cross basic health care ERU in Balakot

Coordination

Red Cross and Red Crescent Movement

The Federation continues to coordinate activities with the Pakistan Red Crescent Society (PRCS) and is committed to ensuring that after the immediate recovery phase ongoing operations are handed over for implementation by the national society. To support this process the Federation will provide organizational development and capacity building support, including targeted training for disaster response and disaster management.

The number of PRCS and regional disaster response teams (RDRTs) benefiting from the facilities provided by the Danish Red Cross run base camp in Mansehra has increased. More tents have been erected to accommodate the increasing number of short and long-term visitors. Since operations began the camp has accommodated more than 500 people and in the last two weeks alone has served over 600 meals. Besides a one day water shortage that affected toilet and shower facilities, feedback from visitors about the camp has been very positive.

The Turkish Red Crescent Society (TRCS) relief teams have been working in close cooperation with the PRCS branch in Muzaffarabad. Both national societies have engaged in the distribution of TRCS relief items (including soap, blankets, sleeping bags and food) that have so far reached nearly 140,000 people.

External partners

The Federation continues to work in close coordination with the Pakistan authorities and United Nations agencies by participating in relevant cluster meetings and other coordination mechanisms both in Islamabad and in the field, with or on behalf of the PRCS.

An agreement is in the pipeline between the Federation and the Pakistan Association of Plastic Surgeons for the Federation's field hospital in Abbottabad to serve as a centre for reconstructive surgery in the coming months. The association accepts the Federation's standards in relation to operating theatre procedures and it is clear that the high standard of nursing care offered by the field hospital would be a critical to this cooperation.

Red Cross and Red Crescent action - objectives, progress, impact

1. Emergency relief (food and non-food)

Objective: the basic shelter and household needs of 81,000 earthquake-affected families (approximately 570,000 people) in northern Pakistan are met over the next six months, enabling them to start rebuilding their future.

Progress/Achievements

The Federation/PRCS has, to date, distributed relief goods including winterized tents, blankets, tarpaulins by land and air to nearly 140,000 beneficiaries in NWFP.

Federation relief distributions as of 23 November

Location	Tents	Blankets	Tarpaulins	Jerry cans	Sleeping bags	No. of Families
Garhi Habibullah	6,536	42,075	6,369		1,476	6,566
Balakot air/land	4,801	42,796	6,493	2,681	1,660	7,989
Batagram/Battal	5,290	36,942	5,290		1,162	5,290
Total	16,627	121,813	18,152	2,681	4,298	19,845

Relief operations are continuing to build and, in spite of the Red Cross Red Crescent Movement providing what has been assessed as a strong response and good outreach to rural and isolated communities, the needs remain daunting. Regular assessments are discovering further areas of need, meaning that the caseload of known vulnerable people is still rising. At the same time, these assessments are also finding that many affected people are doing what they can to put their lives back together. In some areas, shops and markets are starting to function again and homes are being rebuilt.

The Federation, working in close cooperation with other Red Cross Red Crescent Movement partners, is developing a strategic framework to support the early recovery of earthquake survivors in areas of NWFP. To date, two livelihoods and shelter-related needs assessments have been undertaken to support the development of the strategic framework, complemented by an in-depth analysis of gender and community participation considerations. This has been compiled in a draft recovery framework and it is planned to share this with donor national societies in the coming days.

2. Emergency health and care

Objective: Some 250,000 earthquake-affected people in northern Pakistan have access to appropriate quality health care, safe water and sanitation services in the next six months

Progress/Achievements

Basic health care:

More than 43,000 people have received basic health care services from the Red Cross Red Crescent since operations began last month.

In Abbottabad, the 200-bed multi-national field hospital continues to develop its support to patients. Some 175 patients have been admitted since the opening of the hospital one month ago. The average daily occupancy rate after the first days has been 96 patients and is increasing. All expatriate staff is now in place, except for the orthopaedic and reconstructive surgeons and the hospital is looking into temporary local solutions. The field hospital is able to receive more patients from other centres, so a revision of the existing memorandum of understanding has been made with the Ayub Medical Centre to enable the Federation to admit non-Red Cross Red Crescent patients directly. The German Red Cross has set up a kitchen on the hospital compound able to provide meals to patients and staff alike.

The multi-national field hospital in Abbottabad has admitted 175 patients since it opened last month

Collaboration with Ayub Teaching Hospital remains excellent. Physiotherapy is progressing with one physiotherapist set to join the two assistants currently working there. A physiotherapy tent is being set up and basic equipment will be locally purchased. Nursing services have been strengthened because of a full team of expatriate nurses, able to attend to bedsores prevention, dressings, chart monitoring, observation, and hygiene.

In Upper Dhuli (Bagh district) the Qatar Red Crescent Society (QRCS) field hospital is now operational with a team of six doctors. The hospital treated 70 patients and had two admissions in its first day. Twice weekly mobile clinics are expected to begin soon in a new location, Lohar Bella. The QRCS has been proactive in ensuring good communication and coordination with the Federation health team and has undertaken to provide primary health services in this remote location. The QRCS will have the capacity to provide in-patient care to 40 patients when six nurses arrive from Egypt at the end of the week.

In Balakot, statistical data developed by the Spanish basic health care ERU has been shared by the Federation with the World Health Organization (WHO). Data indicates certain trends for the coming months relating to upper respiratory and diarrhoeal diseases which will require routine medical care. This reinforces the need for the Federation to develop a stock of safe, reliable medicines, especially for children in Pakistan. The Federation medical logistician is presently looking into the matter. The Spanish ERU has to date treated nearly 2,500 patients.

In Batagram, the remaining members of the original French ERU have left, having treated more than 4,400 vulnerable people in the outlying areas of Allai, Bateela, Pacto and Rashang. Activities of the current team, downsized to one doctor and three nurses, will be limited until the arrival of additional French Red Cross staff. Until then, one female doctor has been deployed by the RDRT to assist the ERU.

The Korean Red Cross (KRC) component of the KRC/PRCS health team, which altogether treated some 7,600 people, left Besham during the reporting period. Discussions are underway with the PRCS Peshawar provincial branch chairman about the possibility of PRCS sending another team to work in this under-served area.

In Muzaffarabad, the Turkish Red Crescent (TRCS) field hospital has treated nearly 9,300 patients to date. The TRCS mobile team of six medical staff has provided basic health care to some 200 people in the remote and so far un-served Purak area during this period.

Water and sanitation:

In Balakot, the Swedish/Austrian water and sanitation ERU produces up to 150,000 litres of purified water per day, which so far has reached some 28,000 beneficiaries. Two transport support unit (TSU) trucks, each hauling a 4,500 litre bladder (soft tank), continue to support the ERU to deliver about 20,000 litres of purified water each day to camps and to PRCS Rub Halls (temporary warehouse) sites. An additional 6,000 litres of water is being distributed daily to tap stands in the surrounding areas.

Two female members of the Federation's hygiene promotion team have been training five local women to conduct hygiene dissemination in local camps and villages. So far, they have made contact with 100-150 local women and are now conducting hygiene promotion for men living in the same camps and villages. Construction of about 70 latrines in the district will be completed by the end of the week.

In Batagram, two filtration systems run by the German/Austrian ERU continue daily production of some 50-70,000 litres of water, reaching about 7,000 people. The purified water supply is expected to increase with the arrival on site of two TSU trucks, ready to transport water to more people in the area. As in Balakot, two Federation delegates are training local women on the dissemination of hygiene promotion in camps and villages. Two local women are being recruited to the hygiene promotion team.

Psychosocial programme:

In Abbottabad, a group of psychologists and counselors from the Marie Stopes Society and the Ministry of Health are working with patients at the Federation's multinational field hospital. During the reporting period, about 75 clients received support/counseling. The main symptoms presented by clients are stress, phobia, insomnia and depression. Activities have included relaxation exercises, cognitive and behavioral assessments and observation of the patients. Daily group play sessions for children also take place. Positive changes have been observed in the behaviour of many patients, with once apathetic attitudes now changing and demonstrating more interaction with each other as well as with delegates. These changes could be attributed to factors such as increased trust and the high quality of the programme.

In Havelian, in the Garhi Habibullah area, 2,000 people have registered at the soon to be opened government and UNHCR camp. No other organizations are working in PSP and the town has been identified as starting point for the Federation/Danish Red Cross psychosocial field team.

3. Logistics/IT/Telecommunications

Objective: The ongoing PRCS and Federation relief operation have efficient logistical, IT and telecommunication infrastructure in the operational areas.

Progress/Achievements

IT/Telecom:

The Federation's operations centre in Mansehra has relocated to new offices, but for now IT continues to run on the more expensive RBGAN system. The VSAT units are expected soon, but in the event of delays and as a back-up arrangement, a locally provided, shared DSL connection has been installed. Since this shared connection has no guaranteed bandwidth, it will be unsuitable as a long-term primary connection for the office, however, it is providing a temporary solution. A file server is being set up in the Islamabad office to back-up computer files. Delegates will be instructed soon on how to ensure vital information is stored on the server.

A Codan 9360 HF base station has been obtained on loan from the Spanish Red Cross ERU, under the agreement that it will be replaced when the Federation receives equipment from Geneva or procures a unit locally. A special HF radio antenna has been erected on the roof of the Mansehra office that should make communication with vehicles traveling in the high mountain areas easier. Testing will be carried out this week.

Support is being provided to PRCS to install a DSL connection at national headquarters. Cabling has commenced and antivirus software will be installed on all PRCS computers in the coming days. The concept paper for a radio installation project (to install 15 HF/VHF radios and conduct necessary training) has been submitted and is awaiting approval. Several local companies are offering installation and training services, so the entire project will be tendered to local companies. Depending on local prices, equipment may have to be ordered through Geneva.

The Danish IT/telecom ERU will remain with the operations until 22 December. All equipment and operational knowledge will be handed over to the Federation before it departs.

Logistics:

The Federation continues to receive relief goods by air at Islamabad airport and, to date has dispatched nearly 450 truck loads of aid to the warehouse in Mansehra. Certain commodities such as stoves/heaters, foam mattresses, shelter repair kits and woolen shawls are being procured locally.

The Federation helicopter logisticians have relocated to Mansehra. This will enable them to better coordinate the airlifting and distribution of relief goods from the warehouse in Mansehra to communities in remote areas of northern Pakistan.

4. Communications – Advocacy and Public Information

Objective: The needs of the earthquake-affected population in Pakistan are advocated for and the Red Cross and Red Crescent's interventions profiled through national and international media coverage

Progress/Achievements

There were no new developments to report during the reporting period. The reporting period saw the departure of one of the information delegates. The second delegate has been occupied in providing support to visiting journalists and national society representatives.

Outstanding Needs

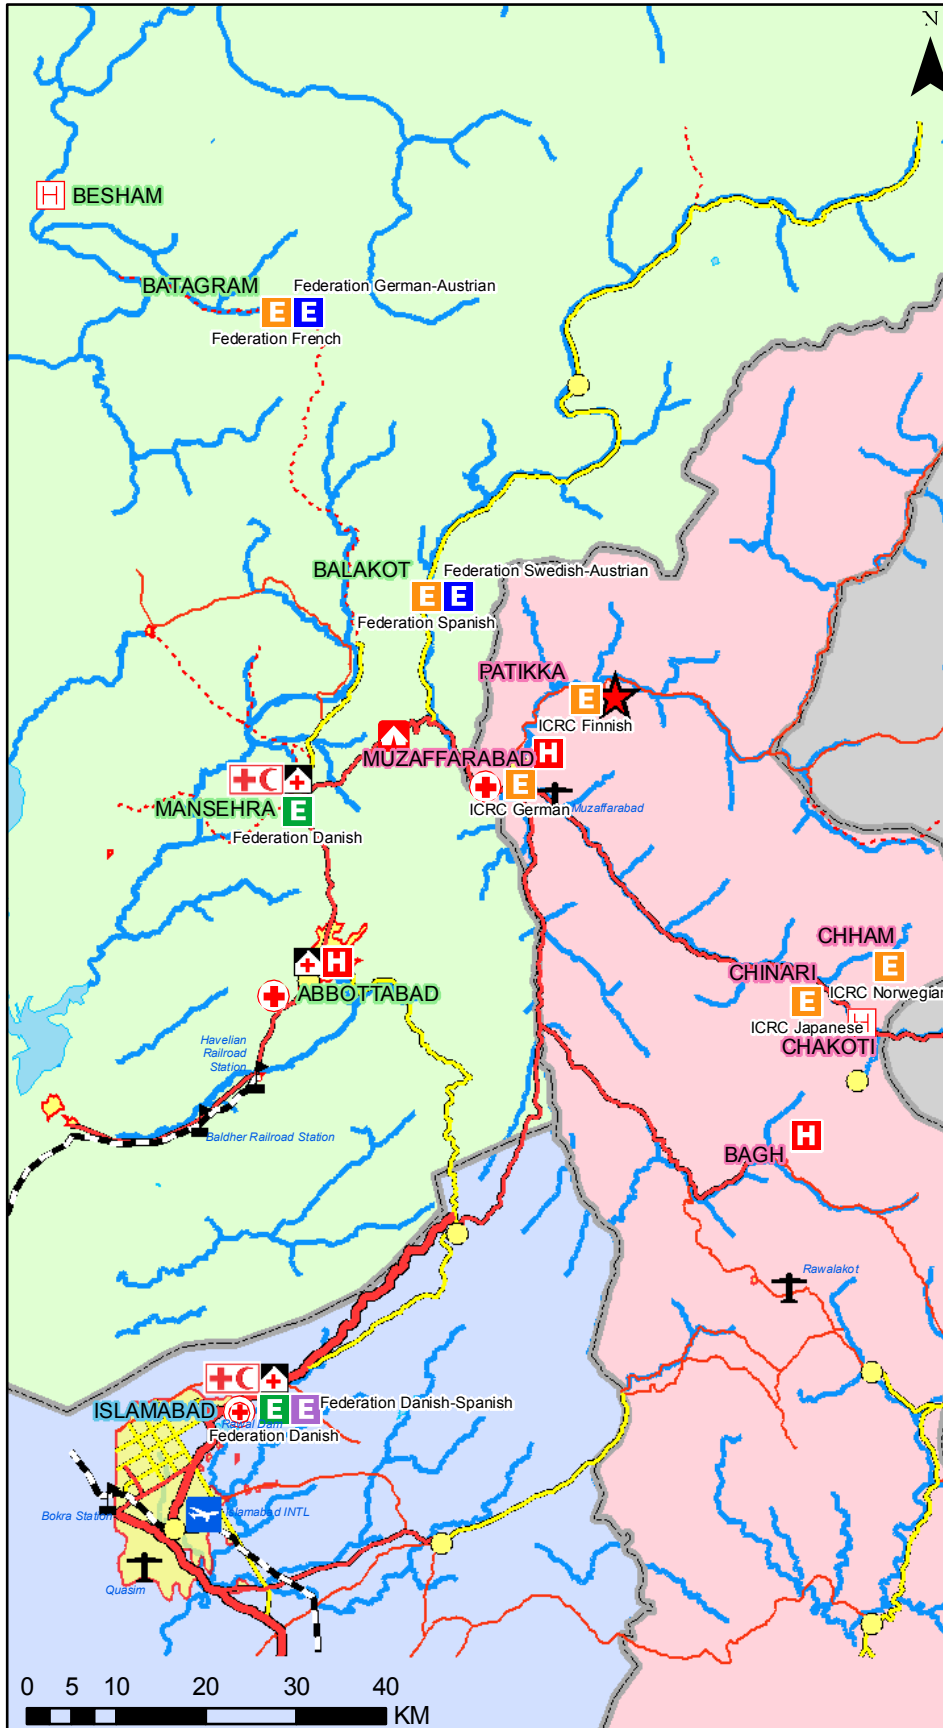

- Response to the appeal has slowed again and a further problem with exchange rate conversions relating to the in-kind donations has meant a further small drop in the percentage coverage. There are however a number of contributions in the pipeline that will help coverage by the time of the next update. Donors are still urged to continue to contribute the appeal. Cash contributions are still needed to allow the Red Cross and Red Crescent to fully mobilize its emergency operations and to remain flexible to changing needs as we move into winter.
- The detailed mobilization table is available and updated on [Disaster Management Information System \(DMIS\)](#). The Federation is still working on mobilizing specific relief items and it is important that donors coordinate with the Secretariat's logistics department in Geneva regarding outstanding needs. Where possible, relief items will be procured locally.
- The following longer-term positions need to be sought internationally and regionally: head of operations, head of support services, finance delegate, human resources delegate, legal delegate, information coordinator, IT/telecom coordinator, logistics delegate, procurement delegate, warehouse manager, security coordinator, shelter coordinator, health coordinator, health delegates, general surgeon, orthopaedic surgeon, operating theatre and surgical ward nurses, and water and sanitation delegates (including hygiene).
